<sup>1</sup> Such services as health, education, etc., administered by public authority as well as by private agencies are listed elsewhere. Only services peculiar to public administration are listed under this head.

## Section 2.—The Dominion Department of Labour.

The Department of Labour of the Dominion Government was established in 1900 under the authority of the Conciliation Act, 1900 (63-64 Vict., c. 24). Its chief duties originally comprised the administration of certain provisions of this statute designed to aid in the prevention and settlement of labour disputes, the administration of the Government's fair wages policy for the protection of workmen employed on Dominion Government contracts and on works aided by grants of public funds, the collection and classification of statistical and other information relative to conditions of labour, and the publication of a monthly periodical known as the *Labour Gazette*. From 1900 to 1909 the Department was administered by the Postmaster General, who was also Minister of Labour. It was constituted a separate Department under the Labour Department Act, 1909 (R.S.C., 1927, c. 111).

The work of the Department was greatly increased in 1907 by the passage of the Industrial Disputes Investigation Act (R.S.C., 1927, c. 112). At present the Department is also charged with the administration of an Act passed in 1918 known as the Employment Offices Co-ordination Act (R.S.C., 1927, c. 57), the Government Annuities Act of 1908 (R.S.C., 1927, c. 7), the Technical Education Act enacted in 1919 (R.S.C., 1927, c. 193), the White Phosphorus Matches Act of 1914 (R.S.C., 1927, c. 128), the Combines Investigation Act of 1923 (R.S.C., 1927, c. 26), the Old Age Pensions Act of 1927 (R.S.C., 1927, c. 156), the Fair Wages and Eight Hour Day Act of 1930 (20-21 Geo. V, c. 20), the Vocational Education Act, 1931 (21-22 Geo. V, c. 59), the Unemployment and Farm Relief Act, 1931

(21-22 Geo. V, c. 58), the Unemployment and Farm Relief Continuance Act, 1932 (22-23 Geo. V, c. 13), the Relief Act, 1932 (22-23 Geo. V, c. 36), the Relief Act, 1933 (23-24 Geo. V, c. 18), and the Relief Act, 1934 (24-25 Geo. V, c. 15). The scope of the Department has increased in other directions, especially in investigating the cost of living, and in connection with the International Labour Organization of the League of Nations. For a report of the operation of the Old Age Pensions Act, see p. 837 and for the proceedings under the Combines Investigation Act, 1923, see p. 850. For the operation of the Government Annuities Act of 1908 and the Technical Education Act, see the chapters on Insurance and Education, respectively.

**Industrial Disputes Investigation Act.**—The Industrial Disputes Investigation Act (R.S.C., 1927, c. 112), has attracted considerable favourable attention from legislators and publicists throughout the world. As enacted in 1907, it forbids strikes and lockouts in mines and certain public utility industries until the matters in dispute have been dealt with by a board of conciliation and investigation consisting of three members, two appointed by the Minister of Labour on the recommendation of the respective parties to the dispute, the third on the recommendation of the first two, or, if they fail to agree, by the Minister himself. Should either of the parties fail to nominate a board member, the Minister may appoint a fit person on its behalf. After the board has made its report, either of the parties to the dispute may reject it and declare a strike or a lockout, a course adopted, however, only in a small percentage of cases. The machinery of the Act may be extended to other industries with the consent of the parties concerned. In January, 1925, a judgment was rendered by the Judicial Committee of the Privy Council declaring that the Act as it stood was not within the competence of the Dominion Parliament.\* At the ensuing session of Parliament amendments were made to the statute, with the object of limiting its operation to matters not within exclusive provincial jurisdiction. It was also provided by these amendments that the statute should apply in the case of "any dispute which is within the exclusive legislative jurisdiction of any Province and which by the legislation of the Province is made subject to the provisions of this Act".

The Legislatures of all provinces except Prince Edward Island have taken advantage of this provision and enacted enabling legislation, by which the Dominion Industrial Disputes Investigation Act becomes operative in respect of disputes of the classes named in the Dominion law and otherwise within exclusive provincial jurisdiction.

A review of the proceedings under the Industrial Disputes Investigation Act from its enactment in March, 1907, to Mar. 31, 1934, shows that, during the 27 years, 802 applications were received for the establishment of boards of conciliation and investigation, as a result of which 536 boards were established. In all but 38 cases, strikes or lockouts were averted or ended.

**Fair Wages Branch.**—The Fair Wages Branch of the Department of Labour is charged with the preparation of fair wages conditions and schedules of minimum wage rates, which are inserted in Dominion Government contracts and must be adhered to by contractors in the execution of such works. The number of fair wages schedules prepared, from the adoption of the Fair Wages Resolutions in 1900 up to the end of the fiscal year 1933-34 was 6,131. The number of fair wages schedules and clauses furnished during the fiscal year 1933-34 was 123.

\*See p. 241 of the *Labour Gazette* for February, 1925, for text of judgment of the Judicial Committee of the Privy Council in regard to the validity of this statute.

The fair wages policy of the Government of Canada was originally based on a resolution adopted by the House of Commons in 1900 and expressed in an Order in Council adopted on June 7, 1922, and amended on April 9, 1924. As drawn up by Order in Council it was applied to contracts for building and construction operations, also to contracts for the manufacture of certain classes of Government supplies. The policy required that the current wage rates and working hours of the district should be observed in the case of all workmen employed, or if there were no current rates or hours in existence, then fair and reasonable conditions in both respects. Contracts for railway construction to which the Dominion Government has granted financial aid, either by way of subsidy or guarantee, are likewise subject to fair wages conditions. The policy has, moreover, been extended within recent years to cover contracts for works carried out by the several Harbour Commissions and aided by grants of public funds.

On May 30, 1930, an Act of Parliament was adopted, known as the Fair Wages and Eight Hour Day Act, 1930, which provides for the payment of current wage rates to all persons employed on contracts made with the Government of Canada for works of construction, remodelling, repair or demolition, provided that the wages in all cases shall be fair and reasonable. This statute also directed that the working hours of persons while so employed shall not exceed eight hours a day. It was further declared that the foregoing conditions are to be applied to all workmen employed by the Government itself on the construction, remodelling, repair or demolition of any work.

On Mar. 27, 1930, an Order in Council was passed providing that, except in cases where the work of employees was intermittent in character, or the application of the rule was not deemed to be practicable, or in the public interest, the hours of work of any Dominion Government employees who had up to that time been required to work more than eight hours daily should be reduced to eight hours a day, with a half holiday on Saturday.

An Order in Council was adopted on Dec. 31, 1934, rescinding the labour conditions previously applied to contracts for the manufacture of various classes of Government supplies, and substituting other conditions therefor. The provision for the payment of wages not less than current rates, or fair and reasonable rates if there are no current rates, is retained in the new conditions, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, 20 cents an hour. It is also declared that males and females under 18 years of age shall be entitled to rates of wages not less than those provided for women and girls in the minimum wage scales of the respective provinces, and that, in any cases where the provincial minimum wage laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Dominion contract work.

The Department of Labour is frequently consulted by other Departments of the Government regarding the wage rates to be observed in connection with work undertaken on the day-labour plan.

**Labour Gazette.**—A monthly publication, known as the *Labour Gazette*, has been issued by the Dominion Department of Labour since its establishment in 1900. It contains a monthly review of the industrial situation in Canada and of the state of employment, including reports of the operations of the Employment Service of Canada in the various provinces, also information relative to: labour

legislation, wage rates and hours of labour, wholesale and retail prices of staple commodities in Canada and other countries, labour disputes (including the proceedings under the Industrial Disputes Investigation Act), industrial accidents, legal decisions affecting labour, industrial training and technical education, proceedings under the Combines Investigation Act, and other matters of general or current industrial interest. The *Labour Gazette* is widely distributed throughout Canada, and the statistical and other information contained therein is constantly used in connection with wages and other issues between employers and workers. A subscription charge of 20c. per annum is made for this publication.

**Labour Legislation.**—Much attention is devoted to labour legislation. Information as to new laws enacted by the Dominion and the provinces is kept up to date, while notes or articles regarding their provisions are published in the *Labour Gazette*. Since 1917, the Department has published annual reports containing the text of Canadian labour laws enacted during each year, together with an introduction summarizing this legislation under subject headings. The first of these reports was based on Dominion and provincial labour legislation as existing at the end of 1915. Reports on the labour laws enacted in the four succeeding years were published in regular order. In 1920 a further consolidation was brought out and annual reports supplementary thereto were issued in 1921, 1922, 1923, 1924, 1925 and 1926. A third consolidated report on labour legislation, containing the texts of the Dominion and provincial labour laws up to the end of 1928, was issued in 1929. Annual supplements containing labour laws of subsequent years were issued in 1930 to 1933, respectively. The Department of Labour has also published articles dealing with various provincial labour laws, indicating the extent to which these have been standardized and the differences which exist.

### Section 3.—Provincial Labour Departments and Bureaus.

The rapid industrial development at the end of the nineteenth century in Quebec and Ontario, the leading manufacturing provinces, brought with it the recognition of the need of special provincial offices to safeguard the interests of labour, with the result that the Ontario Bureau of Labour was established in 1900 and the Quebec Department of Public Works and Labour in 1905. In 1904 an Act was passed in New Brunswick providing for a Bureau of Labour, but this never became operative. Some years later, to cope with conditions created by the growth of industry in the West, Acts were passed providing for the creation of Provincial Bureaus of Labour in Manitoba (1915), in Saskatchewan (1920), and in Alberta (1922), while a Department of Labour was established in British Columbia in 1917. A Department of Labour was established in Nova Scotia by c. 3 of the Statutes of 1932, and the Manitoba Bureau of Labour became a Department in 1934. All these authorities publish annual reports on their activities.

**The Nova Scotia Department of Labour.**—The Act establishing the Nova Scotia Department of Labour provides that "the Department of Labour shall take cognizance of all matters relating to labour and shall administer such affairs, matters, Acts and regulations as the Governor in Council from time to time assigns to that Department, whether or not the same have been assigned or have belonged by or under any Act of the Legislature of Nova Scotia or otherwise to some other Department or to some member of the Executive Council".

The Department is in charge of a Minister of Labour, who has under him a Deputy Minister of Labour. The latter is empowered to collect and publish information and statistics affecting labour, and to administer such Acts as may be assigned to the Department by Order in Council. At present, labour bureaus in the province and the administration of the Factories Act have been assigned by Order in Council to the Department of Labour.

**The Quebec Department of Labour.**—This Department was formerly known as the Department of Public Works and Labour, each division having a separate Deputy Minister, but in 1931, the Legislature raised each division to a distinct Department.

The duties of the Department of Labour include the institution and control of inquiries into important industrial questions and those relating to manufactures, and it may collect useful facts and statistics relating thereto, to be transmitted to the Quebec Bureau of Statistics. The Department is charged with the administration of provincial Acts respecting industrial and commercial establishments, trade disputes, and the maintenance of fair wages clauses in Provincial Government contracts. The Women's Minimum Wage Commission is under its jurisdiction, together with the provincial Employment Service.

The Department is responsible for the licensing and qualification of electricians, moving picture machine operators, stationary enginemen and firemen, and pipe mechanics; it is also charged with the inspection of electrical installations, heating installations, steam, hot-water and hot-air furnaces, boilers registered under the Interprovincial Code, together with the registering of blue prints in connection with the construction of boilers. A special branch of the Department is entrusted with the inspection of public buildings and the approval of the plans of new buildings.

The Department, since the 1934 Session, is charged with the enforcement of the Collective Labour Agreements Extension Act; however, it has not the duty of leading employers and employees into the preparation of agreements. The Department has jurisdiction over the limitation of hours of work; since the coming into force of the Act giving it such authority, hours of labour, in the building trades, have been limited to forty per week throughout the province.

The Department also issues qualification certificates to workmen charged with the use and handling of explosives, and is responsible for the enforcement of the Scaffolding Inspection Act in towns where there is no municipal service providing for such duties.

**The Department of Labour of Ontario.**—The Department of Labour of Ontario was established in 1919 and placed under the direction of a Minister and a Deputy Minister of Labour. This Department had its origin in the Bureau of Industries formed in 1882 under the Department of Agriculture, to collect and publish statistics relating to the industries of the province and (later) to administer the first Factory Act of 1886. In 1900 a Bureau of Labour, attached to the Department of Public Works, was authorized to collect and publish information relating to employment, wages and hours, strikes, labour organizations and general conditions of labour. Several investigations were made regarding such matters and the first free employment offices were opened by the Bureau of Labour. In 1916 this Bureau was in turn superseded by the Trades and Labour Branch, also under the Ministry of Public Works but administered by a Superintendent. The establishment of the Branch had been recommended by the Ontario Commission on

Unemployment and the expansion of the work undertaken by the Branch, and the increase in the demands made upon its resources led to the creation of a special Department of the Government by the Department of Labour Act, 1919.

The Department of Labour administers the following Acts: the Department of Labour Act; the Factory, Shop and Office Building Act; the Steam Boiler Act; the Operating Engineers Act; the Building Trades Protection Act; the Employment Agencies Act; the Apprenticeship Act; the Regulations respecting the Protection of Persons working in Compressed Air; the Regulations respecting the Protection of Persons working in Tunnels and Open Caissons; the Minimum Wage Act. The Department is required to maintain employment offices, to collect information respecting employment, sanitary and other conditions in work places, wages and hours of work, and to study labour legislation in other parts of the British Empire and in foreign countries, as well as any suggested changes in the labour laws of Ontario. The representatives of the Department of Labour have right of access to offices, factories and other work places at any reasonable hour, and may be authorized to hold inquiries under the Public Inquiries Act. The Department publishes annual reports which cover the work of the officers employed in the administration of the various Acts assigned to it. The Minimum Wage Act is administered by the Minimum Wage Board.

**Manitoba Department of Labour.**—The Act of 1915, establishing the Manitoba Bureau of Labour, provided that it be attached to the Department of Public Works; an amendment of 1922, however, provided for its attachment to any other Department as the Lieutenant-Governor in Council may determine. The Bureau was created a separate Department by c. 28 of the Statutes of Manitoba, 1931, but the Act was not proclaimed until July 6, 1934.

The Department is charged with the administration of the following Acts: the Bureau of Labour Act; the Manitoba Factories Act; the Bake Shop Act; the Shops Regulation Act; the Minimum Wage Act; the Elevator and Hoist Act; the Steam Boiler Act; the Building Trades Protection Act; the Public Buildings Act; the Fair Wage Act; the Electricians' License Act; the Amusements Act (Secs. 11 to 15); the One Day's Rest in Seven Act; the Employment Bureau Act.

**Saskatchewan Bureau of Labour and Public Welfare.**—This Bureau was created by an Act of 1934 to replace the Department of Railways, Labour and Industries. It is administered by the Minister of Municipal Affairs, assisted by a permanent Commissioner. The function of the Bureau is to administer matters relating to the relief of distress in addition to the following Acts: the Factories Act; the Building Trades Protection Act; the Employment Agencies Act; the One Day Rest in Seven Act; the Weekly Half-Holiday Act; the Coal Mines Safety and Welfare Act; the Minimum Wage Act, and the Workmen's Wage Act. It is also charged with the operation of public free employment offices; the collection and publication of information and statistics relating to employment; wages and hours of labour throughout the province; strikes and other labour difficulties; trade unions and labour organizations; the relations between capital and labour, and other subjects connected with industrial problems; the commercial, industrial and sanitary conditions of employment.

**Alberta Bureau of Labour.**—The Act of 1922, creating the Alberta Bureau of Labour, provided that the Bureau be in charge of a Minister having under him a Commissioner of Labour. The latter is empowered to collect and publish infor-

mation and statistics affecting labour, and to administer such Acts as may be assigned to the Bureau by Order in Council. Important among these Acts are: the Alberta Government Employment Bureau Act; the Minimum Wage Act; the Boilers Act; the Factories Act; the Theatres Act; the Trade Schools Act.

**The British Columbia Department of Labour.**—This Department was instituted by an Act of 1917, under a Minister and Deputy Minister of Labour. It administers the laws of British Columbia affecting labour, and is empowered to collect information respecting industries, wages, employment, prices, labour organizations and other data pertaining to labour problems. Prominent among the Acts administered by the Department are: the Male Minimum Wage Act 1934; the Female Minimum Wage Act 1934; the Hours of Work Act 1934; these are administered by the Board of Industrial Relations, the Deputy Minister of Labour being Chairman of the Board. Other activities of the Department include the administration of: the Semi-monthly Payment of Wages Act; the Factories Act; and the operation of employment bureaus within the Province.

#### Section 4.—Canada and the International Labour Organization.\*

The International Labour Organization of the League of Nations was set up in 1919 in accordance with Part XIII of the Treaties of Peace, to promote the improvement of industrial conditions by legislative action and international agreement.

The Organization comprises: the International Labour Conference, which meets annually and is composed of four representatives of each Member State, two of whom are government delegates, while two represent employers and workers respectively; and the International Labour Office in Geneva, which functions as a secretariat of the annual conference and also collects and publishes information on subjects relating to industrial life and labour. The Office is under the control of a Governing Body, consisting of 32 persons, appointed by the International Labour Conference, of whom 16 represent governments, 8 represent employers and 8 represent workers. In addition to its control of the Labour Office, the Governing Body is charged with the preparation of the agenda of the annual conference.

Under the terms of the Peace Treaties, eight of the government seats on the Governing Body are held by the countries of "chief industrial importance". Canada was designated by the Council of the League of Nations in 1922 as one of these eight States of "chief industrial importance". Sixty-two countries are members of the International Labour Organization, including the United States and Russia, which became members during the past year. In January, 1935, the list of eight states was revised by the Governing Body in order to permit of the inclusion of the United States and Russia. Canada and Belgium were called on to surrender their permanent seats at this time but were accorded the status of Deputy Members until the Governing Body is reconstituted in 1937. The present President of the Trades and Labour Congress of Canada is one of the eight workers' representatives on the Governing Body.

The conclusions of the International Labour Conference are cast in the form of draft conventions or recommendations, addressed to the national governments which comprise the membership of the International Labour Organization. A

\*On this subject see also the 1921 Year Book, pp. 607-609; 1922-23 Year Book, pp. 704-707; 1924 Year Book, pp. 666-670; 1925 Year Book, pp. 676-678; 1926 Year Book, pp. 679-681; 1927-28 Year Book, pp. 735-737; 1929 Year Book, pp. 725-727; 1930 Year Book, pp. 710-712; 1931 Year Book, pp. 753-755; 1932 Year Book, pp. 633-634; and 1933 Year Book, pp. 750-752.

two-thirds majority of the Conference is required for the adoption of either a draft convention or recommendation. Under the Treaties of Peace, the Member States are bound to bring the draft conventions or recommendations before the authority or authorities within whose competence the subject matter lies, for the enactment of legislation or other action. Thus the findings of the Conference only become binding in the various countries concerned if and when action regarding them is taken by the latter.

The Dominion Department of Labour is entrusted with the duties arising out of the relations of Canada with the International Labour Organization. These have entailed much correspondence, not only with the International Labour Organization but also with the different Departments of the Dominion Government, with the provinces, and with employers' and workers' organizations. Replies have also been prepared in the Department of Labour to various questionnaires issued by the International Labour Office. Performance of these duties has necessitated a close study of the different technical questions which have figured on the agenda of the various conferences and at the meetings of the Governing Body. A bulletin entitled "Canada and the International Labour Conference" has been issued by the Department of Labour, furnishing information respecting the International Labour Organization. Comprehensive articles dealing with the proceedings of the annual sessions of the International Conference have been published from year to year in the *Labour Gazette*. These articles contain the text of the various draft conventions and recommendations of the Conference.

Eighteen sessions of the International Labour Conference have been held. Forty-four draft conventions and 43 recommendations have been adopted at these annual gatherings. The draft conventions and recommendations of the Conference have, among other subjects, related to the following: hours of labour, measures for the avoidance of unemployment, employment conditions of women and children, employment conditions of seamen, employment in agriculture, weekly rest, statistics of immigration and emigration, principles of factory inspection, inspection of emigrants on board ship, workmen's compensation for accidents and occupational diseases, social insurance, minimum wages, prevention of accidents to dockers, forced labour, and regulation of hours of work of salaried employees and of workers in coal mines.

Up to Dec. 31, 1934, 636 ratifications of these conventions had been registered with the League of Nations, of which 11 were conditional or with delayed application; 27 had been approved by the competent national authority and 90 had been recommended to the competent national authority for approval.

**Canadian Action on Draft Conventions and Recommendations.**—The action taken by the Dominion and the Provincial Governments on the draft conventions and recommendations of the International Labour Conference has been summarized in the articles on this subject published in previous Year Books and referred to in the footnote on p. 809.

### Section 5.—Organized Labour in Canada.

The Dominion Department of Labour publishes an annual report on labour organization; this sets out the various branches of unionism in existence, the principles on which they are founded, their chief activities, and statistics of the different groups comprised in the trade unions of the Dominion. Reference is also made in this annual report to the principal international labour organizations with which the organized workers of Canada are affiliated.

Trade unionism in Canada occupies a unique position by reason of the fact that a large number of organized workers in the Dominion are members of organizations whose headquarters are located in a foreign country, *viz.*, the United States. In years gone by Canadian workmen who sought a livelihood in the United States greatly outnumbered those who came from that country to Canada. As industry was further developed in the United States there arose there a number of unions of various crafts, and with these the Canadian workers soon became affiliated. With the development of industry in the Dominion, many of these Canadians returned to their native land, bringing with them the gospel of trade unionism and collective bargaining as a means of protecting their rights. In many instances these trade unionists become the nuclei of strong bodies of organized workers formed in Canadian cities.

The usual résumé of the origin and growth of the trades union movement in Canada has been omitted in this edition, owing to considerations of space. The interested reader is referred to pp. 712-714 of the 1930 edition of the Year Book and to "Labour Organization in Canada, 1931", published by the Dominion Department of Labour. This latter publication presents the history and present organization of trades unionism in the Dominion in a very comprehensive manner. The following paragraphs give a short sketch of the present organization of the five main groups into which Canadian labour organizations now fall.

**Trades and Labour Congress of Canada.**—Through the initiative of the Toronto Trades Assembly (now the Toronto District Trades and Labour Council), the first national labour organization, the Canadian Labour Union, was formed in Toronto in September, 1873. This organization held its second and third annual meetings in 1874 and 1875, but disappeared as a result of the serious depression of the later '70's. In 1883 the Trades and Labour Council of Toronto, feeling the necessity of the wage-earners of Canada having a medium through which to express their opinions, assumed the responsibility of calling another trades and labour congress, which met in Toronto on Dec. 26, with 47 delegates. On the summons of the Toronto Council, a second meeting, with 109 delegates, assembled on Sept. 14, 1886, the first occasion on which any labour body outside of the province of Ontario was represented. A permanent organization was effected at this meeting under the name of "Trades and Labour Congress of the Dominion of Canada". This was the title of the organization until 1895, when the title "Trades and Labour Congress of Canada" was adopted in preference to "Canadian Federation of Labour". Since 1886 conventions have been held annually, the 1934 meeting in Toronto being counted as the 50th. The Trades and Labour Congress is representative of international trade unionism in the Dominion, the bulk of its membership being drawn from the international organizations which have local branches in Canada. According to reports for 1934, the Congress received payment of per capita tax on the Canadian membership of 60 international bodies and also from two national organizations which had their entire membership in the Dominion; the combined membership was 103,424, comprised in 1,523 local branches.

**All-Canadian Congress of Labour.**—The All-Canadian Congress of Labour was organized Mar. 16, 1927, by labour bodies not eligible for membership in the old established Trades and Labour Congress of Canada. One of the promoters of the new body was the Canadian Federation of Labour, which was formed as a result of the expulsion from the Trades and Labour Congress of Canada of Knights of Labour assemblies and all other unions which were composed of members of

crafts over which existing international organizations claimed jurisdiction. With the formation of the All-Canadian Congress of Labour the Canadian Federation passed out of existence. At the close of 1933, the All-Canadian Congress of Labour had eleven central bodies in affiliation, with a combined membership of 51,998, as well as 39 directly chartered local unions with a membership of 3,120, making a total combined reported membership of 55,118.

**Membership of International Organizations in Canada.**—At the close of 1933 there were 78 international craft organizations having one or more local branch unions in Canada, the same as the number recorded in 1932. These bodies among them had 1,753 local branches in the Dominion with 140,801 members. The membership of the two industrial unions with branches in the Dominion was 26,918 comprised in 54 branches. Thus the total international trade union membership in Canada at the close of 1933 was 167,719 (Table 4). The international *craft* organizations alone represent about 49 p.c. of the total of all classes of workers in the Dominion organized under trade union auspices as shown in Table 3.

**Canadian Central Labour Bodies.**—There are in Canada 34 Canadian central labour bodies, 21 of which are in direct opposition to the international organizations. In some instances these Canadian central labour bodies have been formed by secessionists from international unions. The combined membership of the Canadian central labour organizations on Dec. 31, 1933, was 76,062, comprised in 748 local branches (Table 5).

**Membership of Independent Units.**—There are 42 independent local labour bodies in the Dominion, 41 of which had a membership of 15,545 at the end of 1933.

**Federation of Catholic Workers of Canada.**—During the period when the Knights of Labour operated in Quebec, there existed also four independent unions, one of labourers and three of leather and shoe workers. Up to 1902 these several bodies were represented at the annual conventions of the Trades and Labour Congress of Canada. In that year, in an effort to eliminate a duplication of unions and bring the independent bodies under the banner of the international organizations, the Trades Congress denied them further representation. The Knights of Labour assemblies grandually disappeared, but the independent unions continued to exist. Up to the time of the expulsion by the Trade Congress of those bodies which were outside the ranks of the international organizations, there was only one Catholic union, that composed of shoe workers in the city of Quebec, which had accepted the social doctrine of the Roman Catholic Church and admitted a chaplain (a member of the clergy), this course being adopted in 1901 following the adjustment of a dispute in the shoe industry in that city by the archbishop of the diocese. Some years later, a number of other national unions were formed in the province of Quebec, all of which accepted for their guidance the declarations of Pope Leo XIII, who on May 15, 1891, issued an encyclical on "The Condition of the Working Classes", the provisions of which were subsequently proclaimed by Pope Pius X as fundamental rules for workingmen's associations. In 1918, a conference of national unions was held in Quebec city, followed by other meetings in Three Rivers in 1919 and Chicoutimi in 1920; the delegates at the latter conference, numbering 225 from 120 unions, decided to establish a permanent central body to co-ordinate the work of the scattered units. Accordingly, at the 1921 conference held in Hull, at which approximately 200 delegates representing 89 unions were present, a constitution to govern the new body was approved. The name selected was "Federation

of Catholic Workers of Canada" and permanent officers were elected, the constitution and by-laws becoming effective on Jan. 1, 1922. From information at hand, there are 110 National Catholic unions with a combined membership of 26,894.

**One Big Union.**—Delegates from Western Canada to the Quebec convention of 1918, dissatisfied with the alleged reactionary policy of the Trades and Labour Congress of Canada, held a caucus at which it was decided to concentrate their energies towards having the Trades Congress legislate in accordance with their views. Some months later a meeting of delegates was called by the British Columbia Federation of Labour to assemble immediately following the annual convention of that body, which, for the first time in its history, met outside of the province under its jurisdiction, in Calgary. The conference assembled on Mar. 13, 1919, with 239 delegates present; the outcome of the meeting was the formation of an industrial organization, the "One Big Union". On June 11, 1919, a conference of the new body was held in Calgary to further the plans of the organization, which had a membership of 41,150 at the close of 1919. From the outset the O.B.U. met with much opposition from the old-established labour unions, represented by the Trades and Labour Congress of Canada, which was opposed to the substitution of industrial unionism for the existing system of craft unions. According to information supplied by the general secretary, the O.B.U., at the close of 1933, had 47 units under charter, one of which was located in the United States, as well as two central labour councils (bodies similar to trades and labour councils), the combined reported membership being 23,640.

**Total Reported Membership of Organized Labour in Canada.**—The numerical strength of organized labour in Canada at the close of 1933 was given by the Department of Labour as follows: international organizations, 1,807 local branches with an aggregate membership of 167,719; Canadian central labour bodies, 748 branches and 76,062 members; independent units, 42 with 15,545 members; National Catholic unions, 110 with 26,894 members; grand total, 2,707 local branches and 286,220 members. As compared with 1932, this represents a decrease of 18 branches but a gain of 2,644 members. Table 3 shows by years the membership of trade unions in Canada since 1911.

3.—Membership of Trade Unions in Canada, 1911-33.

| Year.     | Members. | Year.     | Members. | Year.     | Members. |

## Section 6.—Fatal Industrial Accidents.

Statistics of fatal industrial accidents have been compiled by the Dominion Department of Labour since 1903, the data being obtained from provincial Workmen's Compensation Boards, the Board of Railway Commissioners for Canada and various other governmental authorities, from departmental correspondents and from press clippings. Table 6 shows the number of fatal industrial accidents reported to the Department during each year from 1930 to 1934 inclusive. The number of fatalities in each of the different industries is also shown as a percentage of the total number. Preliminary figures show 974 fatal industrial accidents in 1934.

<sup>1</sup> Figures subject to revision.

**Causes of Fatal Accidents.**—The classification of fatal accidents in 1934 by causes shows that the largest number, 282, came under the category "by moving trains, vehicles, etc.". This includes all accidents due to cars or engines, including mine and quarry cars, and to automobiles and other power vehicles and horse-drawn vehicles, as well as accidents caused by moving implements, by moving watercraft and by aircraft. Next in order as a cause came "falls of persons", 166 in number, including those who fell from some elevation and those who fell into pits, shafts, holds of vessels, harbours, rivers, etc. "Dangerous substances" including electric current, explosives, hot and inflammable substances, gas fumes, boiler explosions, etc., caused 128 fatalities. Fatalities numbering 142 were caused by falling objects. Animals caused 42 fatalities, including 23 caused by horses. Sixteen fatalities were caused by working machines, 20 by prime movers, 30 by striking against or being struck by objects, 30 by handling of heavy or sharp objects, 20 by hoisting apparatus, 2 by tools, 4 by infection, 35 due to industrial diseases, 6 by shooting and violence, 17 by cave-ins, and 21 by lightning, frost, storms and sunstroke.

Numbers of industrial accidents, fatal and non-fatal, dealt with by the various provincial Workmen's Compensation Boards are included in the following section on Workmen's Compensation in Canada.

## Section 7.—Workmen's Compensation in Canada.

An account of the development of workmen's compensation legislation in Canada from employers' liability legislation was given at pp. 744-746 of the 1927-28 Year Book, while a summary of the 1932 legislation with regard to workmen's compensation appears in the general sketch of labour legislation in Canada at pp. 844-849 of the current edition. Details regarding the operation of the various Workmen's Compensation Boards of the provinces are given below.

**Operations of the Workmen's Compensation Boards.—Nova Scotia.**—The Workmen's Compensation Act was passed in 1915 but only became effective on Jan. 1, 1917. During the eighteen years between that date and Dec. 31, 1934, 128,202 accidents were reported to the Board, of which 112,904 were compensated as per Table 7. Prior to Jan. 1, 1920, medical aid was only furnished in special cases.

<sup>1</sup>Revised since the publication of the 1933 Year Book.

**New Brunswick.**—The Workmen's Compensation Act of New Brunswick was passed in 1918. It extends to a wide range of industries, and is administered by a Board of three persons, levying assessments and paying benefits. For the sums paid out annually from 1920 as compensation and for medical aid see Table 8.

### 8.—Compensation Paid by the New Brunswick Workmen's Compensation Board, 1920-33.

| Year.     | Weekly Compensation. | Permanent Partial Disability. | Fatal.            |                       | Medical Aid.                      |                               | Permanent Total Disability Reserve. |

*Quebec.*—The Quebec Workmen's Compensation Commission was established in 1928 by authority of cc. 79 and 80 of the Statutes of that year. The Act was brought into force by proclamation on Mar. 22, 1928, operations of the Commission commencing as of Sept. 1, 1928. Under this Act, the Quebec Commission did not insure employers against their liability. On April 4, 1931, a new Act was enacted by the Quebec Legislature (21 Geo. V, c. 100), effective Sept. 1, 1931, providing for state insurance, practically along the same lines as the Workmen's Compensation Act of Ontario. This new Act was amended by 23 Geo. V, c. 98, enacted on Apr. 13, 1933. Table 9 shows the operations of the Quebec Commission from Sept. 1, 1928, to Dec. 31, 1933.

### 9.—Compensation Paid and Accidents Compensated by the Quebec Workmen's Compensation Commission, 1928-33.

*Ontario.*—Under the system operated by the Ontario Workmen's Compensation Board in Schedule 1, where the liability is collective, 24 classes of industries pay various percentages of their pay rolls annually to the Board and escape individual civil liability for accidents and certain specified industrial diseases. The percentage of pay roll collected by the Board is graded according to the degree of hazard in the occupation and ranged in 1934 from 10 cents per \$100 of pay roll in blue-printing to \$13.50 per \$100 in transportation of freight by aeroplane. The average for all classes was \$1.16 per \$100 of pay rolls which amounted to \$335,257,000. Certain

other industries under Schedule 2, including municipal undertakings, railways, car shops, telegraphs, telephones, etc., are made individually liable to pay the rates of compensation fixed under the Act. Employees of the Dominion or of the province, killed or injured in the discharge of their duty, are by special legislation placed on the same footing as those of private employers of the second class.

Statistics of the benefits awarded and the accidents to workers reported during the first 20 years of the operation of the Act appear in Table 10; 49,302 accidents were paid for during the year 1934 including: 190 cases of death, 14 of permanent total disability, 1,705 of permanent partial disability, 23,238 of temporary disability and 24,155 in which medical aid only was provided. These latter are all under Schedule 1, as medical aid in Schedule 2 cases and Crown cases is furnished directly by the employer.

<sup>1</sup> No provision for medical aid.

<sup>2</sup> Half year only.

*Manitoba.*—Under the Workmen's Compensation Act, effective Mar. 1, 1917, Part 1 of the Act, dealing with workmen in hazardous occupations, is administered by the Workmen's Compensation Board, which charges insurance rates according to the hazard of the industry, the sums received by the workman being in lieu of the rights of action previously existing. The province, the city of Winnipeg, and certain corporations operating public utilities are permitted by the law to practise self-insurance.

From the date of the coming into force of the Act to Dec. 31, 1933, the Board dealt with 89,957 compensable accidents and paid out \$12,137,105 for compensation and medical aid. Of the accidents in 1933, 2,655 involved medical aid costs only, 2,680 involved temporary and 160 permanent disability, while 10 resulted in death (Table 11).

*Saskatchewan.*—The Workmen's Compensation (Accident Fund) Act became fully effective July 1, 1930, and covers practically all employees in the province except railway employees engaged in the running trades, casual workers, farm and ranch labourers, domestic and menial servants, janitors, retail store employees, and persons who cannot be classed as workmen.

The Act is administered by a Board of three and imposes compulsory collective liability on the employers covered. The schedule of benefits is similar to that provided by other compensation Acts. Table 12 shows the number of accidents and benefits paid to the end of 1933.

<sup>1</sup> Six months.

*Alberta.*—The Workmen's Compensation Act of 1918 became effective Aug. 1, 1918, as regards mining, and Jan. 1, 1919, in respect of almost all industries except agriculture, railroading and the operation of retail stores and offices. Railroading (except for the running trades) was brought within the scope of the Act in 1910, and a further amendment in 1928 left only conductors and trainmen exempt from the operations of the Act.

Table 13 shows the operations of the Board for the calendar years 1921 to 1933. Of the 8,160 accidents reported in 1933, 21 were fatal and 57 resulted in some permanent injury. The amounts shown below do not include sums transferred to the pension fund, which had assets amounting to \$2,842,089 on Dec. 31, 1933, nor do they include administration expenses nor sums set aside to cover estimated liabilities.

*British Columbia.*—The Workmen's Compensation Act, effective Jan. 1, 1917, provides compulsory accident insurance in almost every industrial occupation carried on in the province, protecting in 1933 approximately 120,000 employers with a pay roll of almost \$110,000,000. Insurance rates levied against employers are graded according to the hazard of the industry. All employers under the Act are required in addition to deduct one cent per day or part thereof from the wages of employees and to remit this money to the Board to the credit of the medical aid fund, which provides all necessary medical and surgical and hospital expenses for injured employees. For figures see Table 14.

### Section 8.—Strikes and Lockouts.

Statistics of strikes and lockouts in Canada have been collected by the Dominion Department of Labour since its establishment in 1900. Table 15 shows the numbers of disputes, of employees involved in disputes, and the time loss in working days for each year from 1911 to 1934 and the totals for the period beginning 1901. The items in the columns headed "time loss in working days" in the tables following are calculated by multiplying the number of persons directly involved in strikes and lockouts by the number of working days they are so affected during the time the disputes are in existence. Tables 16 and 17 give detailed analyses, by provinces and by industries, for 1933 and 1934.

Summary tables of the figures with details as to strikes and lockouts during 1934 will be found in the *Labour Gazette* for February, 1935, pp. 105-129.

**Industrial Disputes in Recent Years.**—During 1933 and 1934 there were increases in the number of disputes, in the number of workers involved and also in the time loss as compared with any year during the period 1926 to 1932, when the figures were relatively low, largely because there were then no coal-mining disputes involving large numbers of workers for long periods. In the last two years there was a considerable increase in the number and importance of disputes in industries other than coal mining, including important strikes in clothing manufacturing, in logging, sawmilling and woodworking. The number of disputes in 1934 was 191 as compared with 125 in 1933, while the number of workers involved was 45,800 as compared with 26,558 in 1933, the time loss being 574,519 man working days as compared with 317,547 in 1933. Table 15 includes figures regarding coal mining and industries other than coal mining.

#### 15.—Strikes and Lockouts in Canada, calendar years 1911-34.

NOTE.—For the years 1901-10, see the 1933 Year Book, p. 763.

| Year. | Coal Mining.                                 |                             |                            | Industries other than Coal Mining.           |                             |                            | All Industries.               |                        |                             |                            |

<sup>1</sup>Figures for disputes extending over the end of a year are here counted more than once. <sup>2</sup>The totals are for the whole period of record, 1901-34.

Table 16 is a record of industrial disputes by provinces for the years 1933 and 1934. In 1933 the most important disputes were: in Ontario, in logging and in textile and clothing; in Quebec, in the clothing industry and in furniture manufacturing; in British Columbia, in logging; and in Nova Scotia in coal mining. In 1934 important disputes occurred in Ontario in clothing factories, also in fur, shoe and furniture factories, in British Columbia in logging, in Quebec in clothing factories, in Manitoba in metal mining and in clothing factories, and in Nova Scotia in coal mining.

## 16.—Strikes and Lockouts, showing Number of Workers Involved and Time Loss, by Provinces, calendar years 1933 and 1934.

<sup>1</sup>Non-ferrous smelting is included with Mining; erection of all large bridges is under Bridge Construction; water service is under Public Administration.

**Causes and Results of Industrial Disputes.**—During 1933 and 1934, as in previous years, most of the disputes (92 and 139 respectively) were in regard to wages, or wages and working conditions. In 1934 there were only 10 strikes against decrease in wages, whereas in 1933 there were 20. A number of disputes were in regard to trade unionism, 35 in 1934 and 21 in 1933, as compared with 26 in both 1932 and 1931. In both years slightly over half of the disputes were terminated by direct negotiation between the parties, over one-quarter by the return of workers or their replacement, and about one-eighth of the disputes by conciliation.

## Section 9.—Employment and Unemployment.

### Subsection 1.—Operations of the Employment Service of Canada.

**Employment Service of Canada.**—Under Sec. 3 of The Employment Offices Co-ordination Act (c. 57, R.S.C., 1927), an Act passed by the Dominion Parliament in May, 1918, the Minister of Labour is empowered:—

"(a) to aid and encourage the organization and co-ordination of employment offices and to promote uniformity of methods among them;

"(b) to establish one or more clearing houses for the interchange of information between employment offices concerning the transfer of labour and other matters;

"(c) to compile and distribute information received from employment offices and from other sources regarding prevailing conditions of employment".

The Act further provides that certain sums of money are to be appropriated annually and paid to the provinces on a basis proportionate to the amount that each expends on the maintenance of employment offices.

The desired uniformity and co-ordination of employment office activities throughout the various provinces are obtained by having the Dominion's payments contingent upon an agreement ensuring that the provinces, in the conduct of their employment offices, shall endeavour to fill situations in all trades and occupations for both men and women, and that no charge shall be made to employers or employees for this service. Each province agrees to maintain a provincial clearance system in co-operation with the interprovincial clearance system established by the Dominion Government, in order to secure the necessary mobility of labour as between localities in the same province or in different provinces. For the fiscal year 1934-35, agreements were concluded with all of the provinces except Prince Edward Island. Thus is formed the Employment Service of Canada—a chain of employment offices reaching from Halifax to Vancouver. At the time the Act came into force only 12 provincial employment offices were operated in Canada. This number was steadily increased until, at the close of 1919, due to the impetus given by the Employment Offices Co-ordination Act together with the requirements of the demobilization period, offices were functioning at 84 different centres. Subsequent contractions have reduced the Service to offices permanently located at 65 centres (on Dec. 31, 1934), distributed by provinces as follows: Nova Scotia, 3; New Brunswick, 4; Quebec, 7; Ontario, 26; Manitoba, 3; Saskatchewan, 9; Alberta, 5; and British Columbia, 8.

**Employment Service Council of Canada.**—An Order in Council, issued in 1918 in pursuance of the Act, provided for the formation of a body to be advisory to the Minister of Labour in the administration thereof. This body, known as the Employment Service Council of Canada, is composed of representatives of the Dominion Departments of Labour and of Pensions and National Health, the Provincial Governments, the Canadian Manufacturers' Association, the Canadian Construction Association, the Trades and Labour Congress of Canada, the Railway Association of Canada, the Railway Brotherhoods, the Canadian Lumbermen's Association, the Canadian Council of Agriculture and the returned soldiers. At the eleven meetings of the Council, the most recent of which was held on Aug. 21-22, 1930, various recommendations and suggestions relative to employment office administration were brought forward and presented to the Minister.

**Operations of Employment Offices.**—Statistics covering the work of the local offices are collected and tabulated by the Employment Service Branch of the Department of Labour. Table 18 shows the positions available, applications for

work and placements effected by the Service in each year since 1920 for the Dominion, and for the years 1933 and 1934 by provinces. During 1934 there were 724,365 applications for employment, 427,792 vacancies and 406,091 placements recorded, as compared with 674,221 applications, 369,685 vacancies and 352,097 placements in 1933. About 45 p.c. of the total placements were of a casual nature, many of these being the result of work given on a rotation basis by municipalities and provincial governments on various relief schemes throughout the year to persons who, otherwise, would have been unemployed.

**Reduced Railway Fares.**—In order to facilitate the movement of labour in cases where there were not enough workers in any one locality to fill the available vacancies, the Employment Service, by special arrangement with nearly all the members of the Canadian Passenger Association, has been granted the privilege of issuing certificates which entitle the bearers to purchase railway tickets at the reduced rate of 2.7 cents per mile. This rate is for a second class ticket and is applicable only to fares of not less than \$4. During 1933, 3,850 certificates were issued, 2,694 to persons proceeding to points within the same province as the despatching office and 1,156 to workers going to points in other provinces. During 1934, 7,961 certificates for special rates were granted, 5,972 to persons travelling to employment within the same province as the despatching office and 1,989 to persons for whom employment had been secured in other provinces.

**18.—Applications for Employment, Positions Offered and Placements Effected by the Employment Service of Canada, 1920-34, and by Provinces, 1933 and 1934.<sup>1</sup>**

<sup>1</sup>Figures by provinces for the years 1920-25 will be found at p. 703 of the 1926 Year Book, for 1926-28 at p. 731 of the 1930 Year Book, for 1929-30 at p. 773 of the 1931 Year Book and for 1931-32 at p. 768 of the 1933 Year Book.

### Subsection 2.—Unemployment as Reported by Trade Unions.

Monthly statistics on unemployment are compiled and published by the Employment Service Branch of the Dominion Department of Labour, based on returns received from 1,700 local trade unions having an aggregate membership of nearly 156,000 workers. "Unemployment" as here used means involuntary idleness, due to economic causes. Persons engaged in work other than their own trades, or idle because of illness, are not considered as unemployed, while unions involved in industrial disputes are excluded from the tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentages of unemployment are based, it should be understood that the figures for each month have reference only to the reporting organizations. Table 19 is a record of unemployment in trade unions, for the past 20 years, by provinces. The maximum of unemployment in 1934 was in January, when the percentage stood at 21.2; in 1933 the January figure of 25.5 p.c. constituted the maximum. In 1933 the minimum, reached in both September and October, was 19.8 p.c., while the 1934 low was 16.2 p.c. recorded in October. Employment among organized workers, as indicated by these statistics, was more active on the average in 1934 than 1933, the average of the monthly figures of unemployment for 1934 being 18.2 p.c., while for 1933 the corresponding figure was 22.3 p.c.

### 19.—Percentages of Unemployment in Trade Unions, by Provinces, half-yearly, 1915-32, and by months, 1933 and 1934.

NOTE.—For the percentages of unemployment for 12 months in 1921 and 1922, see p. 732 of the 1922-23 Year Book; for 12 months in 1923, p. 688 of the 1924 Year Book; for 12 months in 1924, p. 700 of the 1925 Year Book; for 12 months in 1925, p. 704 of the 1926 Year Book; for 12 months in 1926, p. 757 of the 1927-28 Year Book; for 12 months in 1927, p. 745 of the 1929 Year Book; for 12 months in 1928 and 1929, p. 733 of the 1930 Year Book; for 12 months in 1930, p. 774 of the 1931 Year Book; for 12 months in 1931, p. 651 of the 1932 Year Book, and for 12 months in 1932, p. 769 of the 1933 Year Book.

**Subsection 3.—Employment as Reported by Employers.**

The Dominion Bureau of Statistics tabulates monthly reports of the numbers employed by firms having 15 or more persons on their staffs; the returns are representative of practically every industry except agriculture and the more specialized business and professional callings. During 1934 about 8,700 of these employers reported an average working force of 893,653 persons, varying from 821,131 on Jan. 1, to 941,165 at the beginning of July. The general recovery in industrial activity, in evidence from the second quarter of 1933, continued with considerable force in 1934. The fluctuations in the latter differed from those of the preceding year, but the gains then made were consolidated and extended, with the result that employment in 1934 was in greater volume than in either 1933 or 1932. A significant feature of the situation during 1934 was the widespread nature of the revival, in

which all five economic areas, the leading industrial cities and the principal industries shared to a greater or less degree.

Works undertaken for the relief of unemployment continued to be an important factor during 1934, when the number of man-days worked on a wage basis, as reported to the Dominion Unemployment Relief Commissioner by Dominion and provincial authorities, was 8,749,940; there were also 9,557,862 man-days relief work afforded in publicly operated camps where the unemployed were cared for and given useful work in return for subsistence and a small cash allowance. During 1933, the man-days worked on a wage basis numbered 1,643,111, and the number of man-days relief work afforded on a subsistence basis was 9,714,701.

The fluctuations in employment in the past nine years are illustrated in the following chart. This shows the generally upward movement that characterized industrial activity in the twenty months from the low point of employment in the depression on Apr. 1, 1933, to the close of 1934.

**Employment by Economic Areas.**—The recovery in industrial activity during 1934 extended to all five economic areas, but to a varying extent; the situation at the close of the year was decidedly better in each of the districts than it had been at the opening of 1934, and also than it was at the end of 1933. The greatest proportional gain between the 1934 low and high points occurred in Ontario, where the index, at its maximum of 109.9 on July 1, was 18.7 points higher than the minimum of 91.2 recorded on Jan. 1. Employment in all five economic areas was greater, on the average, in 1934 than in the preceding twelve months. Table 20 is a record of employment in the five economic areas, by months, in 1933 and 1934, with averages for preceding years since 1921.

**20.—Index Numbers of Employment as Reported by Employers in Economic Areas, as at the First of each Month, January, 1933, to December, 1934, with Yearly Averages since 1921.**

NOTE.—These indexes are calculated upon the average for the calendar year 1926 as 100. The relative weight shows the proportion of employees reported in the indicated economic area to the total reported by all employers making returns in Canada on Dec. 1, 1934.

| Relative weights of employment in economic areas, as at Dec. 1, 1934 <sup>1</sup> ..... | 8.2                    | 28.5         | 42.2         | 12.8                  | 8.3                  | 100.0        |

<sup>1</sup> Since the average for the calendar year 1926, including figures up to Dec. 31, 1926, is the base used in computing these indexes, the average index here given for the 12 months Jan. 1-Dec. 1, 1926, generally shows a slight variation from 100. <sup>2</sup> Percentages of Dominion total.

**Employment by Cities.**—Separate tabulations are made for the eight leading industrial centres, of which Montreal, Toronto, Ottawa, Hamilton, Windsor\*, Winnipeg and Vancouver reported improvement in 1934, while in the eighth—Quebec city—the index averaged the same as in 1933. It is of significance that the recovery in the cities has generally been at a slower rate than in the Dominion as a whole. This is partly accounted for by the concentration of single homeless unemployed men in publicly-maintained construction camps outside the municipi-

\*Includes adjacent "Border Cities".

palities. The unusually large gains in industries ordinarily operated in the rural areas, such as mining, logging, lumbering and canning, also contributed to the disparity in the increase in the cities as compared with the Dominion as a whole. Still other factors are the forces, legislative and other, which operate to maintain wages in the cities at a relatively higher level than in towns and villages, thus tending to hasten recovery in the smaller centres at the expense of the larger units of population, where taxes, rents, etc., are necessarily higher. Table 21 gives monthly indexes in the cities in 1933 and 1934, with yearly averages since 1922.

**21.—Index Numbers of Employment as Reported by Employers in Leading Cities, as at the First of each Month, January, 1933, to December, 1934, with Yearly Averages since 1922.**

NOTE.—These indexes are calculated upon the average for the calendar year 1926 as 100. The relative weight shows the proportion of employees reported in the indicated city to the total reported by all employers making returns in Canada on Dec. 1, 1934.

| Relative weights,<br>by cities, as at<br>Dec. 1, 1934 <sup>3</sup> ..... | 13.9      | 1.3     | 12.7     | 1.4     | 3.0       | 1.1                   | 4.0       | 3.0        |

<sup>1</sup> Since the average for the calendar year 1926, including figures up to Dec. 31, 1926, is the base used in computing these indexes, the average index here shown for the 12 months Jan. 1-Dec. 1, 1926, generally shows a slight variation from 100. <sup>2</sup> Includes adjacent "Border Cities". <sup>3</sup> Percentages of Dominion total.

**Employment by Industries.**—An analysis of the returns by industries shows widespread improvement in 1934 as compared with the preceding year. Manufacturing, logging, mining, construction and maintenance, services and trade recorded the most important gains, while among the chief industrial groups only communications showed a decline in comparison with the statistics for 1933. Within the manufacturing division, there were especially pronounced advances in the lumber, rubber, textile, clay, glass and stone, electrical apparatus, iron and steel, non-ferrous metal and miscellaneous manufactures. Table 22 gives index numbers of employment by main industrial groups.

**22.—Index Numbers of Employment as Reported by Employers, by Industrial Groups, as at the First of each Month, January, 1933, to December, 1934, with Yearly Averages since 1921.**

NOTE.—These indexes are calculated upon the average for the calendar year 1926 as 100. The relative weight shows the proportion of the employees reported in the indicated industry to the total reported by all employers making returns in Canada on Dec. 1, 1934.

<sup>1</sup> Since the average for the calendar year 1926, including figures up to Dec. 31, 1926, is the base used in computing these indexes, the average index here given for the 12 months Jan. 1-Dec. 1, 1926, generally shows a slight variation from 100. <sup>2</sup> Percentages of Dominion total.

#### Subsection 4.—Unemployment Relief.

The assistance rendered by the Dominion Government under The Unemployment Relief Act, 1930, The Unemployment and Farm Relief Act, 1931, and The Relief Act, 1932, is fully set out in the Canada Year Books for the years 1931, 1932, and 1933 respectively. The recapitulation appearing at the end of this statement shows the Dominion's disbursements under those statutes as at Jan. 31, 1935.

**The Relief Act, 1933.**—The Relief Act, 1933, which received Royal Assent on Mar. 30, 1933, was enacted at the fourth session of the 17th Parliament. The administration of the Act was, by Order in Council, vested in the Minister of Labour.

Pursuant to the terms of the agreements entered into between the Dominion and the provinces, the Dominion continued under the 1933 Act to contribute to the expenditures of the provinces for direct relief, the contribution to organized municipalities being  $33\frac{1}{3}$  p.c., with equal contributions from the province and municipality concerned. In the case of unorganized territory, the Dominion continued to pay 50 p.c. of the provincial expenditures for direct relief. In the four western provinces, the Dominion also continued to contribute to the care of homeless unemployed persons, the contribution of the Dominion being 20 cents per day per individual cared for in camps and urban centres, and \$5 per month for each individual placed on a farm.

Under the agreements contributions were also made by the Dominion for approved work in connection with the construction of the Trans-Canada Highway and also for provincial roads and undertakings and work carried out by municipalities. Relief works in the National Parks were continued by the Department of the Interior, while the Department of National Defence continued to operate camps throughout the Dominion for the care of single homeless unemployed men.

The extent of the Dominion's expenditures under The Relief Act, 1933, as at Jan. 31, 1935, is indicated in the recapitulation of relief expenditures shown in Table 23 at the end of this summary.

**The Relief Act, 1934.**—At the fifth session of the 17th Parliament, The Relief Act, 1934, which received the Royal Assent on April 20, 1934, was enacted. The administration of the Act was, by Order in Council, vested in the Minister of Labour.

Under this statute the Dominion continued contributing to the direct relief expenditures of the provinces and municipalities to July 31, 1934, on a similar basis to that in effect under the Relief Act, 1933.

The agreements with the provinces under the Relief Act, 1934, provide that from July 31, to Mar. 31, 1935, the Dominion's contribution for the relief of necessitous persons be made in the form of monthly grants-in-aid. In addition to the monthly grants-in-aid, provision is made for carrying to completion with

Dominion assistance such undertakings under the 1933 agreements as had not been completed by Mar. 31, 1934, and which the province concerned has requested should be so completed. Provision is also made for continued Dominion assistance to construction on the Trans-Canada Highway.

As outlined in the Canada Year Book, 1933, agreements were completed under the provisions of the Relief Act, 1932, with all the provinces except Prince Edward Island, providing for a non-recoverable expenditure of one-third of an amount not to exceed \$600 per family for the purpose of providing a measure of relief to self-sustaining families who would otherwise be in receipt of direct relief, by placing such families on the land. It was provided that the remaining two-thirds of the expenditure should be contributed by the province and the municipality concerned. The agreements covered a period of two years and expired on Mar. 31, 1934.

Under the provisions of the Relief Act, 1934, agreements, effective from April, 1934, to Mar. 31, 1936, providing continuity of settlement with the agreements which expired Mar. 31, 1934, were entered into with all the provinces excepting Prince Edward Island and British Columbia. Provision is made in the new agreements for an additional non-recoverable contribution by the Dominion, on the recommendation of the province and with the approval of the Governor in Council, of one-third of an amount not exceeding \$100 in the case of a settler who may not be self-supporting at the end of the two-year period, and for whose subsistence expenditure during the third year of settlement is deemed necessary. This additional amount for subsistence during the third year applies where necessary both to those settled under the 1932 agreements and those settled under the 1934 agreements.

Reports received from the provinces indicate that as at Jan. 31, 1935, there have been approved and settled under both the 1932 and 1934 agreements 4,002 settler families, while the total number of individuals settled under the scheme aggregate 21,030.

In the Prairie Provinces the Dominion undertook again to provide for the placement of single homeless unemployed persons on farms and contributed to those provinces in this respect \$5 per month for each individual so placed. In addition the Dominion has agreed, under the 1934 Act, to continue contributing to certain special measures in the dried-out areas of the Prairie Provinces.

Continued operation of camps for single homeless persons by the Department of National Defence at various points throughout Canada, also the special relief works carried out in the National Parks by the Department of Interior for the care of single homeless persons and unemployed residents of the parks, are other measures being carried out by the Dominion under the provisions of the Relief Act, 1934.

Table 23 sets forth the Dominion's disbursements under relief legislation from 1930 to Jan. 31, 1935.

## 23.—Recapitulation of Dominion Disbursements under Relief Legislation as at Jan. 31, 1935.

| Province, etc.                          | 1930 Act.         | 1931 Act.         | 1932 Act.         | 1933 Act.         | 1934 Act.                         |                                      | Total.             |
|-----------------------------------------|-------------------|-------------------|-------------------|-------------------|-----------------------------------|--------------------------------------|--------------------|
|                                         |                   |                   |                   |                   | On Expenditures to Mar. 31, 1934. | On Expenditures after Mar. 31, 1934. |                    |

## Subsection 5.—Employment and Unemployment Statistics of the Census.

In the 1933 edition of the Year Book pp. 775-780 were devoted to an examination of the preliminary figures of unemployment as reported at June 1, 1931, for that date and for the preceding twelve months. The final results of this enquiry are available in Vol. 6 of the Census Publications, which may be obtained from the King's Printer, Ottawa, at a price of 75 cents for the paper-bound volume.

Tables 24 and 25, supplementing information given by provinces at pp. 775-780 of the 1933 Year Book, summarize by industries the statistics of those actually unemployed at the date of the Census, and of time lost during the twelve months preceding that date. It will be noted in Table 25 that the unemployment was most serious in forestry, fishing and trapping, in construction and in the unspecified group, including largely general labourers.

**24.—Wage-Earners, 10 Years of Age and Over, and Numbers Not at Work on June 1, 1931, According to Industrial Group and Sex, and Percentages of Total Wage-Earners Not at Work in Each Group.**

| Industrial Group.             | Totals, Wage-Earners. |                  |                | Numbers Not at Work. |                |               | Percentages Not at Work. |              |             |

## Section 10.—Old Age Pensions.

**The Old Age Pensions Act, 1927.**—Legislation respecting Old Age Pensions (R.S.C., 1927, c. 156) was adopted by the Dominion Parliament in 1927. Under the provisions of this statute the Dominion Government reimbursed each province participating in the Dominion scheme to the extent of one-half of the provincial expenditure for old age pensions. An amendment passed at the 1931 session of Parliament (c. 42, Statutes of 1931) provided that the Dominion contribution to the provinces be increased from 50 p.c. to 75 p.c. of the provincial disbursements for old age pensions pursuant to a provincial statute authorizing and providing for the payment of such pensions to the persons and under the conditions specified in the Act and the regulations made thereunder. Following the enactment of the amendment to the Dominion Act, the Dominion Old Age Pensions Regulations were revised and agreements negotiated with the provinces whereby the Dominion contribution of 75 p.c. of provincial disbursements was made effective from Nov. 1, 1931; the provinces have since been reimbursed on this basis.

Sec. 5 of the Act provides that before any such agreement is made with the province, the scheme for the administration of pensions proposed to be adopted by the province shall be approved by the Governor in Council, and that no change in such scheme shall be made without the consent of the Governor in Council.

Sec. 8 reads as follows:—

- (1) Provision shall be made for the payment of a pension to every person who, at the date of the proposed commencement of the pension:—
- (a) is a British subject, or, being a widow, was such before her marriage;
  - (b) has attained the age of seventy years;
  - (c) has resided in Canada for the twenty years immediately preceding the date aforesaid;
  - (d) has resided in the province in which the application for pension is made for the five years immediately preceding the said date;
  - (e) is not an Indian as defined by the Indian Act;
  - (f) is not in receipt of an income of as much as three hundred and sixty-five dollars (\$365) a year, and
  - (g) has not made any voluntary assignment or transfer of property for the purpose of qualifying for a pension.
- (2) The receipt of a pension shall not by itself constitute a disqualification from voting at any provincial or municipal election.

Sec. 9 provides that the maximum pension payable shall be \$240 yearly, subject to reduction by the amount of the income of the pensioner in excess of \$125 a year. The pension authority may accept a transfer of the pensioner's interest in a dwelling house in which he resides, in which case the value of the dwelling will not be computed in calculating the amount of pension payable. The pension authority is entitled to recover out of the estate of any deceased pensioner the amount of pension payments with interest at 5 p.c., subject to the limitation that no claims shall be made for such recovery out of any part of the estate which passes by will or intestacy to any other pensioner or to any other person who has contributed, since the grant of the pension or for the last three years during which the pension has been paid, to the pensioner's support.

Secs. 10, 12, 13 and 14 provide for the distribution of the pension burden among the provinces where the pensioner has resided during the 20 years immediately preceding the grant of the pension. Sec. 11 provides for a reduction of pension where a pensioner has resided for a portion of the 20 years in a province with which no agreement is in force. Sec. 15 provides for a suspension of the pension where a pensioner has transferred his residence to some place out of Canada. It is provided by Sec. 16 that a pension shall not be subject to alienation or transfer by the pensioner or to seizure in satisfaction of any claim against him.

The Governor in Council was empowered by Sec. 19 of the Act to make regulations pursuant to this section. Existing regulations were revised and approved by an Order in Council dated Feb. 1, 1932.

During 1933 the provinces of Prince Edward Island and Nova Scotia entered into agreements with the Dominion Government whereby old age pensions became payable in Prince Edward Island as from July 1, 1933, and in Nova Scotia as from Mar. 1, 1934. The Dominion Old Age Pensions Act is now operative in seven of the nine provinces, namely—Alberta, British Columbia, Manitoba, Nova Scotia, Ontario, Prince Edward Island and Saskatchewan, as well as in the Northwest Territories.

The New Brunswick Legislature, at its 1930 session, passed an Old Age Pensions Act, to come into force on a day to be fixed by proclamation. The Gold Commissioner of Yukon was given authority, by a Yukon Territorial Council Ordinance passed in 1927, to enter into an agreement with the Dominion Government for the purpose of obtaining the benefit of the Old Age Pensions Act for residents in the territory. No proposed scheme of administration for adoption in Yukon has been submitted for the approval of the Governor in Council. At present Quebec is the only province which has not enacted old age pensions legislation and, under the terms of the Dominion Act, is therefore ineligible to enter into agreement with the Dominion Government to obtain the benefit of the provisions of the Dominion Act.

Table 26 is a financial summary of old age pensions in Canada as at the end of the calendar year 1934. The total payments in the last quarter of that year were \$5,825,099.

**26.—Financial Summary of Old Age Pensions in Canada, by Provinces, as at Dec. 31, 1934.**

## Section 11.—The Co-operative Movement in Canada.

A general article on "The Co-operative Movement in Canada" appeared at pp. 704-720 of the 1925 edition of the Year Book under the three sub-headings of "Consumers' Co-operation", "Co-operative Credit", and "Producers' Co-operation".\* Because of the pressure upon space, this article is not reprinted here, but a digest of the latest available material on each of these three sub-divisions of co-operation follows, the presentation of producers' co-operation being confined to that among agricultural producers.

### Subsection 1.—Consumers' Co-operation.

The co-operative store was first introduced into Canada by miners who had had experience of co-operation in the United Kingdom. The first co-operative store was opened at Stellarton, N.S., in 1861, and continued to do business until 1916. Many similar ventures were afterwards commenced, but a considerable number failed through their neglect to build up adequate reserve funds. In 1909 the Co-operative Union of Canada was formed, with six affiliated societies and 1,595 members; since October, 1909, it has published a monthly, *The Canadian Co-operator*, from which the following statistics (Table 27) showing the growth of consumers' co-operation in the societies affiliated with the Co-operative Union have been taken.†

\*The article referred to above was prepared for the Year Book by Miss Margaret Mackintosh, M.A., of the Department of Labour, Ottawa.

†For details regarding the Co-operative Union of Canada and its activities, see the 1925 Year Book, pp. 708-709.

### 27.—Statistics of Co-operative Societies Affiliated with the Co-operative Union of Canada, 1909-33.

<sup>1</sup> The decrease in membership is accounted for by the withdrawal of the United Farmers of Canada, Saskatchewan Section, Ltd., and the United Grain Growers, Ltd., the non-inclusion of the latter society being also mainly responsible for the decreases in the figures shown in the remaining columns.

The progress shown by the returns from the societies affiliated with the Co-operative Union does not represent the whole growth of the consumers' co-operative movement in Canada. Although the societies affiliated with the Co-operative Union are among the oldest and best established, there is a larger number of consumers' co-operative societies outside the Union than within it, the great majority of these being in the western provinces. In 1926, the Manitoba Co-operative League was organized to link up the co-operative societies in that province, and a similar organization was formed in Alberta in 1923. In Saskatchewan a conference of representatives of co-operative societies has been held annually since 1923.

### Subsection 2.—Co-operative Credit in Quebec.

A form of co-operation which has achieved great success is that which provides short-term credit for small farmers and industrial workers in the province of Quebec. In 1900, what are known as "Les Caisses Populaires", or People's Banks, were begun with the establishment, by the late Alphonse Desjardins, of La Caisse Populaire at Lévis. M. Desjardins adopted the principles of lending money only for approved purposes to carefully selected members in a restricted area, of limited liability, of withdrawable shares of small amount payable by instalments, and of distribution of profits. These banks are for the most part established in agricultural districts. Loans are made to purchase agricultural implements at cash prices, to increase farm live stock, to improve farm buildings, to tide over a period of depression, to pay off a merchant and for various similar purposes. The loans, though comprised within the term "short credit", are for longer periods than are usual in ordinary commercial transactions because agricultural operations necessarily extend over longer periods than those of trade. They may be for 12, 15, or even 24 months, because they must give time for the farmer to realize on his products.

Details of organization may be found in the Statistical Year Book of Quebec, in the 1933 edition of which may be found statistics of the system as a whole, together with complete information of the working of each individual bank, including such details as number of members and depositors, rates of interest paid, loans made and profits realized, classification of size of loans, receipts and expenses and a résumé of chief operations from 1915 to 1932.

Table 28 shows the progress of these banks by quinquennial years from 1915 to 1930 and annually since then.

28.—Progress of Co-operative People's Banks in Quebec, 1915-33.

| Year.     | Banks Reporting. | Members. | Depositors. | Borrowers. | Loans Granted. | Value of Loans Granted. | Profits Realized. |

**Subsection 3.—Agricultural Co-operation in Canada in 1933.\***

Co-operative organization forms an integral part of the economic fabric of Canadian agriculture. The activities of the larger organizations such as the wheat pools, live-stock and fruit co-operatives have reached a high stage of development, and have received world-wide recognition. In addition to these are hundreds of comparatively small organizations which are working quietly and effectively to serve local areas.

Available statistics show 687 co-operative associations actively engaged in business in 1933. Approximately 100 community halls which were listed in former reports are not included in this summary of farmers' business organizations. The 687 associations have 2,585 branches which combined make a total of 3,272 places of business engaged in the marketing of farm products and the purchase of supplies for farmers. The shareholders and members financially interested number 342,692 and patrons reported total 373,650. Combined assets total \$104,232,049 with plant and equipment valued at \$37,164,607. The total actual investment of member shareholders in capital stock amounts to \$8,686,504 and reserves and surplus total \$39,560,830. Sales of farm products for the year under review amounted to \$125,126,594. The sales value of supplies handled totalled \$7,318,734, and other receipts \$131,398, which, combined, means a total business of \$132,576,726.

Available records indicate that the most important early activity of farmers in the field of co-operation in Canada was directed toward the marketing of farm products. Such bodies to-day outnumber farmers' purchasing associations by 10 to 1. In comparing the volume of business, marketing associations transact twenty times the business handled by purchasing agencies. Membership in the co-operative marketing associations is given as 292,854 persons compared with 28,266 members in purchasing organizations.

Within the marketing group the grain and seed co-operatives which include the wheat pools of Western Canada have the largest membership and investment, and exceed all other commodity groups in volume of business, which is estimated at \$94,912,237 for the year under review. A membership of 169,475 grain growers contributed to this business through 2,146 co-operative marketing agencies. Mainly through deductions from the selling price of their grain, these members have invested a sum of \$36,186,498 in their business and in addition have paid up \$3,342,929 in share capital. Combined assets total \$88,881,252.

Eighty-two dairy co-operatives with 112 depots in Canada reported a membership of 27,499 with assets valued at \$3,695,217. Paid-up share capital amounts to \$1,674,534 with reserves of \$610,455. Sales of dairy products totalled \$10,126,259 for the year under review.

---

\* Statistics contained in this review are based on records received by the Economics Branch, Department of Agriculture, in 1934, covering the business year of 1933.

The records for 57 live-stock shipping and marketing associations show a combined membership of 40,877. Financing of these associations is mainly by membership fees and commissions. Assets are comparatively low with value of plant and equipment amounting to \$567,451. This accommodated a business of \$9,044,302. The live-stock co-operatives undertake very little processing of their product. Their main activity is the assembling of live stock in cars at producing points for shipment to central markets.

A large part of the fruit and vegetable crop is marketed through 114 co-operative agencies with a combined membership of 10,875 fruit growers. Assets for all companies total \$3,129,724, which are supported by reserves of \$700,873. Sales of fruits and vegetables during the year amounted to \$6,098,283 which, together with supplies purchased and other receipts, gave a total business of \$7,241,931.

Poultry producers have organized in each of the provinces to sell their products co-operatively. There were 25 associations with 196 places of business which reported a membership of 33,479 members. Assets amount to \$408,528 with reserves of \$165,088. Sales for the year amounted to \$2,041,452.

Practically all the wool marketed co-operatively in Canada is handled by the Canadian Co-operative Wool Growers Ltd. The company operates in each province through the medium of 18 sheep-breeders' and wool-growers' associations. The co-operative stores, grades and markets the wool received from its 6,500 patrons. In addition, it carries on advertising and educational work and handles materials and supplies for its members. The quantity of wool handled by the co-operative during the year amounted to 4,240,000 pounds.

In Ontario and Quebec, the honey producers are organized co-operatively with a combined membership of approximately 1,600 members. The Ontario Honey Producers Co-operative Ltd. markets approximately 4 million pounds of honey annually. Three tobacco co-operatives in Ontario, two in the province of Quebec and one in British Columbia report a total membership of 1,009 and sales of approximately a quarter of a million dollars for 1933. The *Producteurs de Sucre et Sirop d'Erable de Québec*, with a membership of 1,982, is organized on a co-operative basis. During the year under review the sales value of maple products marketed by this association amounted to \$287,260.

Available statistics show 327 associations are organized for the purpose of purchasing farm supplies and merchandise on the co-operative plan. These consumer associations, of which over one-half are established in the province of Saskatchewan, have a combined membership of 28,266. The sales value of supplies purchased during the year, by associations organized exclusively for the handling of supplies, amounted to \$5,584,675. In five of the provinces co-operative wholesale buying societies purchase goods for their shareholder associations.

For further information see Table 29.

<sup>2</sup> Exclusive of approximately 100 community halls listed in former reports.

## Section 12.—Labour Legislation in Canada in 1933 and 1934.

A summary of labour legislation in force in Canada on Dec. 31, 1928, was given in the Canada Year Book for 1929 at pp. 755-762. The Year Book for each subsequent year contained a summary of the labour laws enacted in the previous year. Labour laws enacted in Canada in 1933 and 1934 are published in the Reports on Labour Legislation in Canada for those years issued by the Department of Labour. A summary of the principal enactments is given below.

**Dominion Labour Legislation.** The Relief Act, 1933, empowered the Governor General in Council to enter into agreements with the provinces respecting relief measures; to make loans to, and guarantee payment of money by provinces or public corporations and undertakings; when Parliament is not in session to take the necessary measures to maintain peace, order, and good government and to maintain the credit and financial position of the Dominion or of any province. In particular, the Governor in Council might provide for special relief in the National Parks and elsewhere and assist financially in the sale of primary products. The amount payable for direct relief was limited to \$20,000,000 for the year ending Mar. 31, 1934. The Relief Act, 1934, was generally similar to the 1933 Statute but did not provide for defraying the cost of the distribution of natural products. Provision was also made for the payment of the Dominion's proportion of any direct relief accounts in excess of the aforementioned \$20,000,000 received subsequent to the expiration of the Act of 1933 on Mar. 31, 1934, and up to July, 1935.

In 1934, Parliament revised the law relating to shipping. The new Canada Shipping Act, which will come into force on Proclamation, incorporates numerous sections of the old Act, the Merchant Shipping Act of the United Kingdom and the Safety of Life at Sea and Load Line Conventions Act, 1931. Sections added to the Canada Shipping Act to put into effect draft conventions of the International Labour Conference have also been included. Among these were sections added in 1933 to implement the draft conventions regarding the protection of workers loading and unloading ships and the marking of the weight on heavy packages. These sections had not been put in force. The draft conventions covering Seamen's Articles of Agreement and the Repatriation of Seamen have been enacted for the first time.

The Technical Education Act, 1934, extends for five years the time within which the unexpended portion of the ten million dollars appropriated under the Act of 1919 may remain available for those provinces which have not yet used up their share of the money.

An amendment to the Criminal Code amends the law on picketing by providing that attending at or near any premises in order merely to obtain or communicate information, shall not be deemed to be watching or besetting within the meaning of the section. This clause was enacted in Canada in 1876, but was omitted from the Criminal Code in 1892.

**Provincial Labour Legislation.**—Provision for the protection of miners in New Brunswick was made for the first time in 1933 by an amendment to the Mining Act which establishes an eight-hour day for underground workmen and forbids the employment of boys under 16 below ground. A person in charge of a working face must be at least 18 years of age and must have a miner's certificate. Inspection is provided for and regulations may be made for the safety of persons employed.

In Saskatchewan, new safety regulations for coal mines were issued in 1933. In 1934, a Mines Regulation Act was passed relating to other mines including quarries and oil and gas wells.

In 1934 the Industrial Establishments Act of Quebec was amended to cover shops, and the section prohibiting the employment of children under 14 now applies not only to factories and shops but also to theatres, hotels, restaurants, telegraph offices and to messenger services. The normal working day of women and persons under 18 in industrial establishments must now end at 6 p.m. instead of 9 p.m. Hours for women and young persons under 18, in shops in cities and towns of over 10,000 population, may not exceed 60 per week except during the two weeks preceding New Year's Day and when permitted by the inspector. Working hours must fall between 7 a.m. and 11 p.m. except on the days preceding Christmas Day, New Year's Day, and Easter Sunday, when work must cease at 10 p.m. Where the inspector permits overtime in factories or shops, the maximum working hours for women and young persons are 65 instead of 72 as formerly.

The Ontario Factory, Shop and Office Building Act was amended in 1934 to reduce the maximum working week of 60 hours for men in bakeshops to 56 hours. Overtime and Sunday work are restricted. Except by special permit, employees working more than 9 hours during any work period or in any consecutive 24 hours, must be given at least 24 hours rest before resuming work.

The Quebec Hours of Work Act, 1933, authorizes the Lieutenant-Governor in Council to fix hours for workers in industries not subject to competition from other countries or provinces. Working hours may not be less than 6 per day or 33 per week, so that as far as possible work may be assured for two or more shifts. Exemptions may be allowed for preparatory, complementary or urgent work. Two orders have been issued under the Act fixing a 40-hour week or two shifts of 36 hours each for the building trades in the Montreal and Quebec districts and in the Eastern Townships.

The British Columbia Hours of Work Act, 1934, which came into force on June 14, 1934, revises a somewhat similar statute of 1933. The new law, like the Female Minimum Wage Act, 1934, is administered by the Board of Industrial Relations appointed under the Male Minimum Wage Act. The Act, like its predecessor, provides for an 8-hour day and 48-hour week in industrial undertakings, and empowers the Lieutenant-Governor in Council to add to or withdraw from the Act the whole or any branch of any industry, trade or occupation.

Under a 1934 amendment to the Saskatchewan Fire Departments Two-Platoon Act, a weekly rest of 24 hours may be given to fire department employees in cities of 10,000 or more, if a by-law to that effect is approved by the electors.

In Manitoba the One Day's Rest in Seven Act was amended in 1934 to apply to all hotels and restaurants.

The Public Vehicle Act of Prince Edward Island was amended in 1933 to forbid drivers of commercial vehicles being employed as such for more than 10 hours in 24.

Amendments to the Manitoba Fair Wage Act of 1916 widen the scope of the Act to include not only provincial public works but also private building and construction work of more than \$100 value in towns with a population exceeding 2,000. Work done by an owner or tenant, if not with a view to sale or rental, is not within the scope of the Act. The Lieutenant-Governor in Council may extend the territory to which the Act applies.

A new Male Minimum Wage Act was passed in British Columbia in 1934 to apply to adult male employees in any industry or occupation except farm labourers and domestic servants. The Act, which provides for a Board of Industrial Relations, is drafted along the lines of the Women's Minimum Wage Acts of the various provinces and empowers the Board to fix minimum wages, with special provision for certain classes of employees, such as young or handicapped workers.

A new British Columbia Female Minimum Wage Act replaces the Act of 1918 and is administered by the Board of Industrial Relations. A new clause stipulates that, where a minimum wage has been fixed for female employees, no person may employ, on work usually done by such employees, any male person over 18 years of age at a wage less than the fixed minimum, except male apprentices whose indentures have been approved by the Board; nor may boys under 18 be employed at such work at less wages.

The Women's Minimum Wage Act of Quebec was amended in 1933 to provide that employers might be required by Order in Council to keep registers of the names, ages and places of residence of their female employees and information as to their wages and working hours. An Order in Council of this sort was issued during the year. In 1934, the Act was amended to prohibit any male worker being employed on work ordinarily performed by women at a less wage than that fixed for the female employees.

The Ontario Minimum Wage Act was amended in 1934 to provide that where a minimum wage is established, the number of hours per week for which such wage is paid may not exceed 48 in municipalities with a population of over 50,000 or 50 in municipalities of from 10,000 to 50,000, or 54 in other municipalities. If the prevailing weekly hours in any industry or employment are less than the above hours, the former are to be considered the maximum for which the minimum wage shall be paid. Where a male employee replaces a female at any class of work for which a minimum wage is established, he must be paid not less than the minimum.

A 1933 amendment to the Manitoba Minimum Wage Act forbids any person over 18 years of age being employed in any class of employment at a lower rate than the minimum, if any, established for boys under 18. In 1934 the Act was amended to include male employees as well as women and boys. The Act or regulations may be extended by Order in Council to industries not expressly provided for by the Act. Where the regulations fix a minimum wage in any class of industry, no person of 18 years or over may be employed at less than 25 cents per hour unless the Minimum Wage Board has provided for a different rate.

In 1934, the Saskatchewan Minimum Wage Act was amended to provide that, with the approval of the Lieutenant-Governor in Council, the Minimum Wage Board may apply the Act to male employees in any shop or factory which the Act covers.

In 1934, laws were enacted in Quebec, New Brunswick and Ontario to regulate labour conditions in the lumbering industry. The New Brunswick Forest Operations Commission Act provides for a commission with power to fix minimum wages yearly and on the application of an employer or of not less than five employees to hear disputes as to wages and board, store charges and living conditions in the lumber camps. Recommendations of the Commission, if approved by the Minister, must be carried out by the parties to the dispute, failure to do so constituting an offence against the Act.

The Quebec Forest Operations Commission Act provides for a commission to which every timber-limit holder, before commencing operations, must submit details concerning wages, hours of labour, sanitary conditions, terms of hiring, food supplies and prices charged therefor, living accommodation, deductions from wages for medical and other services, fines and any other information required. The Commission may conduct investigations and make inspections. A statement of the wages to be paid must be posted at the camp and any employee paid lower wages may claim the difference before a court.

Under the Ontario Woodmen's Employment Act, an inspector may be appointed to investigate working and living conditions in lumber camps. The operators are to be held responsible for conditions whether they have let contracts for certain work or not.

The Quebec Collective Labour Agreements Extension Act, 1934, empowers the Lieutenant-Governor in Council, on the recommendation of the Minister of Labour, to extend the terms of a collective agreement as to wages and hours between one or more employers and one or more trade unions so as to bind all employers and employees in the same trade or industry in a specified district. On petition for its extension by one of the parties to an agreement, the Minister must give thirty days notice of the petition in the *Quebec Official Gazette*. If there is no valid objection, and if he deems the agreement to have a preponderant importance and significance for the establishment of conditions of labour in the industry in the region concerned, he may recommend, to the Lieutenant-Governor in Council, its extension. An agreement thus made obligatory governs all individual labour contracts in the industry but if an individual contract is more to the advantage of the employed it is to have effect unless prohibited by the collective agreement. The Lieutenant-Governor in Council may refuse to apply the provisions of the Act to any industry liable in his opinion to suffer from the competition of foreign countries or other provinces. Nothing in the Act may be deemed to compel an employer or employee to become or not to become a member of an association of his industry or trade.

The Quebec Workmen's Compensation Act was amended in 1933 to prohibit compensation being paid for the first seven days of disability unless it continues for at least three weeks. The minimum weekly payment to a widow or invalid widower with one or more children was reduced from \$12.50 to \$10 and the same reduction was made in the minimum compensation for total disability. Diseases due to mining and quarrying operations were deleted from the schedule of compensable diseases, *viz.*, ankylostomiasis, miners' phthisis, stone workers' or grinders' phthisis, silicosis and pneumoconiosis. The Quebec Silicosis Act, 1931, and the sections on silicosis added to the Mining Act in the same year were repealed in 1933.

Amendments of 1933 to the Workmen's Compensation Act of Ontario authorized the Workmen's Compensation Board to lower the assessment of any employer who reduced the accident hazard to a minimum by installing safety devices and whose accident record has been good. Workmen disabled from silicosis are to be compensated on the same basis as workmen suffering from other industrial diseases, but where silicosis is complicated with tuberculosis the basis of compensation for total disability is now fixed at 50 p.c. instead of 66 $\frac{2}{3}$  p.c. of average earnings.

In 1934, dermatitis (venenata) due to employment in any process involving the use of acids and alkalis or acids and oils, was added to the schedule of compensable industrial diseases in the Saskatchewan Workmen's Compensation (Accident Fund) Act.

The Nova Scotia Workmen's Compensation Act was amended in 1934 to require that, in reckoning compensation in disability cases, average earnings may not be rated below \$10 per week where the workman's weekly wages would have amounted to at least \$10 if he had worked six days a week. Medical aid is not to be supplied for more than 30 days during a period of 60 days from the date of disability. Formerly, the workman was entitled to medical aid only during the period of 30 days from the date of disability.

During the period under review all the provinces except Nova Scotia and Prince Edward Island made statutory provision for continued co-operation with the Dominion Government in dealing with unemployment. In Nova Scotia and Prince Edward Island, laws enacted in 1931 continued to be effective for that purpose.

An amendment of 1933 to the British Columbia Forest Act authorized the Minister of Lands, as from Nov. 1, 1932, to grant to any municipality or organization charged with the care of unemployed or needy persons a permit entitling the holder to cut timber free of stumpage or royalty to be sold as cordwood, on condition that only persons who are unemployed and in need of relief shall be employed in the cutting and that the proceeds of the sale shall be used for unemployment relief.

Designed first to provide only for the settlement of unemployed coal miners on the land, the Nova Scotia Miners' Land Settlement Act, 1932, now the Nova Scotia Land Settlement Act, was extended in 1933 to unemployed persons who have been engaged in manufacturing or transportation. The Land Settlement Board is given power to provide for the training and re-establishment of the unemployed and their dependants and to aid in settling suitable men on farms.

In Quebec, Ontario, Saskatchewan and British Columbia, legislation enacted in 1933 ratifies agreements between the Government of Canada and the Governments of these provinces for the relief of selected families by placing them on suitable farms. One-third of the expense, not to exceed \$600 per family, is to be borne by the Dominion Government, the remainder by the province and the participating municipalities in the proportions agreed upon between them.

The Alberta Department of Trade and Industry Act, 1934, which came into force on Oct. 18, 1934, provides for a Department of the Government to inquire into conditions in any trade or industry which appear to be detrimental to the trade or the public; to promote conferences of those engaged or employed in any such trade so as to remedy harmful conditions; to promote trade associations for the same purpose and to collect information regarding the various trades of the province and its resources. The Act applies to wholesale and retail dealers, druggists, printers, restaurant keepers, dry cleaners, barbers, hairdressers, and plumbing, heating and sanitary engineers. Other trades may be brought under the Act by Order in Council on petition to that effect. Provision is made for the formulating of codes, setting up standards of ethics and practices, including standards of minimum wages and hours of labour, for any trade which, if approved by 66 p.c. of the persons engaged in, or by persons holding 66 p.c. of the capital invested in that trade, may be made binding on all persons carrying on the trade. If the representatives of a trade fail to agree on a code or if a code is not approved as required, the Minister, with the assistance of an advisory Board, may draw up a code which may be made binding on all persons engaged in the trade by Order in Council. Inquiries may be made into wages and conferences arranged between

employers and employees for the purpose of effecting an agreement as to minimum wages in any trade for which a code is proposed. If no agreement is reached, the Lieutenant-Governor in Council may fix a minimum wage for any class of employees in any district. An employer may not interfere with the free selection of representatives by any association or in any lawful activity of such association. Part III of the Act, which deals with coal mining and distribution, declares invalid any agreement as to wages whereby the remuneration of any person depends on the profits of the industry, unless the agreement is approved by the Minister.

### Section 13.—Legislation Respecting Combinations in Restraint of Trade.

A general article on Canadian legislation concerning trade combinations and monopolies against the public interest will be found at pp. 765-770 of the 1927-28 Year Book under the heading "Legislation Respecting Combinations in Restraint of Trade". The article outlines the provisions of the Combines Investigation Act and reviews the principal cases dealt with under the Act up to Mar. 31, 1927. A brief statement of the provisions against combines as contained in the Criminal Code,\* the Customs Tariff,† the Excise Act‡ and the Patent Act§ is included. A further section of the article summarizes former Canadian legislation for the investigation of combines, including the Combines Investigation Act of 1910 and the Combines and Fair Prices Act of 1919.

**The Combines Investigation Act.**—The Combines Investigation Act (R.S.C., 1927, c. 26) is designed, as its full title indicates, "to provide for the investigation of combines, monopolies, trusts and mergers", and declares to be unlawful only such combines as "have operated or are likely to operate to the detriment or against the interest of the public, whether consumers, producers or others". The statute provides that an inquiry shall be made by the Registrar on receipt of an application signed by any six British subjects resident in Canada, or if the Registrar has reason to believe that a combine exists, or if the Minister of Labour so directs. If after preliminary inquiry sufficient evidence is disclosed to justify further investigation, this may be conducted by the Registrar or by a special Commissioner appointed by the Governor in Council. Full authority is given the Registrar or the Commissioner to examine witnesses on oath and compel the production of records and documents.

The remedies provided by the Act are those of publicity and penalty. The proceedings are conducted in private, unless otherwise ordered by the Minister, but the report of any commissioner is required to be published within fifteen days of its receipt by the Minister. Whenever in the opinion of the Minister an offence has been committed, he may remit the report and the evidence to the Attorney General of the province concerned. The penalty section of the statute provides that any person who is a party or privy to, or knowingly assists in, the formation or operation of a combine is guilty of an indictable offence and liable to a penalty not exceeding \$10,000 or to two years imprisonment, or, if a corporation, to a fine not exceeding \$25,000. Provision is also made in the Act for the reduction

\* R.S.C., 1927, c. 146, ss. 496-498.

† R.S.C., 1927, c. 44, s. 15.

‡ R.S.C., 1927, c. 60, s. 27.

§ R.S.C., 1927, c. 150, s. 40

or removal of the customs duty on any article of commerce, among the manufacturers or dealers in which there exists a combine, the operation of which is facilitated by the tariff. Similarly, the Exchequer Court may revoke a patent if there is evidence to show that the holder of such patent has made use of his exclusive rights to limit production or competition unduly, to enhance prices unreasonably, or to restrain or injure trade.

The constitutional validity of the Combines Investigation Act was given final confirmation by the Judicial Committee of the Privy Council in a decision delivered in January, 1931. This judgment confirmed the unanimous decision of the Supreme Court of Canada, given in April, 1929, after a reference for determination of this question had been made to the Court by the Dominion Government. Both courts upheld also the constitutional validity of Section 498 of the Criminal Code, relating to combinations in restraint of trade.

**Combine Cases in 1933.**—Members of a combine found to exist among manufacturers of baskets and other wood-veneer containers for fruits, vegetables and meats were indicted at Hamilton and pleaded guilty in January, 1933. The accused were fined \$100 each.

An extensive investigation into an alleged combine of importers of British anthracite coal was completed by the Registrar early in 1933. Some seventy witnesses were examined in hearings held at Montreal, Quebec, Toronto and Ottawa. The evidence and report of this investigation were remitted to the Attorney General of Quebec, who instituted prosecutions under the Act against the leading importers. In December, 1933, five firms were convicted and sentenced to pay fines totalling \$30,000. An appeal from this judgment was heard in 1934 and was followed by prosecutions of a second group of importers.

An inquiry into an alleged combine of buyers of Ontario flue-cured tobacco was concluded in 1933 and was made public in the early part of 1934. The investigation related principally to allegations that agreements among buyers had prevented competitive bidding and had caused prices paid to growers to be unreasonably low. No arrangement among buyers in contravention of the Act was found, although it was indicated that growers were found to be at a serious disadvantage in bargaining with the buyers of their product.

The annual report of the Registrar of the Combines Investigation Act, dealing at greater length with the above subjects and referring also to other inquiries, is published as a section of the Annual Report of the Department of Labour.

### Section 14.—Mothers' Allowances.

Six of the nine provinces of Canada provide for the payment of allowances to mothers who are widowed or without adequate means of support. The province of Manitoba was the first to make such provision in 1916, and the example has been followed by the other western provinces and by Ontario and Nova Scotia. The Mothers' Allowances Act, 1930, of New Brunswick has not been proclaimed in effect.

All the mothers' allowances acts stipulate that the mother must be a resident of the province at the time of making application and a widow or, in all the pro-

vinces but New Brunswick and Nova Scotia, a wife, whose husband is physically or mentally incapacitated. The section in the Alberta Act bringing the wife of a physically disabled man within its scope has, however, not been proclaimed.

In British Columbia, Ontario and Saskatchewan, deserted wives are paid an allowance, and in British Columbia and Saskatchewan, the wives of inmates of penal institutions are eligible. Under all the statutes except those of Alberta and Saskatchewan, the mother must be a British subject or the widow or wife of a British subject. Allowances may be paid to a foster-mother under certain conditions in all the provinces but Alberta.

In New Brunswick, Nova Scotia and Ontario, allowances are payable in respect of two or more dependent children, but in Ontario, in special cases, an allowance may be paid for one child and in New Brunswick and Nova Scotia, an allowance is payable for one child under 16 if there is an invalid child over 16 years of age. In the other provinces, allowances are payable in respect of one or more dependent children, but in Manitoba, under the regulations, no allowance is payable in respect of an only child or an only child under 15 years of age unless the mother is temporarily or permanently unable to care for the child. A dependent child is a child under 16 years of age in British Columbia, New Brunswick, Nova Scotia, Ontario and Saskatchewan. In Alberta, a boy under 14 or a girl under 15 is deemed to be dependent. In Manitoba, only children under 15 are regarded as dependent unless they are invalids.

In Alberta, British Columbia, Manitoba and Ontario, the cost of the allowances is divided between the province and the municipalities concerned. In Ontario, however, the Provincial Treasury bears the whole cost of allowances payable to persons resident in the provisional judicial districts (northern Ontario) of the province and not in cities. In Saskatchewan, New Brunswick and Nova Scotia, the whole cost is carried by the province.

**Rates of Allowances.**—In British Columbia, the Act provides for a maximum monthly allowance of \$42.50 for a dependent mother with one child, and an additional \$7.50 for each other child under 16 years of age. In New Brunswick and Nova Scotia, a maximum allowance of \$60 per month is fixed by statute. In the other provinces, the provincial authority administering the Act has power to fix the rate of the allowance. In Ontario, the maximum for a mother and two children is \$40 in a city, \$35 in a town and \$30 in a rural district, with an additional \$5 for every child above two in each case up to a maximum allowance for a family of \$80 per month. In Saskatchewan, minimum and maximum monthly payments of \$8 and \$30 were established by Order in Council in 1931.

In Manitoba, the maximum allowance for a mother and two children is \$50 with a maximum of \$89 for a family of seven or more children. In Alberta, a mother of a single child is granted not more than \$20 a month and a mother of one child under the stipulated age is given a maximum allowance of \$25. On this basis, adjustments are made for other cases.

The statement below shows the expenditure on mothers' allowances in the provincial fiscal years ended 1933.

## MOTHERS' ALLOWANCES IN CANADA, PROVINCIAL FISCAL YEARS ENDED 1933.

| Province.                                  | Number Assisted.   |                    | Benefits Paid. |
|--------------------------------------------|--------------------|--------------------|----------------|

|                                            | No.                | No.                | \$             |
| Alberta (year ended Mar. 31).....          | 1,675              | 4,000 <sup>2</sup> | 438,570        |
| British Columbia (year ended Mar. 31)..... | 1,514              | 3,274              | 779,639        |
| Manitoba (year ended April 30).....        | 1,078              | 3,374              | 352,053        |
| Nova Scotia (year ended Sept. 30).....     | 1,138              | 3,487              | 341,929        |
| Ontario (year ended Oct. 31).....          | 7,653              | 19,359             | 2,801,872      |
| Saskatchewan (year ended April 30).....    | 2,511 <sup>1</sup> | 6,733 <sup>1</sup> | 403,915        |

<sup>1</sup> Approximately.    <sup>2</sup> As of April 30, 1933.

## PART II.—WAGES AND COST OF LIVING.

## Section 1.—Wage Rates.\*

Statistics of rates of wages and hours of labour have been collected for recent years by the Dominion Department of Labour, and are published in a series of bulletins supplementary to the *Labour Gazette*. Report No. 1 of this series was issued in March, 1921. The records upon which the statistics are based begin in most cases with the year 1901. Index numbers have been calculated to show the general movement of wage rates; the series covers six groups of occupations back to 1901, and common factory labour, miscellaneous factory trades and lumbering back to 1911. The index numbers are based upon wage rates in 1913 as 100.

The accompanying table of index numbers (Table 1) shows the relative changes from year to year. A downward movement appeared in most of the groups in 1921 and 1922, after the peak had been reached in 1920. The index numbers for 1923 and 1924 showed on the whole a slightly upward trend, but while there were slight increases during 1925 in some groups, a substantial decline in coal miners' wages reduced the average. In 1926 slight increases took place in the wages paid by the building, metal and printing trades, electric railways and factory trades. In 1927 general increases took place in all the six groups included in the average, as well as in the other three groups; wage increases in the building trades and on the steam railways were the outstanding features of the year. In 1928, except steam railways which was stationary and common factory labour which declined fractionally, all groups showed an upward movement, a substantial increase appearing in building trades. In 1929 all groups except coal mining were higher, the building trades showing the greatest increase. In 1930 building trades showed a substantial increase, lumbering a decrease and other groups fractional increases. In 1931 all groups

\*See pp. 774-783 of the 1927-28 Year Book for an article on the "Wages Statistics of the Census of 1921" and pp. 797-799 of the 1933 Year Book for "Earnings in the Census Year 1931".

were down except printing which showed a slight advance and coal mining which was unchanged. In 1932 all groups were down, the decreases being greatest in lumbering, building trades and steam railways. In 1933 all groups were down substantially, but in 1934 increases appeared in coal mining, factory labour and lumbering, with decreases in the other groups.

Rates of wages and hours of labour in 1934 in various trades in the largest cities of the five economic areas of Canada will be found in Table 2. The attention of those specially interested in the subject of wages and hours is directed to the valuable detailed study, "Wages and Hours of Labour in Canada, 1929, 1933 and 1934", published by the Department of Labour as a supplement to the *Labour Gazette*, January, 1935.

### 1.—Index Numbers of Rates of Wages for Various Classes of Labour in Canada, 1913-34.

NOTE.—Rates of wages in 1913=100. Index numbers for 1901-12 were given at p. 674 of the 1932 Year Book.

| Year.     | Average. <sup>1</sup> | Building Trades. | Metal Trades. | Printing Trades. | Electric Railways. | Steam Railways. | Coal Mining. | Common Factory Labour. | Miscellaneous Factory Trades. | Logging and Saw-milling. |
|-----------|-----------------------|------------------|---------------|------------------|--------------------|-----------------|--------------|------------------------|-------------------------------|--------------------------|
| 1913..... | 100.0                 | 100.0            | 100.0         | 100.0            | 100.0              | 100.0           | 100.0        | 100.0                  | 100.0                         | 100.0                    |
| 1914..... | 101.3                 | 100.8            | 100.5         | 102.4            | 101.0              | 101.4           | 101.9        | 101.0                  | 103.2                         | 94.7                     |
| 1915..... | 101.4                 | 101.5            | 101.5         | 103.6            | 97.8               | 101.7           | 102.3        | 101.0                  | 106.2                         | 89.1                     |
| 1916..... | 105.8                 | 102.4            | 106.9         | 105.8            | 102.2              | 105.9           | 111.7        | 110.4                  | 115.1                         | 109.5                    |
| 1917..... | 119.9                 | 109.9            | 128.0         | 111.3            | 114.6              | 124.6           | 130.8        | 129.2                  | 128.0                         | 130.2                    |
| 1918..... | 143.9 <sup>2</sup>    | 125.9            | 155.2         | 123.7            | 142.9              | 158.0           | 157.8        | 152.3                  | 146.8                         | 150.5                    |
| 1919..... | 165.3                 | 148.2            | 180.1         | 145.9            | 163.2 <sup>2</sup> | 183.9           | 170.5        | 180.2                  | 180.2                         | 169.8                    |

<sup>1</sup>For statistics of the wages and hours of employees of steam railways and wages of employees in and about coal mines in Canada, see pp. 751-752 of the 1930 Year Book, where the rates, etc., for the past seven or eight years to 1929, are given. Except for a 10 p.c. reduction in Nova Scotia in coal mines in 1932, these rates were unchanged down to December, 1932. In editions of the Year Book prior to 1933 a table showing the wages and hours of common labour in factories for certain cities has also been given in this section. This has been omitted to conserve space, but the information can be found at p. 41 of "Wages and Hours of Labour in Canada", published as a supplement to the *Labour Gazette* for January, 1935. For the five cities of Table 2 it is included under sub-heading 3 of the stub.

<sup>2</sup>Final maximum rate after annual increase; one-man cars at Halifax.

<sup>3</sup>One day off if possible.

## Section 2.—Wages and Hours of Labour under Provincial Minimum Wage Legislation.

Seven of the provinces of Canada have in effect legislation providing for minimum wages for female employees in certain industries and occupations through boards or commissions which establish and enforce the minimum rates, and there is also legislation for the restriction of hours of labour. In Alberta, Manitoba, Ontario and Quebec the minimum rates for female employees are applicable to

males in certain respects. Minimum wage legislation for female employees became effective in the various provinces as follows: British Columbia and Manitoba in 1918; Saskatchewan in 1919; Alberta and Ontario in 1920; Quebec in 1926, the statute having been passed in 1919; Nova Scotia in 1930, the statute having been passed in 1920. In New Brunswick a statute was passed in 1930 to come into force on proclamation but has not yet been proclaimed.

Hours of labour are regulated in some of the provinces by the Minimum Wage Boards and in others under the factory acts, etc.

Minimum wage rates for males separately had been established prior to 1934 to a slight extent only in British Columbia since 1925, and in Manitoba since 1931. During 1934, however, provision was made for this and rates were established for comparatively large numbers of male workers in British Columbia, Manitoba, Quebec and New Brunswick. A supplement to the *Labour Gazette* for January, 1935, on Wages and Hours of Labour in Canada 1929, 1933 and 1934 contains an appendix giving information as to minimum wages for males as well as for females in some detail.

Information as to minimum wage rates on Dominion Government contracts for the manufacture and supply of equipment, stores, etc., appears in the paragraphs on Fair Wages in the section on the Dominion Department of Labour at pp. 804-805.

### Subsection 1.—Minimum Wages for Females.

The accompanying table gives information as to minimum rates of wages and as to hours under the orders of the various boards and commissions in effect at the end of 1934.

The information here given is intended to afford merely a statistical summary of the minimum wages and restricted hours of labour in the provinces and industries affected, and while some of the more significant details have been given in footnotes, it has been found impossible to include the information in such form as to indicate any more than the general conditions under these provisions.

For complete information it is necessary to refer to the orders as issued by the various provincial boards. These have been given in summary form in the *Labour Gazette* from time to time as issued. In some provinces these orders include regulations as to employment conditions, sanitary conditions, etc. The boards have power to issue licences for lower rates of pay for handicapped workers and to meet special conditions in the nature of emergencies.

In this table the figures for adult learners and for minors and apprentices are shown in a range covering both classes. There is considerable variation in the rates for such classes in the various industries and the time allowed for such periods varies considerably, from a few weeks to two years and upwards. The number of learners and apprentices is usually restricted to 25 p.c. of the employees.

The hours of labour shown in Table 3 are those for which the minimum rates are payable, or the maximum hours of work (except under special conditions, provision for overtime pay, etc.) established by the minimum wage boards or provided for under other legislation, such as factory acts.

### 3.—Minimum Wage Rates for Female Employees in Canada Under

NOTE.—The regulations governing hours of work in the various provinces are as follows: *Nova Scotia*, Hours for which minimum rates payable to be not less than 44 or more than 50 per week; *Quebec*, Rates payable in printing, etc., and in textile trades for recognized regular working period up to 55 hours; in stores hours usually worked if less than prescribed in orders; *Ontario*, Rates payable for hours stated in orders or

<sup>1</sup>According to locality and population.

<sup>2</sup>According to locality, population and industry; the higher rates apply in Montreal and district.

<sup>3</sup>All rates according to locality and population.

<sup>4</sup>Rates generally apply throughout province. "Brickyards and Seasonal and Casual Employment in Industries not covered by other Regulations"—\$12.00 per week of 48 hours or 30 cents an hour for all employees. An Order in Council published Nov. 24, 1934, and effective one month later makes it obligatory on all employers of workers over 18 years, except farm and private domestic workers, to pay a wage of \$12.00 per week of 48 hours, or 25 cents per hour, in any city and certain named municipalities adjacent to Winnipeg, and in any summer resort during June, July, August and September; and \$10.00 per week or 21 cents per hour elsewhere in the province (unless lower rate permitted by regulations or exemption under the Act).

<sup>5</sup>Cities only, but Board may extend any order to every part of province. On Jan. 11, 1935, experienced rates reduced by \$1.00 per week except mail-order houses where reduction was 50 cents (minors and learners rates decreased in some cases).

<sup>6</sup>Apply to centres with more than 600 population, and to Banff, Lake Louise, Waterton Lakes Park and Jasper, except in "canning, etc." where rates given apply throughout province.

<sup>7</sup>Rates apply throughout the province; provision also made for Washing, Curing, Packing, etc. (except Canning) of fish" as follows: experienced—\$15.50 per week (48 hours) or 32 $\frac{3}{4}$  cents per hour; minors, learners, etc.—\$12.75-\$14.75 per week.

<sup>8</sup>Per hour.

<sup>9</sup>Or 25 to 30 cents per hour.

<sup>10</sup>"Custom Millinery Trades" not in factories: minors, learners, etc.—\$5.00-\$10.00 per week.

<sup>11</sup>These rates apply to all elevator operators.

<sup>12</sup>"Tailoring and Millinery Establishments", minors, learners, etc.—\$5.00-\$10.00 per week; in bag factories experienced adults for some work, \$11.00 per week.

## Orders of Provincial Minimum Wage Boards, as at Dec. 31, 1934.

for hours normally worked if less than prescribed in orders; *Manitoba*, 50 hours in tailoring, millinery, paint, broom and seed packing establishments; *Saskatchewan*, In case of retail stores hours may be increased to 56 per week between Dec. 15 and Dec. 31; *Alberta*, 48 per week except in retail stores where 52 hours apply, and in hotels, restaurants, etc., where 56 hours apply; *British Columbia*, Hours of Work Act.

<sup>13</sup>Winnipeg and St. Boniface only.

<sup>14</sup>Higher rates apply to Winnipeg and district and to summer resorts during June, July, August and September. Part-time rates: experienced—25 cents per hour; inexperienced 20 cents per hour.

<sup>15</sup>Or 35 cents per hour, Winnipeg, St. Boniface and St. James only; no minors to be employed.

<sup>16</sup>For 7-day week: experienced—\$14.50; apprentices—\$10.50-\$13.00.

<sup>17</sup>Winnipeg, St. Boniface and St. James only.

<sup>18</sup>Millinery shops—\$4.00-\$10.00.

<sup>19</sup>Ushers in theatres, motion picture houses and music halls, cloakroom attendants in cabarets and dance halls, if working 28 hours to 48 hours per week \$14.00; hourly rate 50 cents.

<sup>20</sup>"Personal Services" order includes also garages and operation of elevators.

<sup>21</sup>"Public Housekeeping" order includes chambermaids in lodging houses, elevator operators, also janitresses except in apartment buildings of less than 12 suites.

<sup>22</sup>Ushers in theatres, music halls, lecture halls, etc., \$14.25 for 36 to 48 hours per week, \$10.80 for 18 to 36 hours.

<sup>23</sup>"Personal Services" includes, also, attendants at garages and service stations, drivers of motor cars and other vehicles.

<sup>24</sup>"Telephone and Telegraph".

<sup>25</sup>\$12.50 in Toronto; \$12.00 in Ottawa, Hamilton, London, Windsor; shoeshine parlours in Toronto, \$12.50, 50 hours.

<sup>26</sup>In some industries, instead of a graduated scale of wages according to experience, stipulated percentages of the female workers in each establishment must receive the full minimum rate while the remainder may work at lower minimum rates provided.

### Subsection 2.—Minimum Wages for Male Employees.

In Quebec, Ontario, Manitoba, Alberta and British Columbia, the minimum wage legislation provides that in certain respects males may not be employed at rates lower than the minimum rates set for females, as set forth in the section on labour legislation. In the following provinces other provisions for minimum wage rates for males have been made.

During 1934, under new legislation, minimum wages for males have been established in various provinces to some extent, and the previous legislation in British Columbia has been amplified. Information on this appears in the section on labour legislation on pp. 844-849.

In New Brunswick, in October, 1934, under the authority of the Forest Operations and Commission Act, the Commission fixed a minimum wage in lumbering of \$32 per month and board, net, or its equivalent in case of piecework, except in booming and sorting for which the minimum rate was set at 20 cents per hour, net.

In Quebec, under the Forest Operations Commission Act, 1934, all holders of licences to cut timber on public lands, or contractors, must submit a report on wages, hours, supplies, etc. The Commission has issued regulations recommending that at least \$30 net per month should be paid, or its equivalent in case of piecework.

Under the Quebec Collective Agreements Extension Act (section on labour legislation), the wages and hours in agreements have been extended and made compulsory for all employees as follows: in the industries and districts covered by the building trades in various parts of the province; granite and stone quarrying throughout the province; bakeries in Three Rivers; fur workers, Montreal and district; longshoremen, Montreal; and shoe manufacturing throughout the province. Particulars have been given in various issues of the *Labour Gazette* during 1934, and in a supplement to the *Labour Gazette* for January, 1935. Since that time an agreement for the mens and boys clothing industry throughout the province has been similarly extended, (see *Labour Gazette*, March, 1935).

In Manitoba minimum rates at \$8 per week for the first six months, \$9 for the second six months and \$10 after the first year have been set for boys under 18 years of age in Winnipeg and district and in Brandon, in manufacturing industries, in garages and gasoline filling stations and in retail stores; also for Winnipeg and district only in laundries, etc., in hotels and restaurants, etc. For messenger boys and bell boys \$8 per week was set, part-time work at 15 cents per hour. Minimum rates for men, over 18 years, at \$12 per week, or 25 cents per hour, in Winnipeg and district and \$10 per week, or 21 cents per hour, elsewhere, were set up for hotels, restaurants, etc., and in November, 1934, these rates were extended to men in any industry not already covered except farming, market gardening and domestic service. All rates are on the basis of the 48-hour week, with restrictions as to overtime.

The Fair Wages Act of Manitoba, 1916, as amended in 1934, provides for the observance of the schedules of wages and hours established for Provincial Government contracts on private contracts for building, repairs, etc., in the Greater Winnipeg Water District or any city or town having a population of over 2,000.

In British Columbia minimum rates have been established under the new Male Minimum Wage Act, 1934, in logging, sawmilling and woodworking, at 35 cents, 37½ and 40 cents per hour, varying according to class of work and locality; in construction at 45 cents in cities and 40 cents elsewhere; in baking, mercantile establishments and barbering at 40 cents, all on the basis of the 8-hour day and 48-hour week, with certain exceptions and special provisions.

### Section 3.—Cost of Living of Wage Earners.

An index number of the cost of living in working-men's families has been computed by the Department of Labour since 1913, and is published monthly in the *Labour Gazette*. This index is specifically designed for the purpose of measuring the trends of the cost of living for certain wage-earning classes with a somewhat lower standard of living than that which is measured by the Bureau of Statistics index number of retail prices, shown on pp. 869-873 of the present volume. The former wage-earners index is used extensively in negotiations as to wage rates and in the settlement of industrial disputes. An abridgment of this index is presented in Table 4.

#### 4.—Changes in the Cost of Living in Canada from 1914 to 1934.<sup>1</sup>

(Average prices in 1913=100.)

| Month and Year. | Food. | Fuel and Light. | Rent. | Clothing. | Sundries. | All Items. |
|-----------------|-------|-----------------|-------|-----------|-----------|------------|
| Dec. 1914       | 108   | 98              | 97    | 103       | 100       | 103        |
| Dec. 1915       | 111   | 96              | 94    | 115       | 110       | 107        |
| Dec. 1916       | 138   | 109             | 95    | 136       | 122       | 124        |
| Dec. 1917       | 167   | 125             | 102   | 158       | 134       | 143        |
| Dec. 1918       | 186   | 146             | 111   | 185       | 151       | 162        |
| Dec. 1919       | 201   | 148             | 122   | 210       | 164       | 176        |
| Dec. 1920       | 202   | 200             | 142   | 232       | 173       | 190        |
| Dec. 1921       | 150   | 172             | 150   | 177       | 173       | 161        |
| Dec. 1922       | 142   | 177             | 155   | 162       | 174       | 157        |
| Dec. 1923       | 146   | 172             | 158   | 164       | 171       | 159        |
| Dec. 1924       | 144   | 162             | 158   | 159       | 169       | 156        |
| Dec. 1925       | 157   | 166             | 158   | 159       | 166       | 160        |

| Dec. 1927       | 152   | 158             | 156   | 155       | 166       | 157        |
| Dec. 1928       | 154   | 157             | 157   | 157       | 166       | 158        |
| Dec. 1929       | 161   | 157             | 158   | 156       | 166       | 160        |
| Dec. 1930       | 138   | 156             | 160   | 148       | 165       | 151        |
| Dec. 1931       | 107   | 152             | 158   | 127       | 163       | 135        |
| Dec. 1932       | 96    | 145             | 141   | 114       | 161       | 125        |
| Mar. 1933       | 91    | 145             | 141   | 112       | 160       | 122        |
| June 1933       | 93    | 142             | 131   | 107       | 160       | 120        |
| Sept. 1933      | 99    | 141             | 131   | 113       | 156       | 122        |
| Dec. 1933       | 100   | 142             | 129   | 113       | 157       | 123        |
| Jan. 1934       | 102   | 142             | 129   | 113       | 157       | 123        |
| Feb. 1934       | 104   | 142             | 129   | 113       | 157       | 124        |
| Mar. 1934       | 109   | 143             | 129   | 113       | 156       | 126        |
| April 1934      | 106   | 143             | 129   | 113       | 156       | 125        |
| May 1934        | 103   | 142             | 128   | 113       | 156       | 123        |
| June 1934       | 101   | 141             | 128   | 113       | 156       | 122        |
| July 1934       | 101   | 141             | 128   | 113       | 155       | 122        |
| Aug. 1934       | 102   | 141             | 128   | 113       | 155       | 123        |
| Sept. 1934      | 102   | 142             | 128   | 117       | 155       | 123        |
| Oct. 1934       | 103   | 142             | 128   | 117       | 155       | 124        |
| Nov. 1934       | 103   | 143             | 129   | 117       | 154       | 124        |
| Dec. 1934       | 103   | 144             | 129   | 115       | 154       | 123        |

<sup>1</sup> The figures for "all items" were calculated by giving the following weights to each group: Food 35 p.c.; Fuel 8 p.c.; Rent 18½ p.c.; Clothing 18½ p.c.; and Sundries 20 p.c.

### Section 4.—Earnings in the Census Year, 1931.

The total number of wage earners in Canada reporting earnings for the census year ended June 1, 1931, was 2,477,038 or 96.53 p.c. of all wage-earners and the total amount of their earnings was \$2,102,877,400. Of this number 1,948,500 were males and their earnings amounted to \$1,806,633,400 or 85.91 p.c. of the total earnings. Females reporting earnings numbered 528,538 and the total amount of their earnings was \$296,244,000 or 14.09 p.c. of total earnings. The total weeks worked by wage-earners reporting earnings was 104,947,274. The number of weeks worked by the males was 80,322,382 or 76.54 p.c. of the total for both sexes, and the total for the females was 24,624,892 weeks or 23.46 p.c. of the grand total. A table showing earnings and weeks worked by wage-earners in the various industrial groups appeared at pp. 798-799 of the 1933 Year Book.

## CHAPTER XX. PRICES.\*

Commodity prices fall into two main divisions—wholesale prices and retail prices. The number of wholesale traders is smaller than that of retail traders, buying and selling by carefully defined grades more prevalent, and prices ranges at any particular time and place much narrower. Wholesale transactions are generally between expert buyers and sellers, dealing on purely business principles. Accordingly, wholesale prices conform approximately to the operation of the principle of supply and demand, and are thus more valuable as an index to the current state of business. Retail prices, on the other hand, are governed to some extent by custom and do not always respond readily to fluctuations in wholesale prices.

Further, there exists what is technically called a "lag" between wholesale and retail prices, the latter not showing changes in fundamental business conditions until a month or two after wholesale prices. Thus, while wholesale prices in Canada reached a peak in May, 1920, and commenced to decline in June, retail prices reached their corresponding peak in July, 1920, and began to decline in August. A similar "lag" has been noted in recent years, as indicated by the above chart showing the course of wholesale and retail prices in Canada from 1914 to 1934.

Retail prices find one of their chief uses in the measurement of changes in the cost of living. This measurement is complicated by such changing factors as consumption, habits and standards of living, and qualitative changes in commodities included in the budget.

### Section 1.—Wholesale Prices of Commodities.

#### Subsection 1.—Historical Review of Canadian Prices.

Until recently the index number of wholesale prices in Canada did not go back beyond 1890. However, it has now been extended backward to 1867 on the 1913 base, the added quarter of a century including a very interesting period to students of price statistics. The average index numbers for every year since

\*Revised by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics. This Branch compiles and publishes statistics on: Prices (wholesale, retail, securities, services, exchange, interest rates, cost of living), Retail and Wholesale Trade, Foreign Capital Investments in Canada and Canadian Investments Abroad, Balance of International Payments, and other related subjects. For a complete list of the publications of this Branch, the reader is referred to Chapter XXIX, Section I, under "Internal Trade".

Confederation are given in Table 1. In that table will be noted the high prices of 1867, immediately following the close of the American Civil War and the Austro-Prussian War of 1866, and the tendency to declining prices in the years immediately following. Prices went up again after the Franco-German War of 1871 and reached a high point in 1872 and 1873, but the crisis of the latter year resulted in a decline. A downward trend persisted fairly steadily throughout the 25 years from 1872 to 1897 and was featured by an inadequate increase in the supply of gold. The gold supply of the world did not increase as rapidly as the supply of commodities, consequently more commodities could be secured for a given amount of gold. This gold shortage was accentuated by the demonetization of silver which ceased to be legal tender with gold and was reduced to the level of token money by the chief nations. Relief came through the discoveries of gold in the Rand mines and the application of the cyanide process to low-grade ores. The result was a rapidly increasing world production of gold from about 1890 down to the outbreak of the Great War, with consequent rising general prices as soon as the volume of the new gold became a large part of the total stock. Thus prices increased from the low point of 75.6 in 1897 to 100 in 1913 and 102.3 in 1914. Afterwards, the Great War, both through the scarcity of commodities which it occasioned and the inflation of the currency which it produced, drove prices rapidly upward to a maximum of 243.5 in 1920, followed by a rapid collapse to 152.0 in 1922. This was succeeded by a slight increase to 160.3 in 1925. The tendency from 1925 to 1929 was downward, although the period was one of increasing prosperity—a condition normally associated with rising prices.

<sup>1</sup> Subject to revision.

Commencing in the fall of 1929, a severe economic depression set in, which was accompanied by a drastic decline in wholesale prices. Its extent may be gauged from the drop of the wholesale price index from 153.7 in August, 1929, to 99.2 in February, 1933. A subsequent irregular rise carried this index upward to 111.2 in December, 1934.

### Subsection 2.—The Index Number on a Post-War Base (1926).

The official Canadian index numbers of wholesale prices along with the other price indexes computed by the Dominion Bureau of Statistics were revised in 1928, when the list of commodities was increased from 236 to 502. The weighting system was extended to obtain a fairer distribution of importance among sub-groups, and the base was shifted to the year 1926. By that time most of the leading countries of the world had completed post-war currency reorganization, and a reasonable degree of price stability seemed to have been established. Commodities and weights were again revised at the beginning of 1934, bringing the total number of price series in the index up to 567.

The outstanding development in the field of prices since the base revision to 1926 has been the marked dispersion among various price groups between August, 1929, and the beginning of 1933. From 1926 to the latter part of 1929 a moderate decline occurred, but its effect upon the price structure was not great. Subsequent dislocation, however, was extremely serious as may be observed from the following percentage declines of group prices between August, 1929, and February, 1933: Canadian farm products, 60·7 p.c.; raw and partly manufactured materials, 50·5 p.c.; fully and chiefly manufactured goods, 29·3 p.c.; and the average of all commodities at wholesale, 35·5 p.c. From March, 1933, to December, 1934, the movement of commodity prices has been broadly upward, and the advance for primary products considerably more rapid than that for manufactured products. The following index numbers show the relationship between the average of all commodities and specified commodity groups for December, 1934: all commodities 100·0; Canadian farm products, 86·5; raw and partly manufactured materials, 90·3; and fully and chiefly manufactured materials, 102·1. This represents material improvement over conditions existing at the nadir of the depression, although it is evident that equilibrium has not yet been restored.

### 2.—Weighted General Wholesale Price Index Numbers, by Months, 1925-34.

(1926=100.)

## Section 2.—Retail Prices of Commodities.

Collection of data and calculation of index numbers of retail prices and the cost of living are carried out in co-operation by the Dominion Bureau of Statistics (Department of Trade and Commerce) and the Department of Labour. Resultant series of index numbers are computed from different points of view. The computations of the Labour Department are designed to show changes in the cost of living for workingmen in cities. They are constructed from family budgets, principally a weekly family budget of staple foods, fuel and rent published monthly in the *Labour Gazette* since 1915 and annually since 1911; in addition, figures are included for clothing and sundry items and further data for fuel, light and rent. The Labour Department aims, by this method, to have a basis for computation that can be readily applied to the data for any given locality or district at any time, or for any class of labour—for instance, coal miners, who usually do not live in cities. Index numbers of retail prices and costs of living issued by the Bureau are constructed from a more general point of view, having for their object the measurement of the general movement of such prices and costs in the Dominion as a whole, and being so calculated as to make comparisons possible with other general index numbers constructed on similar principles, for example, the index of wholesale prices. Calculated as they are on the aggregative principle, *i.e.*, the total consumption of each commodity, the Bureau's index numbers afford an excellent measurement of changes in the average cost of living in the Dominion as distinguished from that of any particular class or section.

In the Bureau's index, 1926 is taken as the base year and is represented by 100 to bring it into conformity with other series of index numbers shown in this chapter. A description of the system of weighting of individual items, sub-groups and groups, and of the method of construction of this index number was given at pp. 812-818 of the 1931 Year Book. The Labour Department uses 1913 as 100 for both cost of living and wages index numbers. As will be seen from Table 7, the general cost of living index moved up from 77.7 in 1933 to 78.9 in 1934, following a steady decline from 1929 to 1933. Higher prices for foods and clothing were chiefly responsible for the advance. Rents declined from 85.1 to 80.1. The monthly index for living costs fluctuated during 1934 between 78.2 and 79.9, the December figure standing at 79.0. January and December group indexes were as follows: foods 67.7 and 69.3; fuel 87.4 and 88.4; rent 80.4 and 80.3; clothing 69.2 and 71.0; sundries 92.7 and 92.6.

### 7.—Index Numbers of Retail Prices, Rents and Costs of Services, 1913-34.

<sup>1</sup> Subject to revision.    <sup>2</sup> Revised since the publication of the 1933 Year Book.

**The Family Budget.**—A family budget constructed by the Department of Labour appears regularly in the *Labour Gazette*. This budget material has been used by the Bureau to obtain the tables which follow.

Table 9 shows the average prices of items included in the family budget in 1920 and in each of the years from 1925-34. These numbers are weighted by the quantities used by the Department of Labour in computing their monthly family budget. Table 10 gives the group indexes by provinces. An examination of the tables reveals the course of the budget, consisting of food, fuel and lighting, and rent, over the period shown.

### 9.—Prices of a Family Budget of Staple Foods, Fuel and Lighting, and Rent, for Sixty Cities in Canada, 1920 and 1925-34.

| Commodity.                                        | Unit.  | 1920.        | 1925.        | 1926.        | 1927.        | 1928.        | 1929.        | 1930.        | 1931.        | 1932. <sup>1</sup> | 1933.        | 1934. <sup>2</sup> |

## Section 3.—Index Numbers of Security Prices.

Many important advances have recently been made in the direction of improving the technique of making index numbers of security prices. The chief of these are: first, the computation of index numbers to serve different purposes; secondly, weighting of the index numbers so that they will accurately represent the market—an accurate index of market trends cannot be made on the basis of a simple average of market quotations or on any system which does not consider weighting; thirdly, using weighted average prices of individual securities rather than the average of high and low quotations or closing quotations. This last point is of considerable importance, because the average price at which a stock sells on a certain day frequently differs widely from the average of its high and low quotations or its closing price.

# 11.—Investors Index Numbers of (1926=

NOTE.—For earlier figures, see p. 815 of the 1933 Year Book, p. 695 of the 1932 Year Book, p. 823 of the Year Book.

<sup>1</sup> Subject to revision.

In the revised index numbers of security prices which have recently been issued by the Bureau full use of the improvements mentioned has been made, and these index numbers are now in line with the most advanced technique pertaining to the making of such indexes. In the revision, the base of the calculations was also changed. The basic period is now the year 1926, that is, prices prevailing in that year are taken as 100 and subsequent price movements are expressed as a percentage. The year 1926 was chosen as the base in conformity with the tendency which now prevails to substitute a post-war for a pre-war year. This year was also chosen in order to enable comparisons to be made with important indexes in the United States.

**Investors Index Numbers of Common Stocks.**—Monthly figures for the investors index number of common stocks, computed by the Dominion Bureau of Statistics on the basis 1926=100, have been carried back to 1913. The index falls into two parts, *viz.*, the period subsequent to 1926 and the earlier period. For the period 1913 to 1926 those stocks were used which were included in the index number previously issued on the 1913 base, *viz.*, 31 industrials, 10 public utilities

and 9 banks, or 50 stocks in all. In the subsequent period the list of stocks included in the monthly index numbers was enlarged and now contains 87 industrial, 20 domestic utilities, 6 companies located abroad and 8 bank stocks. Despite the difference in the number of stocks included, the trend of stock prices is adequately shown throughout the whole period. The larger number of stocks included in the revised index number, though adding little to the accuracy of the general index, gives more complete information regarding various groups of stocks traded on Canadian exchanges.

Banks are included in the monthly index numbers but not in the weekly, the trading in such securities not being, as a rule, sufficiently important to warrant their inclusion in a weekly index. In any case, their inclusion does not affect the general index by more than a point or two.

The general movement of common stock prices was upward in the first four months of 1934, with the average increase amounting to about 20 p.c. Roughly two-thirds of this gain was lost in the succeeding three months, after which an irregular recovery placed prices at the end of the year approximately 15 p.c. above levels at the beginning. Considerable variation occurred in the movements of

different groups of stocks. Industrials generally followed the course outlined above for all common stocks. Within this group, however, price behaviour varied widely. Beverages dropped sharply from 163.6 in January to 86.7 in July, and then recovered to 93.6. Oils moved almost steadily upward throughout the year from 147.0 to 177.8. Pulp and paper fluctuated narrowly between 9.6 and 13.8. The size of these numbers and the difference in the movements indicated, gives some idea of the variety existing in the industrial price field. The index for utilities declined gradually after the first three months of the year from 58.8 to 47.5. This index averaged 70 points less than the one for industrials during 1934. In other words, industrials were 23 p.c. above 1926 price levels, while utilities were 47 p.c. lower than at that time.

**Weighted Index Numbers of Mining Stocks.**—A weighted index number of mining stocks is computed by the Dominion Bureau of Statistics on the basis 1926=100. Mines of a semi-industrial nature, such as International Nickel and Consolidated Mining and Smelting Company, do not appear here but are included in the Bureau's investors index of common industrial and public utility stocks.

Mining stock prices advanced rapidly during the first quarter of 1934, and were fairly steady during the second and third quarters. They declined rather sharply in October and November, but advanced moderately during December. An index of gold-stock prices showed a net increase for the year of roughly 24 p.c. Gold stocks continued to advance for six months after prices for gold itself had ceased to rise, and similarly the total appreciation in gold-stock prices since the mint par of \$20.67 per ounce was abandoned, has been very much greater than the currency premium established on gold. An index of base-metal stock prices was 129.6 in December, as compared with 128.3 in January, and 164.2 in June, when prices were at the highest point of the year.

**12.—Weighted Index Numbers of Prices of Mining Stocks, by Months, January, 1932, to March, 1935.**

#### Section 4.—Prices of Services.

A study of the prices of services sheds considerable light on the cost of living as such services are a considerable item in the average family budget. Information with regard to the trend of street-car fares, of rates for manufactured and natural fuel-gas, of domestic electric light rates and of telephone charges was published on pp. 801-804 of the 1927-28 Year Book. Later information shows that the prices of manufactured fuel-gas have shown a downward tendency, the Dominion index number for 1933 being 94.4, as compared with 100.0 in 1926. The index number of the price of natural fuel-gas also declined from 100.0 in 1926 to 92.5 in 1930, rose again to 94.3 in 1932, then declined to 93.9 in 1933.

On the other hand, telephone rates have shown a distinct increase, the Dominion index number of domestic telephone rates having risen from 100.0 in 1926 to 107.4 in 1933. Again, the business telephone rate has risen from 100.0 in 1926 to 118.5 in 1933.

Additional information and details by provinces regarding the prices of services will be found on pp. 178-188 of the Annual Report on Prices and Price Indexes, 1913-33, issued by the Dominion Bureau of Statistics.

**Hospital Charges.**—In view of discussions of the increased cost entailed by illness and hospital treatment, special investigations on hospital charges are now made annually and the results are given as Dominion averages in the following table. In general this shows that hospital charges in 1930 were 87 p.c. above the 1913 level. From 1930 to 1933 rates gradually declined to less than 83 p.c. above those in 1913. Operating room charges have not increased at the same rate as room charges, being only 56 p.c. above those in 1913, while the latter averaged 90 p.c. higher. The cost of maintaining patients in hospitals declined about 9 p.c. between 1931 and 1933.

The detailed results of this investigation, including the statistics by provinces, are to be found on pp. 179-182 of the Annual Report on Prices and Price Indexes, 1913-33, issued by the Dominion Bureau of Statistics.

### Section 5.—Index Numbers of Interest Rates.

Few economic statistics are of more significance than the net rates of interest paid on absolutely the safest securities, such as government bonds maturing on a fixed and definite date. Other interest rates naturally grade upward from the rates which the safest of possible borrowers has to pay, and from the fluctuations of that price an idea may be obtained as to the relation between the supply of, and the demand for, funds for investment.

Prior to the War the funded debt of the Dominion was entirely held outside the country, there being no home market for Canadian Government bonds. Since about the beginning of the century, however, the province of Ontario, the wealthiest and most populous of the provinces of the Dominion, has done its financing largely in Canada itself, and the fluctuation in the rate of yield of Province of Ontario bonds is thus the best long-term indicator of net interest rates in the Dominion. These yields, compiled originally by Wood, Gundy and Co., of Toronto, and furnished by that firm to the Bureau of Statistics, have been recalculated as index numbers on a 1926 base and are shown in Table 14, a particularly interesting feature being the decline in the interest rates index from the high point of 129.4 in October, 1920, to 87.7 in February of 1928. Since the latter date, the scarcity of funds for this type of investment forced the index number up to 104.4 in May and September,

1929, from which point it gradually declined to 92.9 in September, 1930. In January and February, 1931, it had risen to 95.0 but in March and April it declined to 92.9 and in May to 91.9. In the fall months of 1931 yields began to advance sharply, reaching a peak in January, 1932. Tension in financial markets eased appreciably in the latter half of that year, and funds for long-term investment were increasingly plentiful during the next two years. Lower bank interest rates were accompanied by a rise in bond prices in 1934 to the highest level since 1906, and of course a corresponding decline occurred in bond yields. The Province of Ontario bond yield index declined from 99.2 in January, 1933, to 76.2 in December, 1934, rising to 80.8 for April, 1935.

## Section 6.—Index Numbers of Import and Export Valuations.

Index numbers of import and export valuations have been computed by the Bureau of Statistics since 1920 and are shown in Table 15 for the calendar years 1924-33. Fifty export and 60 import commodities are included in the calculations. The year 1913 has been taken as the base. Index numbers were calculated on the aggregative principle and both an individual and a group system of weighting has been used on the basis of quantities imported or exported.\*

\*For list of commodities included, see Appendix A of "Prices and Price Indexes, 1913-28".

## 15.—Index Numbers of Export and Import Valuations, calendar years 1924-33.

(1913=100.)

## EXPORTS.

| Group.                                     | Number of Items. | 1924.        | 1925.        | 1926.        | 1927.              | 1928.        | 1929.        | 1930.        | 1931.       | 1932.       | 1933.       |

## CHAPTER XXI.—PUBLIC FINANCE.

The following treatment of public finance includes an outline of Dominion, provincial and municipal finance in Canada, supported by the necessary detailed statistics, and closes with a brief discussion of the national wealth and national income of the Dominion as the basis of all public finance.

The great increase in Dominion expenditure since 1913 has, of course, been mainly due to the Great War and the burden of interest, pension charges, soldiers' civil re-establishment, etc., resulting from the War. Similar increases have also taken place during the same period in provincial and municipal expenditures. Thus, in their fiscal years ended 1933, the total ordinary expenditure of the nine Provincial Governments was \$200,528,217 as compared with \$53,826,219 in 1916, only 17 years before—an increase of almost 273 p.c. (The aggregate interest payments of Provincial Governments rose from \$7,817,844 in 1916 to \$62,546,792 in 1933.) Again, between 1913 and 1932, the aggregate taxes imposed by the municipalities of Ontario increased from \$34,231,214 to \$126,835,014—an increase of 270·5 p.c. In Quebec the ordinary receipts of municipalities increased from \$33,865,750 in 1915 to \$85,798,988 in 1932—an increase of 153·4 p.c. In Manitoba the increase in municipal taxation has been from \$7,730,122 in 1913 to \$20,598,300 in 1932—an increase of 166·5 p.c. In Saskatchewan the grand total of municipal tax levies was \$13,358,627 in 1914 and \$24,388,477 in 1932. In Alberta the municipal taxes levied amounted to \$9,791,846 in 1914 and to \$15,453,640 in 1932. In British Columbia the taxes collected by the municipalities totalled \$9,382,099 in 1917 and \$17,089,972 in 1932. Finally in the extreme east the aggregate tax receipts of the municipalities of Nova Scotia were \$6,613,675 in 1932 as compared with \$3,443,681 as recently as 1919—an increase of 92·1 p.c. in the last thirteen years. The seven provinces covered by these statistics contained in 1931 approximately 95 p.c. of the population of the Dominion.

### Section 1.—Dominion Public Finance.\*

**Historical Sketch.**—Both under the French *régime* and in the earlier part of the British, the territorial or casual revenues of Canada, consisting of certain seigniorial dues and the proceeds of the sale of government timber and land, were reserved to the Crown, while the right of levying taxes and of regulating the trade and commerce of the colony was, after 1763, deemed to be vested in the British Parliament.

By the Quebec Act of 1774, certain duties on spirits and molasses were imposed, to be expended by the Crown in order to provide a revenue "towards defraying

\* The statistics in this section have been made up from the Public Accounts and were finally revised by the Department of Finance, with the exception of those parts dealing with war tax revenue and inland revenue on pp. 896 to 902, which were revised by the Department of National Revenue.

the expenses of the administration of justice and the support of the civil government of the province". A little later, in 1778, the British Government, by the Declaratory Act (18 Geo. III, c. 12), renounced forever the right of taxing the colonies to provide Imperial revenue, but maintained its claim to impose duties considered necessary for the regulation of trade, the proceeds to go towards defraying the expenditures of the colonial administration. After the Constitutional Act of 1791, the customs duties remained under the control of the Imperial Government, their revenue, as well as the territorial revenue above mentioned, coming in to the Executive Administration independently of the Legislative Assembly and thus making the Executive power largely independent of the Legislature. In case these revenues proved insufficient, recourse could generally be had to the grant made by the Imperial Government for the support of the army. As time went on, however, the Crown revenues became more and more inadequate to meet the increasing expenditure, while the wave of economy in the United Kingdom after 1815 made it impossible any longer to supplement these revenues from military sources. On the other hand, the purely provincial revenues collected under the authorization of the Provincial Legislature showed an increasing surplus. The power of the purse thus began to pass into the hands of the Legislatures; further, in 1831 the British Parliament passed an Act placing the customs duties at the disposal of the Legislatures.

Under the Act of Union, a consolidated revenue fund was established. All appropriation bills were required to originate in the Legislative Assembly, which was forbidden to pass any vote, resolution or bill involving the expenditure of public money unless the same had first been recommended by a written message of the Governor General. The British Government surrendered all control of the hereditary or casual revenues, which were thenceforth paid into the treasury of the province to be disposed of as its Legislature should direct.

At the interprovincial conference which took place prior to Confederation, it was decided that the new Dominion Government, which was to take over permanently, as its chief source of revenue, the customs and excise duties that had yielded the greater part of the revenues of the separate provinces (direct taxation being as unpopular in British North America as in other new countries), was also to assume the provincial debts and to provide out of Dominion revenues definite cash subsidies for the support of the Provincial Governments. (See Tables 16 and 17.) Until the Great War, which made other taxes necessary, the customs and excise revenue constituted the chief resource of the Dominion Government for general purposes—the Post Office revenue and the Government railway receipts, which are not taxes at all, being mainly or entirely absorbed by the expenses of administering these services. Indeed, for many years preceding the War, customs and excise duties, together with the revenue from the head tax on Chinese immigrants, were the only items of receipts which were classified as taxes by the Department of Finance. In the last pre-war fiscal year these two items aggregated \$126,143,275 out of total receipts on consolidated fund account amounting to \$163,174,395,

the Post Office and Government railways furnishing between them \$26,348,847 of the remainder, offset, however, by expenditures on these two services amounting to \$27,757,196. Miscellaneous revenue, largely fees, amounted in that year to \$10,-682,273—a comparatively small fraction of the total. As both customs and excise taxes were indirect, the average Canadian felt but little the pressure of taxation for Dominion purposes.

The War enormously increased the expenditure, and this increase had in the main to be met by loans. It is, however, a cardinal maxim of public finance that, where loans are contracted, sufficient new taxation should be imposed to meet the interest charge upon the loans and to provide a sinking fund for their ultimate extinction. This war taxation was begun in Canada within the first weeks of the War when, in the short war session of August, 1914, increases were made in the customs and excise duties on various commodities, including coffee, sugar, spirituous liquors and tobacco. In 1915 special additional duties of 5 p.c. *ad valorem* were imposed on commodities imported under the British preferential tariff and 7½ p.c. *ad valorem* on commodities imported under the intermediate and general tariffs, certain commodities being excepted. New internal taxes were also imposed on bank circulation, on the income of trust and loan companies, on insurance in other than life and marine companies, on telegrams and cablegrams, railway tickets, sleeping-car berths, etc., also on cheques, postal notes, money orders, letters and post cards. In the following year, the business profits war tax (dropped in 1921)\* was introduced, and in 1917 an income tax was imposed. In 1918 both of these taxes were increased and their application widened, and in 1919 the income tax was again increased, and still further augmented in 1920 by a surtax of 5 p.c. of the tax on incomes of \$5,000 and over; the sales tax was also introduced in that year. The cumulative result of these war taxes was that, in the fiscal year ended Mar. 31, 1921, customs duties were for the first time displaced from their position as the chief factor in Canadian revenue, the war taxes yielding \$168,385,327, as against the customs yield of \$163,266,804. In 1922 war taxes yielded \$177,484,161, while the yield of the customs fell to \$105,686,645. Again, in 1923 the war taxes yielded \$181,634,875 and customs duties \$118,056,469, in 1924 \$182,032,661 and \$121,500,798, in 1925 \$147,164,158 and \$108,146,871, in 1926 \$157,296,320 and \$127,355,144, in 1927 \$156,167,434 and \$141,968,678. In 1928, however, the customs duties yielded \$156,985,818 as against \$150,319,087 collected by the war taxes, in 1929 \$187,206,332 as against \$145,029,742, in 1930 \$179,429,920 as against \$134,086,005, and in 1931 \$131,208,955 as against \$107,320,633. The situation was again reversed in 1932, when war taxes yielded \$122,266,064 and customs duties \$104,132,677; in 1933, when war taxes were \$146,412,011 as against \$70,072,-932; and in 1934, when they were \$170,051,973 as against \$66,305,356 for customs duties.

\* Related revenue from this tax has been collected in subsequent fiscal years down to 1933 (see Table 8, p. 897).

A more detailed sketch of the changes made in taxation from 1914 to 1926 will be found at pp. 755-759 of the 1926 Year Book, while similar information re tax changes in 1927 to 1929 was given at pp. 791-792 of the 1930 Year Book.

**Recent Modifications in the System of Taxation.**—In 1930, the general rate of the sales tax was reduced from 2 to 1 p.c. *Bona fide* co-operative organizations, government or like annuities (to the extent of \$5,000), and donations to churches, schools and hospitals (to a maximum of 10 p.c. of the net income of the taxpayer) were exempted from income tax, and the \$500 exemption for children was extended to cover certain dependent relatives suffering from mental or physical infirmity. In the customs tariff, the iron and steel schedules were completely revised, seasonal tariffs were adopted in respect of fruits and vegetables, duties were reduced under certain tariffs on tea, porcelain and chinaware and meats and increased on beans and butter, and so-called countervailing duties were imposed in respect of 16 commodities. The year was unusual in that it saw a second tariff revision, namely, that of the special session of September, when the anti-dumping clauses of the tariff were re-written and very many changes were made in rates of duty in the schedules. Increases were made *inter alia* on most agricultural products, on printed matter and manufactures of paper, on numerous commodities in the iron and steel group, on a wide range of textile items and on boots and shoes. Power was granted to the Governor in Council to prohibit the importation into Canada of goods exported to the Dominion from any country not a contracting party to the Treaty of Versailles.

In 1931, the general rate of the sales tax was increased from 1 to 4 p.c. Tax-free limit for cheques, receipts for money paid by banks, money orders, travellers cheques and Post Office money orders was reduced from \$10 to \$5 and postage stamps could be used on such documents in lieu of excise tax stamps. A special excise tax of 1 p.c. was imposed on importations. As regards the customs tariff, the 1931 session saw several further amendments of the administrative clauses of the tariff, the powers of the Governor in Council in the matter of the making of tariffs being widened to include the granting and withdrawing of rates more favourable than those of the British preferential tariff. Provision was made for penalty in the case of any person guilty of using the tariff to increase prices to consumers. Rates were altered on many items, the countervailing duties having been rescinded in entirety at the special session in September, 1930. Increases were made on fresh and canned meats, tea, field and garden seeds, prepared foods, containers, wall-boards, spray mixtures, building stone and granite, steel plate, motor vehicles, wood veneers, various textiles, coal and coke, leather and leather goods, and numerous other commodities. The importation of second-hand motor vehicles, except under specified exceptional circumstances, was prohibited.

In April, 1932, the income tax was raised to 11 p.c. on corporations and joint-stock companies. In the case of personal incomes, the deduction of 20 p.c. formerly allowed from the tax payable under the established schedule of rates was repealed;

a surcharge of 5 p.c. was made on net incomes of over \$5,000 and the exemptions were reduced from \$3,000 to \$2,400 for married persons, and from \$1,500 to \$1,200 for single persons. These changes applied to 1931 incomes. The sales tax was increased by 2 p.c. to 6 p.c., and the special excise tax on goods imported into Canada was raised from 1 p.c. to 3 p.c. The stamp tax on cheques, promissory notes, money orders, etc., was increased from 2 cents for each instrument over \$5, to 3 cents on amounts between \$5 and \$100, and 6 cents over \$100. Sleeping-car tickets were taxed 10 p.c. (minimum 25 cents) and parlour-car tickets 10 cents flat; there were also changes in the tax rates of cable and telegraphic messages and in the stock and bond transfer tax. No important tariff changes were made in view of arrangements for the then pending Imperial Economic Conference. (The tariff changes resulting from the Imperial Economic Conference and enacted at the fourth session of the 17th Parliament, which opened on Oct. 6, 1932, were briefly dealt with on pp. 485-486 of the 1933 Year Book.)

In 1933, the tax on corporation incomes was raised to  $12\frac{1}{2}$  p.c. and the \$2,000 exemption was removed. Where a consolidated statement of a company and its subsidiaries was compiled, the tax rate was set at  $13\frac{1}{2}$  p.c. On personal incomes the exemption was reduced from \$2,400 to \$2,000 for married or from \$1,200 to \$1,000 for single persons, and the exemption for dependent children was lowered from \$500 to \$400. The rate of taxation was increased according to a new schedule, the tax on the first \$1,000 of taxable income being 3 p.c. In certain cases, new taxes of 5 p.c. were imposed at the source on interest or dividends paid by Canadian debtors to non-residents (Dominion Government bonds were exempt from this tax), or to residents where such interest or dividend is paid in funds which are at a premium in relation to Canadian exchange. The sales tax remained at 6 p.c., though with a view to additional revenue an adjustment of the exempt and the partly exempt lists was made. Special excise taxes were levied as follows: 10 p.c. on cosmetics and toilet preparations; 5 p.c. on automobile tires and tubes; 2 cents per lb. on refined sugar; 25 cents per gallon on unfermented wort; and 50 cents per lb. on malt syrup and malt products. The provision of the Special War Revenue Act exempting from the stamp tax cheques, receipts to banks, money orders, travellers cheques, etc., not exceeding \$5 in value was repealed (except as regards creamery tickets or cheques). The stamp tax on postal notes was raised from 1 to 3 cents. Cigarette papers and tubes were taxed 2 cents per hundred leaves and 5 cents for 50 tubes, respectively. The excise duty on distilled spirits used in the manufacture of proprietary medicines, extracts, perfumes, etc., was made \$2.50 per proof gallon and an excise duty of \$1 per proof gallon was imposed on spirits distilled from juices of native fruits used by wine manufacturers in fortifying native wines.

In 1934, the tax changes proposed were of limited character. The chief changes were the reduction of the excise tax on sugar by 1 cent per lb. and the proposed imposition of a tax of 10 p.c. on gold, to be deducted from the proceeds of all gold

deposited at the Mint for sale and to replace the revenue lost by the partial remission of the tax on sugar. It was pointed out that the recent prosperity of the gold-mining industry was due largely to circumstances entirely external to the industry, *viz.*, an increase in the selling price of gold by about 70 p.c. as a result of the chaotic condition of world currencies, the depreciation of our dollar in foreign exchanges and the revaluation of gold in certain countries. As finally approved, the legislation provided for a levy of 25 p.c. on the premium value of gold in place of 10 p.c. on the total value, and it was further provided that the tax should not reduce the amount received by the depositor below \$30 per oz. Further, only those mines which had paid dividends continuously since 1933 were made liable to the premium tax on gold, thus relieving from taxation newly developed or low-grade properties which have not, until recently, been operating profitably. Placer gold was also exempted. Producers paying the tax were allowed some compensation in income tax adjustment and in exemption from the usual handling charge at the Mint. Excise duties were changed principally by consolidating the duty of 3 cents per lb. on malt and the gallonage tax of  $12\frac{1}{2}$  cents on beer into a single excise duty of  $7\frac{1}{2}$  cents per lb. on malt, the net result being a slight reduction in the rate of taxation to which beer was directly or indirectly subject, calculated on a gallonage basis. Reductions under the British preferential customs tariff were made in the case of certain items of major commercial importance, including jute yarns, wide steel plates, salt cake, crude oil not in its natural state, impregnated canvas, and yarns of artificial silk. Numerous chemical commodities of a less important nature were returned to the free list. Duties were imposed under the intermediate or general tariff schedules on pea-nut oil and were increased on certain ferro-alloys. Duties on jute twines were increased under all tariffs. On all imports under the British preferential tariff, the special excise tax was reduced from 3 to  $1\frac{1}{2}$  p.c.

### Subsection 1.—The Current Balance Sheet of the Dominion.

A summary review of the current financial situation of the Dominion as at Mar. 31, 1933 and 1934 is given in the balance sheets shown as Table 1. This shows the figures for gross debt on the above dates to have been \$2,996,366,665 and \$3,141,042,097 respectively, partly offset by active assets aggregating \$399,885,839 and \$411,063,956, leaving the figures for net debt at \$2,596,480,826 and \$2,729,978,141 respectively.\* Non-active assets, including such public works as canals and railways, also loans to railways, amounted in the aggregate to \$1,785,063,662 and \$1,794,558,864, leaving debit balances on Consolidated Fund Account on Mar. 31 of \$811,417,164 and \$935,419,276 respectively. The details of the various assets and liabilities are contained in the schedules accompanying the balance sheet and printed in the Public Accounts.

\* The net debt on Mar. 31, 1925 was \$2,417,437,686; on Mar. 31, 1926, \$2,389,731,099; on Mar. 31, 1927, \$2,347,834,370; on Mar. 31, 1928, \$2,296,850,233; on Mar. 31, 1929, \$2,225,504,705; on Mar. 31, 1930, \$2,177,763,959; on Mar. 31, 1931, \$2,261,611,936, and on Mar. 31, 1932, \$2,375,846,172. See Table 20, p. 908.

## 1.—Balance Sheet of the Dominion of Canada, as at Mar. 31, 1933 and 1934.

(From the Public Accounts.)

| Item.                                                                                                                                       | 1933.         | 1934.         |

| Public Works, railways.....                                                                                                                 | 443,546,600   | 443,182,346   |
| Public Works, miscellaneous.....                                                                                                            | 247,245,431   | 252,124,944   |
| Military property and stores.....                                                                                                           | 12,035,420    | 12,035,420    |
| Territorial accounts.....                                                                                                                   | 9,895,947     | 9,895,948     |
| Railway accounts (old).....                                                                                                                 | 88,398,829    | 88,398,829    |
| Railway accounts (loans non-active).....                                                                                                    | 655,527,456   | 655,527,456   |
| Canadian National Steamships (loans non-active).....                                                                                        | 15,367,531    | 15,353,467    |
| Miscellaneous investments and other accounts (non-active).....                                                                              | 72,941,777    | 75,960,711    |
| Balance Consolidated Fund as at Mar. 31 of preceding year.....                                                                              | 667,125,994   | 811,417,164   |
| Excess of expenditure over revenue, year ended Mar. 31.....                                                                                 | 144,291,170   | 124,002,112   |
|                                                                                                                                             | 2,596,480,826 | 2,729,978,141 |
| <b>LIABILITIES—</b>                                                                                                                         |               |               |
| Dominion Notes in circulation.....                                                                                                          | 180,926,882   | 172,617,922   |
| Bank Note Circulation Redemption Fund.....                                                                                                  | 6,584,813     | 6,486,355     |
| Post Office account, money orders, postal notes, etc., outstanding.....                                                                     | 2,184,456     | 3,570,744     |
| Post Office Savings Bank deposits.....                                                                                                      | 23,920,915    | 23,158,919    |
| Insurance and superannuation funds.....                                                                                                     | 98,500,189    | 109,481,507   |
| Trust funds.....                                                                                                                            | 18,525,396    | 18,271,120    |
| Contingent and special funds.....                                                                                                           | 2,594,601     | 4,441,481     |
| Province accounts.....                                                                                                                      | 9,623,817     | 9,623,817     |
| Funded Debt.....                                                                                                                            | 2,651,898,934 | 2,791,706,560 |
| Interest due and outstanding.....                                                                                                           | 1,606,662     | 1,683,672     |
| Total Liabilities or Gross Debt.....                                                                                                        | 2,996,366,665 | 3,141,042,097 |

<sup>1</sup> Indirect Liabilities—Guarantees given by the Dominion of Canada are listed on pp. 912-915.

### Subsection 2.—Receipts and Disbursements.

The receipts of the Dominion Government on Consolidated Fund Account for the fiscal year ended Mar. 31, 1934, were \$324,062,000, an increase of \$17,425,010 as compared with the preceding year; besides these, special receipts amounted to \$409,271—a total of \$324,471,271 (Table 2). The regular expenditure on Consolidated Fund Account was \$346,648,546, while special expenditure, including net income deficit of the Canadian National Railways for 1933, amounted to \$101,733,833. There were also a net expenditure on capital account of \$6,490,333 and other net expenditures of \$3,095,873, including advances to Harbour Commissioners (non-active) \$2,109,837. Thus the total disbursements, inclusive of these and other advances, amounted to \$457,968,585. There was an increase of \$133,497,315 in the net debt (gross debt less active assets) during the year. (See Table 24 for interest-bearing debt.)

Detailed statistics of receipts and disbursements are contained in Tables 2 and 3. Tables 4 and 5 are historical tables giving the figures of the main items of Dominion receipts and expenditure since Confederation, while Table 6 shows the per capita receipts and expenditure for these years, calculated on census and estimated populations. Per capita receipts and expenditures are given by principal items in Table 7.

### 2.—Details of Revenue Receipts, fiscal years ended Mar. 31, 1930-34.

| Item.                                        | 1930.              | 1931.              | 1932.              | 1933.                | 1934.              |
|----------------------------------------------|--------------------|--------------------|--------------------|----------------------|--------------------|

<sup>1</sup> The policy regarding the recording of premium, discount and exchange has been changed since 1932, the net balance only being shown for 1933 and 1934 in place of the receipts and disbursements on this account as in former years.

## 3.—Details of Expenditures, fiscal years ended Mar. 31, 1930-34.

NOTE.—"Adulteration of food", \$120,927, "Marine hospitals", \$135,218, and "Quarantine", \$125,827, for 1934, have been classified in the Public Accounts under the heading "Health" since 1928, but are here deducted and shown separately so as not to break the comparability of the figures with those of earlier years. The Public Accounts item "Health" is therefore \$508,413 for 1934, compared with the \$126,441 shown here.

| Item.                                               | 1930.              | 1931.              | 1932.              | 1933.              | 1934.                |

<sup>1</sup> Expenditure on adjustments of war claims, \$94,996 less \$35,294 in 1930, \$110,371 less \$48,482 in 1931, \$91,323 less \$15,852 in 1932, \$54,738 less \$3,238 in 1933 and \$56,135 less \$8,564 in 1934.

<sup>2</sup> Net figure, includes large expenditures on Welland Ship Canal. See p. 748.

<sup>3</sup> Includes \$1,892,591 Government contributions to the Civil Service Superannuation Fund under the Act of 1924 (14-15 Geo. V, c. 69) in 1930, \$2,067,466 in 1931, \$2,228,626 in 1932, \$2,269,936 in 1933 and \$1,985,564 in 1934.

<sup>4</sup> Includes \$6,700,000 Reparations Claims for Compensation in 1930 and \$500,000 in 1931.

<sup>5</sup> Includes \$8,553,535 to cover 30 p.c. reduction of Soldier Land Settlement loans, in accordance with the Act of 1930, also \$4,431,655 on account of Unemployment Relief Act, 1930.

<sup>6</sup> Includes \$38,295,515 on account of Unemployment and Farm Relief Act, 1931, for 1932; \$36,720,935 for 1933; and \$35,898,311 for 1934.

<sup>7</sup> Includes \$53,422,662 in 1933 income deficit of the Canadian National Railways incurred in the calendar year 1932 (exclusive of Eastern Lines); \$58,955,388 in 1934 (including Eastern Lines).

<sup>8</sup> Payments of \$1,241,778 less receipts of \$2,624,281 in 1933 and payments of \$985,936 less transfer of \$1,000,000 in 1934 from insurance fund due to decrease in the number of vessels operated.

<sup>9</sup> Previous to 1933 this item included only the Quebec Harbour Commissioners.

<sup>10</sup> Loans of previous years written down as non-active: Railways \$41,121,216, Harbour Commissioners \$21,817,023, and loan to C.P.R. \$1,447,223.

4.—Principal Items of Dominion Expenditure, 1868-1934 (continued on pp. 892-893).

NOTE.—From 1868 to 1906, inclusive, the fiscal years ended on June 30; after 1906, on Mar. 31.

<sup>1</sup> Expenditure (Collection of Revenue). After 1919 railway receipts were applied directly to railway expenditure; this accounts for the great decline in the figures in 1920 and subsequent years. <sup>2</sup> Includes various non-enumerated items. <sup>3</sup> Nine months. <sup>4</sup> See footnote to Table 2, p. 889.

<sup>1</sup> For detailed statement see Table 8, p. 897.<sup>2</sup> Includes various smaller items of revenue receipts.

<sup>3</sup> Nine months. <sup>4</sup> Inclusive of special receipts of \$1,905,648 in 1921, \$319,184 in 1922, \$8,479,310 in 1923, \$9,743,636 in 1924, \$4,680,913 in 1925, \$2,147,503 in 1926, \$1,756,704 in 1927, \$6,924,594 in 1928, \$4,687,607 in 1929, \$4,505,185 in 1930, \$6,573,577 in 1931, \$7,012,249 in 1932, \$4,489,339 in 1933, and \$409,271 in 1934. See Table 2, pp. 888-889.

**6.—Per Capita Figures of Taxation, Total Revenue Receipts, Expenditure on Consolidated Fund Account and Total Expenditure, 1868-1934.**

NOTE.—The years marked with an asterisk (\*) are those of the censuses, April 2, 1871; April 4, 1881; April 6, 1891; April 1, 1901; June 1, 1911, 1921 and 1931. For the intercensal years the populations are estimated as at June 1 (see p. 164 for estimates of population). The fiscal period of 1907 is nine months ended Mar. 31. See the tables on pp. 891-894 for the figures of revenue and expenditure on which this table is based.

| Fiscal Year. | Per Capita Revenue from Taxation. | Per Capita Total Revenue Receipts. | Per Capita Expenditure on Consolidated Fund Acct. | Per Capita Total Disbursements. | Fiscal Year. | Per Capita Revenue from Taxation. | Per Capita Total Revenue Receipts. | Per Capita Expenditure on Consolidated Fund Acct. | Per Capita Total Disbursements. |

#### Subsection 3.—War Tax Revenue.

An account of the various war taxes, imposed in 1915 and subsequently, has already been given on pp. 883-886 in the introduction to this section. For convenience of reference, the amounts received from these taxes since the beginning are segregated and the totals paid in to the Receiver General are given in Table 8. The taxes imposed on banks, trust and loan companies and insurance companies are collected by the Department of Finance. The excise war taxes, the business profits war tax and the income war tax are collected by the Department of National Revenue, formerly the Customs and Excise Department. The amounts of excise war taxes collected from different sources in the past six fiscal years are given in Table 9, while Tables 10 and 11 contain the details by provinces for the two latest years. (See also Tables 40 to 45 of this chapter.)

**8.—War Tax Revenue Received by the Receiver General, fiscal years ended Mar. 31, 1915-34.**

### Subsection 4.—Inland Revenue.

Under the Inland Revenue Act (R.S.C., 1906, c. 5), the Department of Inland Revenue had the control and management of standard weights and measures and of the collection of excise duties, of stamp duties, internal taxes, bridge and ferry tolls and rents until 1918. It administered the Statutes which dealt with the adulteration of food and other articles, electricity and gas inspection, patent medicines, petroleum, naphtha and the analysis of fertilizers and feeding stuffs. This department also established the food standards, which were put into force by Orders in Council under the authority of Section 26 of the Adulteration Act. Later the administration of the Adulteration of Food and the Proprietary and Patent Medicine Acts was transferred to the Department of Health, that of the Commercial Feeding Stuff and Fertilizers Acts to the Department of Agriculture, and that of the Acts relating to weights and measures and the inspection of gas, electric light and water meters to the Department of Trade and Commerce. By Order in Council of May 18, 1918, the Departments of Customs and of Inland Revenue were combined as the Department of Customs and Inland Revenue, under one Minister of the Crown. On June 4, 1921, the Department of Customs and Inland Revenue was consolidated as the Department of Customs and Excise (11-12 George V, c. 26). As from April 1, 1927, the name of this department, which collects the great bulk of the revenue of the Dominion, was changed to Department of National Revenue by authority of 17 Geo. V, c. 34. This Act provides for three chief departmental officers—the Commissioner of Customs, the Commissioner of Excise and the Commissioner of Income Tax, while an Assistant Commissioner of Customs may also be appointed.

In the fiscal year ended Mar. 31, 1934, the gross amount of customs duties collected by the department was \$73,154,472, as compared with \$77,271,965 in 1933, \$113,997,851 in 1932, \$149,250,992 in 1931, \$199,011,628 in 1930 and \$200,479,505 in 1929. The total of excise duties and excise war taxes collected in the fiscal year ended Mar. 31, 1934, was \$145,176,663, as compared with \$123,478,841 in 1933, \$109,586,366 in 1932, \$93,986,975 in 1931, \$129,822,444 in 1930 and \$148,376,494 in 1929.<sup>1</sup> The total of income tax collected in the fiscal year ended Mar. 31, 1934, was \$61,399,172, as compared with \$62,066,697 in 1933. While the income tax and the business profits war tax (see Table 8) are collected by the Commissioner of Income Tax, the other main branches of inland revenue—the excise duties and excise war taxes—are collected by the Commissioner of Excise.

**Canadian Excise Tariff.**—The following is a statement of the Canadian excise tariff, as existing at Jan. 1, 1935:—

|                                                                                                                                          |                                                                                          |
|------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|
| 1. Spirits distilled in Canada, per proof gal. . . \$ 7.00                                                                               | (b) Imported (in addition to any of the duties otherwise imposed), per gal. . . . . 0.07 |
| Except Spirits as follows:—                                                                                                              |                                                                                          |
| (a) Used in a bonded manufactory for medicines, extracts, etc., per proof gal. . . 2.50                                                  | 4. Malt:—                                                                                |
| (b) Used in a bonded manufactory for perfumes, per proof gal. . . . . 1.50                                                               | (a) Produced in Canada and screened, per lb. . . . . 0.06                                |
| (c) Used in a bonded manufactory for vinegar, per proof gal. . . . . 0.27                                                                | (b) Imported, per lb. . . . . 0.06                                                       |
| (d) Used for chemical compositions approved by Governor in Council, per proof gal. . . . . 0.15                                          | (c) Imported, crushed or ground, per lb. . . 0.08                                        |
| (e) Sold to licensed druggists for pharmaceutical preparations, per proof gal. . . 2.50                                                  | 5. Malt Syrup:—                                                                          |
| (f) Distilled from native fruits and used by a licensed wine manufacturer for fortification of native wines, per proof gal. . . . . 1.00 | (a) Produced in Canada, per lb. . . . . 0.10                                             |
| 2. Spirits imported (in addition to any of the duties otherwise imposed), per proof gal. . . . . 0.30                                    | (b) Imported, per lb. . . . . 0.16                                                       |
| 3. Beer or Malt Liquor:—                                                                                                                 | 6. Tobacco, Cigars and Cigarettes:—                                                      |
| (a) Brewed in whole or part from any substance other than malt, per Gal. . . . . 0.22                                                    | (a) Manufactured tobacco, per lb. . . . . 0.20                                           |
|                                                                                                                                          | (b) Cigarettes weighing not more than 3 lb. per M, per M. . . . . 4.00                   |
|                                                                                                                                          | (c) Cigarettes weighing more than 3 lb. per M, per M. . . . . 11.00                      |
|                                                                                                                                          | (d) Imported leaf tobacco, unstemmed, per lb. . . . . 0.40                               |
|                                                                                                                                          | (e) Imported leaf tobacco, stemmed, per lb. . . . . 0.60                                 |
|                                                                                                                                          | (f) Cigars, per M. . . . . 3.00                                                          |

<sup>1</sup>Table 9, p. 897, gives the details of the revenues from individual taxes for the years 1929-34 and Tables 10 and 11, pp. 898-899, give the revenues from individual taxes by provinces for 1933 and 1934.

A drawback of 99 p.c. of the duty may be granted when domestic spirits, testing not less than 50 p.c. over proof, are delivered in limited quantities to universities, scientific or research laboratories, or to any *bona fide* public hospital for medicinal purposes only.

**Revenue from Excise Duties.**—The inland revenue collected from excise duties, other than war taxes, is shown by items for the past six fiscal years in Table 12. Tobacco, including cigarettes, is shown by the figures to be supplying about 70 p.c. of the revenue from excise duties.

**12.—Details of Excise Duties Collected, fiscal years ended Mar. 31, 1929-34.**

(As shown in the Report of the Commissioner of Excise.)

**Alcohol and Tobacco Taken out of Bond.**—In Table 15 are shown the quantities of spirits, malt liquor, malt, cigars, cigarettes and tobacco taken out of bond for consumption in the fiscal years ended 1911 to 1934.

Between 1920 and 1934 the number of cigars taken out of bond fell from 270,089,761 to 115,988,080 and the quantity of tobacco, which was 23,049,012 lb. in 1920, had fallen to 20,870,651 lb. by 1925, since when there was a steady increase to 22,815,839 lb. in 1933. The consumption of cigarettes increased from 2,440,982,912 in 1920 to 5,082,314,590 in 1931 but declined to 4,401,628,765 in 1932, and 3,728,832,089 in 1933, rising again to 4,342,728,835 in 1934.

Between 1923 and 1929 spirits taken out of bond (exclusive of imported spirits) rose from 729,678 gal. to 2,016,802 gal., but there has been a decided and steady drop since 1929 to 769,527 gal. for 1933, with an increase to 933,946 gal. in 1934. Malt liquor shows an increase from 36,789,195 gal. in 1923 to 65,719,129 gal. in 1929 and a decrease to 40,105,883 gal. in 1934.

## 15.—Quantities of Spirits, Malt Liquor, Malt and Tobacco Taken Out of Bond for Consumption, fiscal years ended Mar. 31, 1911-34.

(For years prior to 1900 see 1916-17 Year Book, p. 528, and for 1901-10 see 1933 Year Book, p. 840.)

<sup>1</sup>Exclusive of imported spirits but inclusive of non-potable spirits down to 1921.

<sup>2</sup>Including snuff.

Subsection 5.—Subsidies and Loans to Provinces.

**Subsidies.**—Tables 16 and 17 show the subsidies and other payments made by the Dominion to each of the Provincial Governments for the individual fiscal years ended from 1929 to 1934 (Table 16), and the totals paid from Confederation to 1934 (Table 17). The provincial subsidies payable by the Dominion Government were originally settled by the British North America Act, 1867 (30 and 31 Vict., c.3, s. 118), but were revised by the British North America Act, 1907 (7 Edw. VII, c. 11). Under the revised settlement each Provincial Government receives: (a) a fixed grant according to population and (b) a grant at the rate of 80 cents per head of the population up to 2,500,000, and at the rate of 60 cents per head of so much of the population as exceeds that number. The province of British Columbia received an additional grant of \$100,000 per annum for a period of 10 years from 1907.\* An additional grant of \$100,000 per annum is payable to Prince Edward Island under an Act of 1912 (2 Geo. V, c. 42), and the payments to Manitoba were revised by the Extension of Boundaries (Manitoba) Act, 1912 (2 Geo. V, c. 32); in 1931 an amount of \$4,822,843 was paid as a readjustment in lieu of public lands from 1870 to 1908 as provided for in the Manitoba Natural Resources Act, 1930. Other payments to the Provincial Governments by the Dominion Government consist of special grants, such as compensation for lands, allowances for buildings, allowances in lieu of debt, allowances pending reconsideration of subsidies, etc.

\*See Canada Year Book, 1907, pp. xxxiii-iv.

<sup>1</sup>For the years 1928, 1929, 1930, 1931, 1932, 1933 and 1934, special grants, pending reconsideration of provincial subsidies, were granted to Nova Scotia, New Brunswick and Prince Edward Island as follows: Nova Scotia \$875,000, New Brunswick \$600,000, Prince Edward Island \$125,000 (not included in above table).

<sup>2</sup>\$4,822,843 of this amount was on account of readjustment of subsidy in lieu of Public Lands from 1870 to 1908, as provided for in the Manitoba Natural Resources Act, 1930.

17.—Total of Subsidy Allowances from July 1, 1867 to Mar. 31, 1934.

NOTE.—From p. 89 of the Public Accounts for 1934.

<sup>1</sup>Compensation for lands and allowances for buildings.

<sup>2</sup>Allowances in lieu of debt.

**Loans to Provinces.**—All of the provincial loans recently advanced by the Dominion have been made to the western provinces under the authority of relief legislation beginning with the Unemployment and Farm Relief Act 1931 and these have been secured by treasury bills of the respective provinces, bearing interest in the neighbourhood of 5 p.c. The sum total of such loans outstanding as at Mar. 31, 1934, was \$51,314,180.

In addition to these, however, there were also outstanding at that date \$10,168,688 of housing loans, being the balance of loans made to the provinces in the years following the Great War, on the authority of Orders in Council passed in 1918 and 1919, and of the Appropriation Acts of 1920 and 1921. Upon these loans the province of Ontario repaid the whole of the advances in 1928 and the other provinces concerned have in most cases reduced their indebtedness from year to year.

Table 18 gives details of the loans made by the Dominion Government to the provinces concerned on account of relief expenditures, and Table 19 shows the amounts outstanding as at Mar. 31 of each of the years 1920-34, on account of loans made for housing.

**Subsection 6.—National Debt.**

The gross national debt of Canada on Mar. 31, 1914, was \$544,391,369, as against assets of \$208,394,519, leaving a net debt of \$335,996,850. Comparatively small as was this debt, it was a debt incurred almost altogether either for public works of general utility which, like the Intercolonial and transcontinental railways and the canal system, remained assets, though perhaps not realizable assets of the nation, or was expended as subsidies to enterprises, which, like the Canadian Pacific Railway, though not government-owned, assisted greatly in extending the area of settlement as well as the productive and, therefore, the taxable capacity of the country. Broadly speaking, it was a debt incurred for productive purposes. Also, it was mainly held outside the country, the principal of the Dominion funded debt payable in London being \$302,842,485 on Mar. 31, 1914, as against only \$717,453 payable in Canada.

The great changes brought about in our national debt during the 20 years from 1914 to 1934 have been: (1) the enormous increase in net debt from \$335,996,850 to \$2,729,978,141; (2) the gross debt, having been largely incurred for war purposes, is not represented by corresponding assets; (3) the debt is now mainly held in Canada, \$2,083,307,268 being payable in Canada at Mar. 31, 1934.

**Recent Conversions and other National Debt Operations.\***—In 1931, extensive conversion and other operations in connection with the national debt were carried out as follows:—

On April 1, 1931, the 5 p.c. Public Service Loan of \$25,000,000 fell due in New York and was redeemed out of the proceeds of the loan negotiated in New York in the previous October, effecting a net annual saving in interest of \$155,000.

In May, a conversion offer was made in connection with the \$1,084,823,350 of funded debt maturing between then and Nov. 1, 1934. The opening offer was to convert \$250,000,000, the Minister of Finance reserving the right to increase the amount at any time before May 23. The basis was an exchange of a bond of any of the following four maturities for new twenty-five-year 4½ p.c. bonds, dating from

\* For information *re* loans raised and conversion operations carried on between 1914 and 1930 see pp. 842-843 of the 1933 Year Book.

the maturity of the old bonds; the 5 p.c. bonds maturing Oct. 1, 1931, or the 5½ p.c. bonds maturing Nov. 1, 1932, 1933 and 1934, respectively. One of the terms of the new bonds was that at any time after fifteen years the Dominion, on giving sixty days notice, had the right to call any series for redemption. There was attached to each of the new bonds one or more talons representing the difference in interest to maturity of the former series. The amount was over-subscribed more than two and a half times, the conversions being: 5 p.c. War Loan maturing Oct. 1, 1931, \$43,125,700; 5½ p.c. Renewal Loan maturing Nov. 1, 1932, \$37,523,200; 5½ p.c. Victory Loan maturing Nov. 1, 1933, \$276,688,100; 5½ p.c. Victory Loan maturing Nov. 1, 1934, \$289,693,300; total, \$647,030,300. As from Nov. 1, 1934, the annual saving effected by these operations is \$6,254,674.

In November, a public offering of \$150,000,000 5 p.c. bonds was made. The loan was named "Dominion of Canada National Service Loan, 1931". The bonds were offered for public subscription in two maturities; one for five years, the price being 99·25; one for ten years at 99, or on a yield basis of 5·17 p.c. and 5·13 p.c. respectively. The loan was over-subscribed, the books being closed twelve days before the advertised closing date. Subscriptions totalled \$221,198,200, the division being \$79,535,200 maturing in 1936; \$141,663,000 maturing in 1941.

In 1932-33, one-year 4½ p.c. treasury bills were sold to the chartered banks at par to the amount of \$50,000,000 on Aug. 1. One-year 4 p.c. treasury notes to the amount of \$60,000,000 dated Oct. 1 were sold in New York at 99·28. On Nov. 1, 1932, a further \$35,000,000 of 4 p.c. 2-year treasury notes were sold at par to the chartered banks. Further, \$25,000,000 of 3-year 4 p.c. bonds and \$56,191,000 of 20-year 4 p.c. bonds dated Oct. 15, were sold to the public, the 3-year bonds being sold at 99·20 to yield 4·28 p.c. and the 20-year bonds at 93·45 to yield 4½ p.c. The 3-year issue was over-subscribed several times.

The fiscal year 1933-34 was notable for the re-entry of the Dominion into the London market in September 1933 after an interval of about 18 years.

On May 31, \$40,000,000 6-month treasury bills, bearing interest at 3½ p.c., were sold to the chartered banks at 99·8773 for \$30,000,000 on the day of issue and at 99·8995 for \$10,000,000 on July 3. The cost to the Government was 3½ p.c.

On July 1, \$60,000,000 of 4 p.c. treasury notes were sold in New York at 98·875 and on Aug. 1, \$50,000,000 of 3½ p.c. 1-year treasury bills were exchanged at par with the banks for the 4½ p.c. treasury bill issue of Aug. 1, 1932.

A 4 p.c. registered stock issue amounting to £15,000,000 was sold in London on Sept. 1, 1933. This loan, which carries a sinking fund requirement of ½ of 1 p.c. per annum, was immediately over-subscribed more than five times.

A domestic loan of \$225,000,000 was offered to the public in three maturities—2-year, 6-year and 12-year—on Oct. 15, 1933. The 2-year issue was priced at 99·50 to yield 3·75 p.c.; the 6-year at 99·00 to yield 4·19 p.c., and the 12-year at 96·50 to yield 4·38 p.c. The outstanding bonds of the 1918 Victory Loan which matured on Nov. 1, 1933, were accepted at par in exchange for the two earlier maturities of this new issue, but were accepted at 100¼ for the 12-year maturity. All but \$30,679,350 of the 1918 Victory Loan was converted. The 6-month treasury bills of May and July, 1933, amounting to \$50,000,000, were also accepted

in exchange for the new bonds at a price, including interest, of 101.284. The response was such that the subscription lists were closed ten days before the official closing date.

An issue of treasury bills amounting to \$15,000,000 was sold by public tender on Mar. 1, 1934, \$2,450,000 maturing after 3 months and sold at a price which made the cost to the Government 2.85 p.c.; and \$12,550,000 maturing after 8 months and sold at a cost to the Government of 3.12 p.c.

This \$15,000,000 treasury bill issue of Mar. 1 was duplicated on April 18, 1934, by another for the same amount, also sold by public tender: \$1,600,000 maturing July 1 was sold at a cost to the Government of 2.41 p.c.; \$13,400,000 maturing Oct. 1 was sold at a cost of 2.71 p.c.

On May 1, 1934, a 3½ p.c. registered stock issue for £10,000,000 was sold in London. It matures in 1950-55 and carries a sinking fund provision of ½ p.c. per annum.

A treasury bill issue of \$50,000,000 carrying 2½ p.c. was put out Aug. 1, 1934, to replace the 3½ p.c. issue for the same amount maturing on the same date.

On Sept. 1, 1934, a banking credit was arranged with the Chase National Bank of New York for \$50,000,000 for 1 year at 2 p.c., to be used in retiring the 4 p.c. treasury notes called for redemption in New York on Sept. 1. The maturity date of these notes was originally Oct. 1, 1934.

The maturing bonds of the 1934 Victory Loan amounting to \$222,216,850 were provided for by the issue of a domestic loan of \$250,000,000 on Oct. 15, 1934. These bonds were put out in four maturities with their price and yields as follows:—2-year bonds, 98.90 and interest, to yield 2.57 p.c.; 5-year bonds, 98.15 and interest, to yield 2.90 p.c.; 8-year bonds, 97.00 and interest, to yield 3.43 p.c.; 15-year bonds, 96.50 and interest, to yield, 3.81 p.c.

The surrender value of the 1934 5½ p.c. bonds was par on subscriptions for the 2- and 5-year issues, 100½ for 8-year bonds and 100¼ for 15-year bonds. A total of \$154,829,800 of 1934 5½ p.c. bonds was converted out of an outstanding amount of \$222,216,850.

On Nov. 1, 1934, \$20,000,000 of treasury bills were sold by public tender, \$1,600,000 of 3-month bills were sold at a cost to the Government of 2.35 p.c. while the balance of \$18,400,000 of 6-month bills were sold at a cost of 2.47 p.c.

**Statistics of National Debt.**—Summary statistics of the national debt of Canada as at Confederation and at the end of each fiscal year thereafter down to 1934 are given in Table 20, while details of the active assets and of the gross liabilities as at the end of the past twelve fiscal years are given in Tables 21 and 22 respectively. Further, details of the funded debt, showing the various issues of bonds, the annual interest charges and the place at which principal and interest is payable, are given as at Mar. 31, 1934, in Table 23. From this it appears that the total payable in London at that date was \$384,668,136, in New York \$300,000,000, in Canada \$2,083,307,268 and in Canada and New York \$90,661,100. Thus three-quarters of the funded debt of the Dominion was payable within the Dominion itself, and as a consequence the interest payable outside of Canada was a comparatively small item.

**20.—Summary of the Public Debt of Canada and Interest Payments Thereon,  
July 1, 1867 to Mar. 31, 1934.**

| Fiscal Yr. | Gross Debt.   | Total Assets.            | Net Debt.     | Net Debt per capita. <sup>7</sup> | Increase or Decrease of Debt during the Year. <sup>1</sup> | Interest Paid on Debt. | Interest Received from Active Assets. | Interest Paid per capita. <sup>7</sup> |

<sup>1</sup>The minus sign (—) denotes a decrease.

<sup>2</sup>This amount includes \$10,199,520, for which land was taken from the Canadian Pacific Ry. Co.

<sup>3</sup>This amount includes \$3,305,450, caused by the settlement of accounts with Ontario and Quebec.

<sup>4</sup>This amount takes into account \$5,397,503, allowed to Ontario and Quebec under 47 Vict., c. 6.

<sup>5</sup>Active assets only.

<sup>6</sup>Nine months.

<sup>7</sup>The per capita figures are worked out on the basis of the estimates of population given on p. 164.

21.—Details of the Active Assets of the Public Debt of Canada, as at Mar. 31, 1923-34.

**The Interest-Bearing Debt of Canada.**—Something of the extent of the burden of national debt being carried by the Canadian people may be realized from the fact that, for the fiscal year ended Mar. 31, 1934, the interest charges on the total interest-bearing debt amounted to about 54 p.c. of the total receipts from taxation and over 44 p.c. of the receipts from all sources.

Before the Great War, interest rates were comparatively moderate, but the unprecedented expenditure of the world's capital in that gigantic struggle led, in all the participating countries, to the raising of enormous loans at comparatively high rates of interest, which in many cases still have to be paid until refunding becomes possible under the terms of the contracts made between the nations and their creditors. Thus, in Canada, the average rate of interest paid upon the direct interest-bearing obligations of the nation, which was only 3.368 p.c. at Mar. 31, 1913, rose to 5.164 p.c. at Mar. 31, 1922, and fell gradually to 4.580 p.c. at Mar. 31, 1934. Details of the interest-bearing debt of Canada, and the interest charges thereon, as at March 31 of the years from 1913 to 1934, are given in Table 24.

**24.—The Interest-Bearing Debt, the Annual Interest Charge Thereon and the Average Rate of Interest, as at Mar. 31, 1913-34.**

| Fiscal Yr. | Bonds, Debentures and Treasury Bills. | Annual Interest Charges on Bonds, Debentures and Treasury Bills. | Average Interest Rate on Bonds, Debentures and Treasury Bills. | Savings Bank Deposits, Trust and other Funds. | Annual Interest on Savings Bank Deposits and other Funds. | Total Interest-bearing Debt. <sup>1</sup> | Annual Interest Charge. | Average Rate of Interest. |

<sup>1</sup>The total of interest-bearing debt, as here given, includes bonds purchased and held by the Treasury for sinking funds.

**Guaranteed Debt of the Dominion.**—Besides the direct debt of the Dominion, already dealt with, there are also large indirect obligations, arising mainly out of the guarantee of securities by the Dominion of the railway lines which now form the Canadian National Railways, and the subsequent extensions thereof. Together with these are other smaller indirect obligations, originating in the Government's guarantees of the bonds of the Canadian National Steamship services and of the bonds of its Harbour Commissions, issued in the main for harbour improvements. Statistics showing the growth of these indirect obligations since 1914 are given in Table 25, while Table 26 shows the obligations as they existed on Mar. 31, 1934.

**25.—Securities Guaranteed by the Dominion Government (Amounts Held by the Public), as at Mar. 31, 1914-34.**

## Section 2.—Provincial Public Finance.\*

Provincial Governments in Canada are in the position, under Section 118 of the British North America Act, 1867 (30 and 31 Vict., c. 3), and the British North America Act, 1907 (7 Edw. VII, c. 11), of having a considerable assured income in subsidies from the Dominion Treasury. Details of these payments are given for recent years in Tables 16 and 17 of this chapter. In addition, through their retention of ownership of their lands, minerals and other natural resources, the provinces which, by the voluntary action of their previously existing Governments entered Confederation, raise considerable revenues through land sales, sales of timber, mining royalties, leases of water powers, etc., while the Prairie Provinces formerly received from the Dominion special grants in lieu of land revenues. However, under legislation of 1930 whereby the Prairie Provinces were given control of their natural resources, all the provinces were placed on an equal footing in the administration of natural resources within their boundaries and as regards revenues accruing therefrom. Further, under Section 92 of the British North America Act, Provincial Legislatures are given authority to impose direct taxation within the province for provincial purposes and to borrow money on the sole credit of the province.

While the *laissez faire* school of political thought was predominant throughout the country, provincial receipts and expenditures were generally very moderate, as may be seen, both for individual provinces and for the provinces collectively, from Tables 29 and 30. From the commencement of the twentieth century, however, the Canadian public, more especially in Ontario and the West, began to demand increased services from their Governments, particularly in respect of education, sanitation, and public ownership and operation of public utilities. The performance of these functions necessitated increased revenues, which had in the main to be raised by taxation. Among the chief methods of taxation to be employed has been the taxation of corporations and estates, succession duties showing a considerably increased yield even within the comparatively short period of seventeen years from 1916 to 1933 covered by the statements compiled by the Finance Branch of the Bureau of Statistics.† The fact that provincial government is cheaper per head

\* Revised by Col. J. R. Munro, Chief of the Finance Branch of the Dominion Bureau of Statistics. This Branch issues detailed statements on Provincial Finance which may be obtained from the Dominion Statistician. For a list of these publications see Section 1 of Chapter XXIX.

† The succession duties collected by the provinces in 1933 amounted in the aggregate to \$13,104,687, as compared with \$1,020,972 as recently as 1904, or an increase of more than 12-fold in 29 years. The aggregate revenue raised by taxation of corporations, land, income and miscellaneous (exclusive of gasoline taxes, succession duties and amusement taxes), increased from \$7,217,548 in 1916 to \$32,771,095 in 1933, an increase of 354 p.c. in 17 years.

in the eastern provinces is evident from Table 30, which gives the per capita ordinary revenue and expenditure for various fiscal years from 1871 to 1933. This, however, is not to be taken as evidence that the larger services rendered to the public in the provinces west of the Ottawa river, are not worth what is being paid for them.

For the half-century subsequent to Confederation, the provincial accounts, published by each Government according to its own system of accounting, were quite incomparable as among the provinces, a fact much regretted by students of provincial public finance. Upon the creation of the Dominion Bureau of Statistics in 1918, its Finance Branch undertook the work of placing the various provincial public accounts on a comparable basis, correlating, for example, the revenue derived from succession duties, taxation of corporations, sales of public lands, royalties on forest, mineral and fisheries products, as well as the expenditures on such services as agriculture, civil government, education and public works. As the result of the Bureau's exhaustive analysis of the provincial public accounts, a summary statement of the ordinary receipts and expenditures of the Provincial Governments appeared for the first time in the 1919 Year Book. The various items of receipts and expenditures were classified under appropriate headings and a uniform terminology was adopted. From these statements it is possible to ascertain the amounts received and expended in each year under the respective headings for each province, as well as for the provinces collectively. The figures for the years 1916 to 1920 will be found on pp. 680-685 of the 1921 Year Book, those for 1921 on pp. 786-791 of the 1922-23 Year Book and those for 1922 to 1926 on pp. 836-841 of the 1927-28 Year Book.

The Bureau is at the present time making a more extensive analysis of the finances of the provinces, including capital and trust accounts as well as ordinary revenue and expenditure. This analysis is based on a uniform classification adopted at a recent conference between provincial treasury officials and the Dominion Bureau of Statistics.

The following data, in so far as 1933 is concerned, are given on the new uniform basis. Similar statistics covering 1932 have been secured from all provinces except Ontario. At the time of going to press the latter are undergoing revision but it is expected that they will be available in the near future.

#### **Subsection 1.—Provincial Revenues and Expenditures.**

**Ordinary Revenues and Expenditures.**—The total ordinary revenues of the nine provinces for their latest fiscal years for which final data are available, ended in 1933, were \$184,877,414 and in 1931 were \$179,143,480, as compared with \$188,154,910 in 1930, \$183,598,024 in 1929, \$132,398,729 in 1925, \$92,653,023 in 1920 and \$50,015,795 in 1916. The total ordinary expenditures in 1933 were \$200,528,217 and in 1931 were \$190,754,202, as compared with \$184,804,203 in 1930, \$177,542,192 in 1929, \$136,648,242 in 1925, \$88,250,675 in 1920 and \$53,826,219 in 1916. Thus the total ordinary revenues of the provinces show an increase of 270 p.c. in the short space of 17 years, while the total ordinary expenditures show an increase of 273 p.c. in the same period.

Considering individual provinces, the largest revenue for 1933 is that of Ontario, \$67,800,543, Quebec being next with \$33,324,760, and British Columbia third with \$23,333,115. As regards total expenditures for the same year, that of Ontario was highest, \$67,325,117, Quebec second with \$40,165,668, and British Columbia third with \$26,169,492. In 1933 British Columbia raised the largest revenue per head of population, *viz.*, \$32.77, while Quebec had the lowest, \$11.22. (For statistics of revenue and expenditure in 1933, see Tables 27 and 28, and for figures

showing the absolute and per capita growth of ordinary revenue and expenditure see Tables 29 and 30.)

**The Growth of Provincial Taxation.**—Whereas in earlier years the Dominion subsidies, together with the revenues arising out of the natural resources of the provinces and from fees for specific services rendered to the citizens, nearly sufficed to cover the whole expenses of government and rendered a resort to taxation for provincial purposes practically unnecessary in most of the provinces, the great increase in the functions of government since the commencement of the present century has put an end to this state of affairs. The aggregate amount of taxation for provincial purposes in the fiscal years prior to 1916 is unfortunately not available. Since that time provincial taxation has increased, according to the recently amended classification made in the Dominion Bureau of Statistics, from \$12,521,816 in 1916 to \$74,323,467 in 1933, exclusive of motor vehicle licences, liquor traffic profits, and other licences and permits, etc., an almost six-fold increase in 17 years.

The increase in the use of automobiles, both for commercial purposes and pleasure, is clearly demonstrated by the growing revenues from licences and permits issued by the Provincial Governments. In 1921 the total revenue of all provinces from automobile licensing amounted to \$7,857,751. It increased to \$9,290,900 in 1922, to \$13,020,607 in 1925, to \$15,822,339 in 1927, to \$21,735,827 in 1929, decreasing to \$20,321,307 in 1930, to \$19,952,575 in 1931, and increasing to \$20,050,667 in 1933.

The growth of revenue from the gasoline tax still further demonstrates the increasing use of motor vehicles. In 1923 Manitoba and Alberta were the only provinces showing a gasoline-tax revenue, the total being \$280,404. In 1924 the five provinces of Prince Edward Island, Quebec, Manitoba, Alberta and British Columbia collected gasoline-tax revenue to the amount of \$559,543, while in 1925 the same provinces, with Ontario added, collected \$3,521,388. In 1926 all provinces, except Saskatchewan, collected gasoline taxes to the amount of \$6,104,716, in 1927 to \$7,615,907 and in 1928 to \$9,151,735; thereafter, gasoline taxes were collected in all provinces and amounted to \$17,237,017 in 1929, \$20,956,590 in 1930, \$23,850,067 in 1931 and \$25,931,480 in 1933. The higher yields in recent years were partly due to higher rates of taxation.

The provincial revenues from the liquor traffic increased considerably between 1925 and 1930, but subsequently declined until 1933. The adoption of government control of the sale of liquor in one province after another, until now it exists in all but Prince Edward Island, where prohibition is still in force, has resulted in trading profits, licensing revenues, and permit fees, all of which have swelled the provincial revenues. Prior to the adoption of government control such revenues were not available to the provinces. In 1925 the total revenue collected by all provinces from the liquor traffic was \$8,964,824; in 1926 it was \$11,609,392, increasing to \$16,793,656 in 1927. In 1928, it amounted to \$22,755,212, in 1929 to \$27,599,687, in 1930 to \$33,248,056, in 1931 to \$32,128,693 and in 1933 to \$16,160,980. The method of control varies somewhat as between the provinces. In the majority of cases there are independent commissions or boards to administer the provincial Liquor Traffic Acts, but the accounting and trading profits are shown somewhat differently in the various provincial public accounts reports.\*

**Fiscal Years of the Provinces.**—The fiscal years of the provinces end as follows: P.E.I., Dec. 31; N.S., Sept. 30; N.B., Oct. 31; Que., June 30; Ont., Oct. 31; Man. and Sask., April 30; Alta. and B.C., Mar. 31.

\* See the report of the Dominion Bureau of Statistics on "The Control and Sale of Liquor in Canada".

## 27.—Ordinary Revenues of Provincial Governments

(AMENDED UNIFORM

NOTE.—For information as to when the fiscal years

<sup>1</sup>Includes capital revenue for lands which cannot be separated. <sup>2</sup>Includes capital expenditure which cannot be separated. <sup>3</sup>For eight months. <sup>4</sup>Certain minor items, amounting to about \$600,000, shown in previous years as ordinary receipts and expenditures have been transferred to the extraordinary classification in the 1930 provincial accounts report. <sup>5</sup>Exclusive of interest paid by Hydro and other commissions. <sup>6</sup>Subject to revision. This figure is taken from the Public Accounts of Ontario.

**29.—Ordinary Revenues and Expenditures of the Provincial Governments for their respective fiscal years ended in the census years 1871-1911 and in each year from 1916 to 1933—concluded.**

NOTE.—For provincial ordinary revenues and expenditures in all other provincial fiscal years since Confederation, see 1932 Year Book, pp. 734-736.

<sup>1</sup>Includes small sums of capital revenue and expenditure which cannot be separated. <sup>2</sup>Includes sinking funds taken from capital expenditure (expenditure out of income). <sup>3</sup>See footnotes to figures for individual provinces when using these figures. <sup>4</sup>Six months. <sup>5</sup>Fifteen months ended Mar. 31, 1928.

**30.—Ordinary Revenues and Expenditures of Provincial Governments per Head of Population for their respective fiscal years ended in the census years 1871-1911 and in each year from 1916 to 1933.**

NOTE.—As this table is based upon Table 29, those using it should refer to that table for totals and for explanatory notes. Per capita figures are calculated on the basis of the population figures given on p. 164.

**Subsection 2.—Provincial Debts and Assets.**

In former issues of the Year Book statements were given showing the total direct liabilities of Provincial Governments and a detailed statement of the provincial assets. In accordance with decisions reached at the Conference mentioned on page 916 a uniform balance sheet for the provincial fiscal years ended in 1933 is now presented. In accordance with up-to-date accounting practice, the balance sheet is divided into three distinct categories, capital, income or current, and trust fund account assets and liabilities.

In addition to this the total indirect or contingent liabilities of each province are shown, though they do not in any way affect the balance sheet transactions.

For Prince Edward Island, the total capital assets are not balanced with the total capital liabilities, largely owing to the exclusion of any detail showing non-revenue earning assets such as roads, bridges, public buildings, etc.

The Quebec Public Accounts report for 1933 did not show a balance sheet though the 1934 report does include such a statement. The statistics here shown are as supplied to the Dominion Bureau of Statistics by the Treasury Department.

As some of the items may be vague in meaning the following notes will be of assistance in studying the balance sheets presented:

**Capital Assets.—**

*Available or Realizable Assets:* "Loans and advances" are fully secured. "Other Government Utilities" in the case of Nova Scotia represent largely highways, together with other capitalizations, whereas under "roads" the figures given represent only machinery replacement.

*General Assets, Non-revenue Bearing:* In Ontario, provincial buildings and lands, northern development (roads and farms), rural power-transmission-lines bonus, municipal works unemployment relief and other smaller miscellaneous items are included under "roads." In New Brunswick "public buildings" do not include Parliament buildings, upon which no valuation has been set up. In Saskatchewan bridges are included in "roads". "Universities and Colleges" needs further explanation. In Nova Scotia, New Brunswick, Quebec and Ontario no valuations are shown as these provinces do not consider such universities and colleges as capital assets of the provinces where situated, though government aid for maintenance may be found in the annual statements of educational expenditure. Manitoba's valuations are inclusive of educational properties, other than universities and colleges controlled by the government. In Saskatchewan, the university is included in public buildings. In Alberta the valuation shown includes advances and redemption of debentures. The British Columbia university valuation is included in capital losses, representing \$3,678,278 written off in 1929-30.

**Capital Liabilities.—**

"Dominion Government Debt Allowance" represents housing loan only for Nova Scotia.

"Reserves or Surpluses" are not applicable against any specific assets.

## 31.—Balance Sheets of the Provincial Governments

NOTE.—For dates on which the fiscal years of  
(AMENDED UNIFORM

## ASSETS.

<sup>2</sup> Indirect or Contingent Liabilities do not enter the balance-sheet transactions; they include guarantees of bonds of, and loans to, railways, municipalities, and other organizations.

**Bonded Indebtedness of the Provinces.**—Of the total liabilities of the provinces the major part is represented by bonded debt owing to the public in Canada and abroad. The total gross bonded debt amounted to \$1,224,372,824 in 1933 as compared with only \$218,875,927 in 1916, an increase of over \$1,000,000,000 in the 17 years. In addition to this bonded debt there were treasury bills outstanding on provincial accounts amounting to \$109,449,983 for 1933. Figures of bonded debt for this and previous years to 1916 are given in Table 32. The rapid rise in the bonded debt of the provinces from \$218,875,927 in 1916 is accounted for largely by the development of public ownership of utilities (such as the "Hydro" in Ontario), the extension of the highways and good roads systems in all provinces (highway debentures outstanding in 1933 accounting for \$438,000,000 of the provincial debt), and the requirements for the promotion of industrial activities and public and social welfare. These demanded heavy expenditures which could not easily be met out of current revenue. The borrowings, while increasing the public debt, are in the main considered justifiable, as the public utilities are in most cases meeting from their revenues the interest on indebtedness incurred in their construction, and the provincial assets generally are sound enough to take care of capital investment for other services which are necessary to develop the country.

**32.—Gross Bonded Debt (Exclusive of Treasury Bills) of Provincial Governments, by Provinces, fiscal years 1916 to 1933.**

<sup>a</sup> Liabilities statement is for April 30; this amount includes \$500,000 due May 1. <sup>a</sup> Subject to revision.

<sup>b</sup> Revised since the publication of the 1933 Year Book.

**Interest Payments and Receipts of the Provinces.**—The current burden of a debt in the case of a continuing organization is represented by interest payments, which may be offset in whole or in part by interest received on loans either to provincially-owned public utilities or to corporations or individual citizens. In a country where provincial public policy varies widely with regard to public ownership, it appears desirable to include a statement showing, for each province, the gross interest payments, the interest receipts and the net interest payments. This information is given for the provincial fiscal years ended in 1933 below:—

| Province.                 | Gross<br>Interest<br>Paid. | Interest<br>Received. | Net<br>Interest<br>Paid. | Net Interest<br>Paid<br>per Capita. |
|---------------------------|----------------------------|-----------------------|--------------------------|-------------------------------------|
|                           | \$                         | \$                    | \$                       | \$                                  |

### Section 3.—Municipal Public Finance.\*

The existence of local self-governing units has always been characteristic of democratic societies, and nowhere more so than in Canada. The struggle for responsible government was naturally accompanied by an agitation for local self-government in the cities and towns of Canada and, after responsible government had been conceded, a complete system of municipalities was established throughout the old Province of Canada by the Municipal Act of 1849.† Under the division of powers made by the British North America Act between the Dominion and the Provincial Governments, legislation regarding municipal government, being a local matter, was naturally assigned to the provinces, which differ considerably with regard to their types of municipal organization. Thus in Prince Edward Island the only incorporated municipalities are the city of Charlottetown and seven incorporated towns. In British Columbia seven of the 33 cities have fewer than 1,000 people, while there are no towns at all and only 17 villages; again, in the same province the rural districts are mainly administered from the provincial capital, there being only 28 rural municipalities. Finally, in Saskatchewan and Alberta there exist local improvement districts, areas which have not as yet been organized into rural municipalities, and where the taxes are levied, collected and expended by the Provincial Governments. Such districts, however, may be regarded as on the way to becoming self-governing rural municipalities and their statistics are therefore included in Table 33, which gives statistics of the numbers and types of municipalities in 1932.

\*Revised by Col. J. R. Munro, Chief of the Finance Branch of the Dominion Bureau of Statistics. This Branch issues statements on "Financial Statistics of Urban Municipalities of 10,000 Population and Over", on "Bonded Indebtedness of Municipalities" and on "Assessment Valuations of Municipalities". For a list of publications see Chapter XXIX, Section 1, under "Finance", (p. 1155).

†For a brief outline of the rise of the municipal system of Ontario, see 1922-23 Year Book, p. 103.

## 33.—Number of Municipalities in Canada, by Provinces and Classes, 1932.

<sup>1</sup>There are 44 counties in all, geographically, but a number are united for municipal purposes.

<sup>2</sup>Officially known as "townships".

<sup>3</sup>Nova Scotia has 18 counties, some of which are "municipalities", while others are divided into "municipalities".

**Municipal Revenue from Taxation.**—The following statement showing receipts from current taxes, arrears and penalties, though incomplete, is the only information available dealing with this important subject.

## MUNICIPAL TAXATION RECEIPTS, BY PROVINCES, 1932.

|                                                                               | \$          |                                                   | \$                 |

**Municipal Assessments.**—Throughout the Dominion, the chief basis of municipal tax revenue is the real estate within the limits of the municipalities; though in certain provinces personal property, income, and business carried on are also taxed. General taxes are normally assessed at the rate of so many mills on the dollar of the assessed valuations. In the Prairie Provinces, the values of improvements made to real property are often rated at a very low figure, *e.g.*, in Saskatchewan, where the taxable valuations of buildings are about 12 p.c. of the taxable valuations of lands, and in Alberta, where they are about 28 p.c. of the taxable valuations of lands, as shown in Table 34.

There are various reasons for fluctuations in assessment valuations, due to differences in laws and varying practices with regard to assessment as among provinces, as among classes of municipalities and as among municipalities of the same class from year to year. Such matters are more fully dealt with in the special report of the Bureau of Statistics on "Assessment Valuations by Provinces", obtainable on request.

Land valuations in the West, which in earlier years were somewhat inflated, have of late been assessed on a sounder basis, and in some provinces the Equalization Boards have placed a more equitable valuation on lands as among the various rural municipalities.

34.—Summary Statement Showing Total Assessment Valuations of Municipalities, by Provinces, for 1929-32—concluded on p. 934.

| Province.                         |             | Taxable Real Property.             |                                  |                                         |

<sup>1</sup>Less land and buildings for the Maritime Provinces, Quebec and Manitoba. <sup>2</sup>In N.S. personal property and income assessments for cities are for Sydney only. <sup>3</sup>Includes exemptions for municipality of Cumberland, Nova Scotia. <sup>4</sup>Local Improvement Districts not included in 1929, 1931 or 1932 in Alta. <sup>5</sup>In addition, assessments for schools only in Ontario were: townships \$2,730,538, towns and villages, \$23,719,597 and cities \$92,401,140 in 1929; townships \$3,125,660, towns and villages \$22,347,193 and cities \$86,780,452 in 1930; townships \$4,486,690, towns and villages \$20,499,195 and cities \$93,816,472 in 1931 and townships \$4,976,492, towns and villages \$13,249,670 and cities \$86,803,023 in 1932. <sup>6</sup>\$256,400 is by special franchise. <sup>7</sup>\$484,736 is by special franchise. <sup>8</sup>\$441,660 is by special franchise. <sup>9</sup>Includes special franchise (amount not stated). <sup>10</sup>One municipality showing \$80,000 odd assessment for 1931 did not report for 1932.

**Bonded Indebtedness.**—Like other Canadian governing bodies the municipalities of the greater part of Canada borrowed rather freely during the boom period of 1900-12, and again during the nineteen-twenties. The bonded indebtedness of Ontario municipalities rose from \$153,568,409 in 1913 to \$504,755,977 in 1932, while that of Quebec municipalities increased from \$173,720,141 in 1915 to \$463,891,860 in 1932, and a proportionate increase took place in other provinces. The recent growth in the bonded indebtedness of all classes of municipalities is shown by provinces in Table 35. The figures show that there was an increase in 1932 over 1931 in each of the provinces with the exceptions of Alberta and British Columbia. In Saskatchewan, net debenture debt is shown for all municipalities in 1919 and from 1920 on the statistics represent gross debenture debt. In Alberta in the earlier years, figures represent principally net debenture debt but from 1929 on gross debenture debt is shown. All other provinces give gross total debenture debt throughout.

## Section 4.—National Wealth and Income.

### Subsection 1.—National Wealth.

There are several methods of computing national wealth, *i.e.*, the aggregate value of the public and private property within the nation apart from undeveloped natural resources. Perhaps the most familiar of these methods is that of working back to capital values through income tax returns, but this can be applied only in countries where small incomes are assessed for income tax. A second method is that of estimation from probate returns, the value of the estates of deceased persons being regarded as representative. A third is that of a complete census, based upon a canvas of the individual. In the accompanying tables a fourth method, namely, the so-called "inventory" method, is employed; it consists in totalling the amounts known from various sources to be invested in agriculture, manufactures, dwellings, etc.

Whatever method is used, difficulty arises when we try to reduce all the things which go to make up wealth (things which once created are not themselves subject to violent change) to a common denominator. Estimates of national wealth must always be expressed in terms of the national currency and thus normally in terms of gold dollars. Yet the purchasing power of the currency unit is always fluctuating and since 1929 has increased by more than 50 p.c. in terms of wholesale prices. Even in 1930, the average index number of wholesale prices was down by nearly 10 p.c. from 1929, while in December of that year the average index number of wholesale prices was 19 p.c. lower than in the same month of 1929.

The effect of such drastic reductions in values is first felt by the commodities which are being currently produced and, through these commodities, the dollar value of production is diminished and consequently the national income of a country where most people are producers. Ultimately a persistent decline of this character affects the capital values of real estate, buildings, machinery, etc., and its influence is then felt in a reduction in the national wealth as stated in dollars. The 1929 estimate, which is considered to represent values in that year with approximate accuracy, is the latest which has been compiled by the Bureau of Statistics and the table below shows the national wealth on that basis.

The survey for 1929 placed the estimated aggregate of the tangible wealth of the Dominion, exclusive of undeveloped natural resources, at \$30,840,000,000 as compared with \$29,630,000,000 in 1928, \$27,668,000,000 in 1927, \$26,691,482,000 in 1926, \$25,673,174,000 in 1925 and \$22,195,302,000 in 1921. These figures, however, are not exactly comparable, in view of certain improvements and additions that have been made in the method of estimation and in the items included. An increase of \$1,210,000,000 was shown in the national wealth in the year 1929, and of over \$8,600,000,000 in the eight years 1921 to 1929.

**Aggregate and Per Capita Wealth of the Provinces, 1929.**—As regards the provincial distribution of wealth, Ontario ranked first with estimated aggregate wealth of \$10,628,000,000 or 34.46 p.c. of the total and Quebec second with estimated wealth of \$8,265,000,000 or 26.8 p.c. of the whole. Saskatchewan was third, with estimated wealth of \$3,047,000,000 or 9.88 p.c. of the total for the Dominion.

While Ontario led in absolute wealth, the western provinces came first in per capita wealth; British Columbia held first rank with a per capita wealth of \$4,012; Alberta second with \$3,518; Saskatchewan third with \$3,451 and Manitoba sixth with \$2,910. These figures may be compared with \$3,188 and \$2,982, the per capita wealth of Ontario and Quebec respectively, and \$3,076, the per capita wealth for the whole Dominion. Further details are furnished in Table 37.

As the statistics of population and wealth for Yukon are uncertain, the per capita estimate of wealth is open to question and has not been shown.

### 37.—Provincial Distribution of the National Wealth of Canada, with Percentage and Per Capita Analyses, 1929.

NOTE.—Figures for 1921 and 1925 are given on pp. 849-850 of the 1927-28 Year Book, for 1926 on p. 827 of the 1930 Year Book, for 1927 on p. 870 of the 1931 Year Book and for 1928 on p. 870 of the 1933 Year Book.

<sup>1</sup>Includes 7,000 population in the Northwest Territories or 0.07 p.c.

<sup>2</sup>As the statistics of population and wealth for Yukon are uncertain, the per capita estimate of wealth is open to question and has not been shown. <sup>3</sup>Per capita figures are worked out on the basis of revised populations, see p. 164.

**Wealth of Canada, by Items, 1929.**—In the items included in Table 38, all duplications have been excluded. In any consideration of the individual items it should be remembered that each item covers only the portion of wealth which is mentioned in the description of the item. For example, the item of fisheries includes only capital invested in primary operations, while capital invested in fish-canning and -curing establishments is included under manufactures, though it might also be considered as part of the wealth connected with fisheries. In the same way, the items for manufactures do not include lands and buildings in urban centres, which are shown under the heading of urban real property.

### 38.—Estimate of the National Wealth of Canada, with Percentage and Per Capita Distribution of Component Items, 1929.

NOTE.—For discussion of these items, see p. 871 of the 1933 Year Book.

| Classification of Wealth.                                                                                                                     | Aggregate Amount.     | Percentage of Total. | Average Amount per head of Population. <sup>3</sup> |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|----------------------|-----------------------------------------------------|
|                                                                                                                                               | \$                    | p.c.                 | \$                                                  |
| Farm values (land, buildings, implements, machinery and live stock).....                                                                      | 6,308,353,000         | 20.45                | 629.14                                              |
| Agricultural products in the possession of farmers and traders..                                                                              | 1,631,124,000         | 5.29                 | 162.67                                              |
| Totals, Agricultural Wealth.....                                                                                                              | 7,939,477,000         | 25.74                | 791.81                                              |
| Mines (capital employed).....                                                                                                                 | 867,021,000           | 2.81                 | 86.47                                               |
| Forests (estimated value of accessible raw materials, pulpwood and capital invested in woods operations).....                                 | 1,877,000 000         | 6.09                 | 187.19                                              |
| Fisheries (capital invested in boats, gear, etc., in primary operations).....                                                                 | 33,935,000            | 0.11                 | 3.39                                                |
| Central electric stations (capital invested in equipment, materials, etc.).....                                                               | 554,327,000           | 1.80                 | 55.28                                               |
| Manufactures (machinery and tools, and estimate for capital in rural lands and buildings, duplication excluded).....                          | 1,418,040,000         | 4.60                 | 141.42                                              |
| Manufactures (materials on hand and stocks in process, duplication excluded).....                                                             | 837,805,000           | 2.72                 | 83.55                                               |
| Construction, custom and repair (estimate of capital invested in machinery and tools and materials on hand).....                              | 137,685,000           | 0.45                 | 13.73                                               |
| Trading establishments (estimate of the value of furniture and fixtures, delivery equipment and materials on hand).....                       | 1,136,291,000         | 3.68                 | 113.32                                              |
| Steam railways (investment in road and equipment).....                                                                                        | 3,153,351,000         | 10.22                | 314.49                                              |
| Electric railways (investment in road and equipment).....                                                                                     | 240,111,000           | 0.78                 | 23.95                                               |
| Telephones (cost of property and equipment).....                                                                                              | 291,589,000           | 0.95                 | 29.08                                               |
| Urban real property (assessed valuations and exempted property and estimate for undervaluation by assessors and for roads, sewers, etc.)..... | 8,251,011,000         | 26.75                | 822.88                                              |
| Canals (amount expended on construction to Mar. 31, 1930).....                                                                                | 241,946,000           | 0.79                 | 24.13                                               |
| Harbours (approximate amount expended to Mar. 31, 1930) <sup>1</sup> ....                                                                     | 367,488,000           | 1.19                 | 36.65                                               |
| Shipping (including aircraft) <sup>2</sup> .....                                                                                              | 149,306,000           | 0.48                 | 14.89                                               |
| Imported merchandise in store (estimated at one-half imports during 1929).....                                                                | 649,477,000           | 2.11                 | 64.77                                               |
| Automobiles (estimate of the value of automobiles registered)....                                                                             | 758,424,000           | 2.46                 | 75.64                                               |
| Highways, etc. <sup>1</sup> .....                                                                                                             | 364,896,000           | 1.18                 | 36.39                                               |
| Household furnishings, clothing, etc. (value estimated from production and trade statistics).....                                             | 1,370,000,000         | 4.44                 | 136.63                                              |
| Specie, coin and other currency held by the Government, chartered banks and the general public.....                                           | 201,030,000           | 0.65                 | 20.06                                               |
| <b>Grand Totals.....</b>                                                                                                                      | <b>30,840,210,000</b> | <b>100.00</b>        | <b>3,075.72</b>                                     |

<sup>1</sup>This class of wealth was not included in estimates published for previous years in earlier editions of the Year Book.

<sup>2</sup>The total for "shipping" includes, for the first time, an estimate for aircraft amounting to \$2,398,000 for 1929.

<sup>3</sup>See Table 37 for the revised estimate of population upon which these per capita figures are based.

**Analyses by Provinces and Classes of Wealth.**—In Table 37 on pp. 873-874 of the 1933 Year Book will be found detailed statistics of the wealth of each province by leading items. Again the suggestive character rather than the strict accuracy of such data must be emphasized. The specie holdings, for instance, are distributed among the provinces according to their populations, since they are an asset of Canada as a whole rather than of the particular locality in which they happen to be deposited.

### Subsection 2.—National Income and Income Tax Statistics.

"The annual labour of every nation is the fund which originally supplies it with all the necessities and conveniences of life which it annually consumes, and which consist always either in the immediate produce of that labour, or in what is purchased with that produce from other nations."—ADAM SMITH. This is perhaps the earliest modern definition of *national income*, and is still among the best, when it is interpreted in accordance with modern knowledge regarding the balance of international payments and the necessity of keeping productive equipment in running order. It must also be remembered that while the national income consists in goods and services of the most varied kinds, its total amount can be stated only in terms of money.

**The Difficulty of Measuring National Income.**—The precise statistical measurement of the national income is, however, a matter of insurmountable difficulty, and the most indefatigable research into all the relevant statistics, in order to establish a figure of national income, must always leave an appreciable margin of error. Indeed, it is no easy matter even for an individual to establish an accurate money figure as representing his *total* income, especially where he has to include in that total income, besides his cash income, an allowance for the rental value of his (owned) house and his durable belongings therein, together with an allowance for the money value of the commodities produced and consumed within the family, (such as eggs and garden produce) and of the services, ordinarily bought and sold, but rendered gratis within the family circle. Yet this is the only way of obtaining the total income of the family. While such income, not received directly in money, but in commodities produced and services rendered, is not, except for house and furniture rent, an important percentage of the family income in most urban families, it constitutes a very important part of the income of most rural families, who to a much larger extent consume the commodities which they themselves produce. For this reason, indeed, comparisons between the incomes of urban families and rural families are often misleading, through not allowing for the non-money income of the latter. Certainly most people never think of their non-money income as income at all, and would never dream of putting the rental value of their owned homes into their income tax returns. Indeed, the income tax authorities of Canada do not expect them to do so.

Any difficulties experienced in expressing the total income of an individual as a single figure are multiplied a million-fold in any attempt to express the total of the national income as a single figure. The individual and corporate incomes which are to be combined into this grand total *without duplication*, are of such a heterogeneous character that any figure which may be given as the grand total of the national income must include some margin of error. For example, the total of the national income must include the rental value of owned houses, and the value of the commodities raised on the 728,000 farms of Canada and consumed on the farms where they are produced, the value of the flowers raised in a million private gardens, and the value of innumerable services which in special cases are performed within the family, or by the individual for himself, although more ordinarily bought and sold.

Yet the labour of the housewife, performed in her own house, must be left out of account as one of the imponderables, however valuable it may be in fact. For the estimate of the national income to be of any practical use it must be based upon the conventions and practices of the existing economic system.

Again, fluctuations in the general level of prices, which have been so great in the past few years, have necessarily affected the money value of the national income. In these circumstances, it is absolutely essential that any estimate of the national income should be definitely stated as for a particular year, so that the national income for each year may be related to the price levels prevailing in that year and corrected by the price levels of that year. Thus, when the official index number of wholesale prices is taken to correct the estimate of the money value of the national income for the decline of prices, it is found that \$66.70 bought on the average as much in commodities in 1932 as \$95.60 bought in 1929. Then, if the money value of the national income had declined by one-half in these three years, the correction for the drop in prices would reduce the decline in the *real* national income of commodities and services to 28.3 per cent, on the assumption that the prices of services rendered declined proportionately with the prices of commodities included in the index number of wholesale prices. Thus on the assumption that the money value of the national income in 1932 was only one-half of that of 1929, the *real* national income would be nearly 72 per cent of that of 1929. Much might be said here on the effect of falling prices in discouraging the actual production of commodities and the rendering of services, thus reducing the *real* national income, and conversely on the effect of rising prices in stimulating the actual production of commodities and rendering of services and thus increasing the *real* national income.

The industries concerned with the production of *form* utilities employed in 1931 approximately five-eighths of all gainfully occupied Canadians and produced commodities to the net value of approximately \$2,105,000,000 in 1932, as shown in the General Survey of Production at pp. 232-233 of this volume. Then, on the assumption that the remaining approximately three-eighths of the gainfully occupied Canadians who are engaged in the transportation and communications industries, in wholesale and retail trade, in finance and in personal and professional service, are proportionately as productive on the average as those who engage in the production of *form* utilities, we attain a total figure of what labour, assisted by capital, has presumably been able to produce in the course of a calendar year. This figure has for the past twelve years been published in the Dominion Bureau of Statistics' Annual Survey of Production, and in the Canada Year Book.

On the basis of the annual Census of Industry and the occupational distribution of the population as ascertained at the Decennial Censuses of 1921 and 1931, the grand total value of the national production in each year from 1920 to 1932 inclusive has been approximately estimated as follows. 1920, \$5,523,000,000; 1921, \$4,215,000,000; 1922, \$4,520,000,000; 1923, \$4,696,000,000; 1924, \$4,643,000,000; 1925, \$5,178,000,000; 1926, \$5,600,000,000; 1927, \$6,101,000,000; 1928, \$6,342,000,000; 1929, \$6,072,000,000; 1930, \$5,150,000,000; 1931, \$4,000,000,000; 1932, \$3,403,000,000.

<sup>1</sup> Dominion average used.

The above table has the defect of making no deduction for the cost of the fuel and the power required for the carrying on of the productive process in the manufacturing industries, these two items amounting to \$96,354,956 in 1930 and perhaps \$75,000,000 in 1932. On the other hand, it makes no allowance for unrecorded production in such sidelines as the raising of garden produce, poultry, etc., by persons not deriving their main livelihood from such activities. (The value of farm produce raised elsewhere than on farms was secured at the Census of 1931 and was found to total nearly \$19,000,000 in 1930.) Again, the table makes no allowance for the difference between the producer's price of farm commodities and the price actually received by the farmer who brings in his produce to a farmers' market or peddles it along city streets or sells it to a peddler with no fixed store who undertakes to do the marketing for him. Finally, the table makes no allowance for the money value of the production of persons not ordinarily considered as gainfully occupied, such as the production of school-boys outside of school hours and of college students in their vacations. On the whole, it is felt that the omission of the value of such activities fully makes up for the inclusion of the figures referred to above. This leaves us with the figure of approximately \$3,403,000,000 to represent the grand total value of the productive activities of the Canadian people in 1932.

However, Canada is on balance a debtor country, and in order to ascertain her net national income, deduction must be made from her national production of the amount required to meet the *net* interest payments due to outsiders. Such *net* interest and dividend payments are estimated for 1932 in our "Balance of International Payments" at \$192,000,000, payments on this score reaching \$248,000,000 as against receipts amounting to \$56,000,000. When this outward balance of interest and dividend payments is deducted from the \$3,403,000,000 of the preceding table, the remainder is \$3,211,000,000, which may be considered as the gross national income of the Canadian people in 1932. It is subject to certain deductions required to maintain the national productive equipment in an efficient state.

**Incomes Assessed for Income Tax in Canada.\***—In those countries of the world where an income tax has been established for a considerable time the figures of the assessed income have been generally accepted as furnishing a guide

\*This material has been revised by the Income Tax Branch of the Department of National Revenue.

both to the amount and to the distribution of the total national income by classes. Estimates of the national income, based upon income tax statistics, have been published, for example, in the United Kingdom and in the United States.

The war income tax was introduced into Canada in 1917. Under the Income War Tax Act, the returns of the incomes of individuals and corporations are filed in the year following the earning of the incomes. Further, since the fiscal year ends on Mar. 31, the bulk of the receipts from the income tax usually comes in during the first two or three months of the next following fiscal year. Thus the income tax received in the fiscal year ended Mar. 31, 1934, represents, in the main, income tax collected on 1932 income and the income tax collected in the fiscal year ended 1933 represents in the main 1931 income. It is important that these facts should be kept in mind when considering income assessed in different years. Further, the particular provisions of the income tax existing at any particular time and the amendments extending or contracting the scope of the income tax by raising or lowering the limit of taxable income or increasing or lowering the allowances for children, etc., should also be borne in mind in the consideration of the following tables. Among these, Table 40 gives the grand total income of individuals and corporations assessed for the purpose of income war tax for the past fourteen years, while Table 41 gives this income by provinces for the past five years and Table 42 shows the amount of income tax collected by provinces in the past five years. Tables 43 and 44 analyse the payments of income tax in the past four years by size of income class and by occupation of the taxpayer, respectively.

<sup>1</sup> Exclusive of 5 p.c. tax on dividends.

Table 45 shows the amount received from the special 5 p.c. tax of 1933 imposed at the source on interest or dividends paid by Canadian debtors to non-residents of Canada and on interest or dividends received by Canadian residents by way of bearer coupons or cheques where such are payable by Canadian debtors, optionally or otherwise, in foreign currencies, and such coupons or cheques are cashed in a currency which is at a premium over Canadian funds. The receipts are classified by provinces, no further classification being available.

**45.—Amount Received from Special Five Per Cent Tax on Interest and Dividends, fiscal year ended Mar. 31, 1934.**

**Subsection 3.—Outside Capital Invested in Canada and Canadian Capital Invested Elsewhere.\***

An estimate of the outside capital invested in Canada and the Canadian capital invested outside of the Dominion is prepared by the Internal Trade Branch of the Dominion Bureau of Statistics. Any estimate of this character is liable to a margin of error, but the utmost care has been taken in the computation and it is believed that the figures approximate to actual conditions. More complete information is being obtained from year to year, and a comprehensive revision and extension of the statistics on this subject is now in progress. In the meantime, the figures given are of the latest available date, *viz.*, Jan. 1, 1931; figures for previous years will be found on pp. 879-880 of the 1933 Year Book.

It is estimated that the total investment of British and foreign capital in Canada on Jan. 1, 1931, was \$6,477,879,000. Of this sum, \$2,204,857,000 was British capital, \$4,107,803,000 was from the United States and \$165,217,000 from other countries. Though these totals are large, it should be remembered that the national wealth of the Dominion in 1929 is estimated at \$30,840,210,000 exclusive of the value of those undeveloped natural resources in which some of the outside capital is invested.

It must also be borne in mind that Canadians have invested large amounts of capital abroad. The Bureau estimates that Canadian investments in other countries amounted to \$1,831,310,000 at the beginning of 1931, or nearly 30 p.c. of the amount of outside investments in Canada. Of this \$1,047,285,000 was placed in the United States, \$84,826,000 in the United Kingdom and \$699,198,000 in other countries. (Table 47.)

\*Revised by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics. For a list of the publications of this Branch, see p. 1154.

It is estimated that the amount of capital invested in Canada is \$17,500,000,000. This sum includes the bonded indebtedness of Dominion, Provincial and municipal governments, investments in railways, all manufacturing concerns, mines and metal industries, public utilities, trading establishments, finance, insurance, land and mortgages. It does not include private capital in domestic enterprises such as farms, homes, etc. Of this sum it is estimated that 65 p.c. or \$11,500,000,000 is owned in Canada; 21 p.c. or \$3,725,000,000 in United States; 13 p.c. or \$2,228,000,000 in the United Kingdom; 1 p.c. or \$171,000,000 in other countries.

If the basis of comparison is total national wealth, British and foreign investments decrease in significance. Canada's national wealth in 1930 was probably \$30,000,000,000; net British and foreign investments in Canada were about \$4,647,000,000, or 15½ p.c. of the total.

## CHAPTER XXII.—CURRENCY AND BANKING; LOAN AND TRUST COMPANIES.

### Section 1.—Canada's Monetary System.

**Historical.**—Early trade in Canada was carried on by barter, which at times resulted (*e.g.*, in transactions between Indians and fur traders) in the adoption of beads, blankets, etc., as recognized media of exchange. Later, during the French period in Canada, while barter still formed perhaps the most important means of exchange between individuals and merchants, a more or less satisfactory currency system developed. Beaver and other furs, tobacco and wheat were at times used as substitutes for currency, the last named being at one time a legal tender. A makeshift currency system was also developed during the French *régime* when playing cards, stamped with a value and redeemable yearly on the receipt of bills of exchange on Paris, came into circulation. Other paper money was also issued, and the total amount outstanding at the time of the cession was estimated at 80,000,000 livres, which was nearly all lost to its holders.

The British Government next sought to establish a uniform standard of colonial currency, but since at this time French coinage again began to come into circulation and the Spanish dollar also rivalled the English shilling as the most common medium of exchange, this was not universally possible. English sovereigns were overrated in terms of dollars in an endeavour to encourage their circulation. A rate of 5s. to the dollar was set in Halifax and was in use in government accounting systems, while in Montreal, York currency (the rates prevalent in New York), giving the dollar an exchange value of 7s. 6d. or 8s., was in common use.

Canadians again became more or less familiar with the characteristics of paper money as a result of the experiences of the various neighbouring Northern States during the first half of the nineteenth century. During the War of 1812 this familiarity was increased by the establishment of an army bill office, issuing bills of various denominations, redeemable on presentation. The growing volume of trade between Canada and the United States also resulted in a tendency toward a decimal coinage, and in 1853 a measure was passed providing for the adoption of a decimal currency, with a dollar equivalent to the United States dollar; the British sovereign was made legal tender at \$4.86½. An Act of 1857 requiring all government accounts to be kept in dollars and cents came into force on Jan. 1, 1858; the formal adoption of decimal currency in the Province of Canada dates from that time.

By the Uniform Currency Act of 1871 (34 Vict., c. 4), the decimal currency was extended throughout the Dominion, the British sovereign was made legal tender for \$4.86½ and the United States eagle legal tender for \$10, while authority was given to coin a Canadian \$5 gold piece. No Canadian gold coinage was issued, however, prior to the establishment of the Canadian branch of the Royal Mint in 1908, the first coins struck being sovereigns similar to those of the United Kingdom, but with a small "C" indentifying them as having been coined in Canada. In May, 1912, the first Canadian \$10 and \$5 gold pieces were struck, but the Canadian gold coinage has so far been limited in amount, since Canadians have generally preferred Dominion notes to gold for use within the country and, when gold is needed for export, bullion or British and United States gold coin serve the purpose equally well.

**The Royal Canadian Mint.**—The Ottawa Mint, established as a branch of the Royal Mint under the (Imperial) Coinage Act, 1870, and opened on Jan. 2, 1908, was, by 21-22 Geo. V, c. 48, constituted a branch of the Department of Finance, and by the Proclamation of Nov. 14, 1931, issued under Section 3 of that Act, it has since Dec. 1, 1931, operated as the Royal Canadian Mint. At first the British North American provinces, and later the Dominion of Canada, obtained their coins from the Royal Mint in London or from The Mint, Birmingham, Ltd., and in its earlier years the operations of the Mint in Canada were confined to the production of gold, silver and bronze coins for domestic circulation, of British sovereigns, and of small coinages struck under contract for Newfoundland and Jamaica. Previous to 1914 small quantities of gold bullion were refined, but during the War the Mint came to the assistance of the British Government by establishing a refinery in which nearly twenty million ounces of South African gold were treated on account of the Bank of England, and the subsequent great development of the gold-mining industry in Canada has resulted in gold-refining becoming one of the principal activities of the Mint. Gold coins have never been a popular medium of exchange in Canada and have not been struck since 1919, most of the fine gold produced from the rough shipments from the mines being delivered to the Department of Finance in the form of bars worth approximately \$8,300 each, the rest being sold in a convenient form to manufacturers. The fine silver extracted from the rough gold, when not required for coinage, is sold in New York or disposed of to local manufacturing firms.

The domestic currency of Canada, as at present authorized by the Currency Act, consists of: \$20, \$10, \$5 and \$2½ gold pieces, 900 millesimal fineness (only \$10 and \$5 pieces have been issued); of \$1, 50-cent, 25-cent and 10-cent silver pieces, 800 millesimal fineness; of 5-cent pieces of pure nickel (from metal produced in Canada); and of 1-cent pieces in bronze. The silver 5-cent piece is still legal tender but its coinage was discontinued in 1921; the silver dollar was never coined until 1935, when, by Royal Proclamation of Apr. 12, the design of the new Jubilee Silver Dollar was set out. The proclamation went into operation on May 1, 1935.

**Gold.**—Gold is used only to an insignificant extent as a circulating medium in Canada, its monetary use being practically confined to reserves, but \$5 and \$10 gold pieces weighing respectively 129 and 258 grains, 9-10ths pure gold by weight, have been coined, the Canadian gold dollar thus containing 23.22 grains of pure gold. These coins were first issued in 1912, authority to issue them having been conferred in 1910. By the Currency Act, 1910 (9-10 Edw. VII, c. 14), British sovereigns, which are legal tender for \$4.86½, and other gold coins, and the \$5, \$10 and \$20 gold coins of the United States, which contain exactly the same weight of gold as Canadian gold coins of these denominations, are also legal tender. These, however, were almost entirely divided between the Dominion Government and the banks as reserves, and the chief circulating medium of the country is provided by paper and token currency. On the establishment of the Bank of Canada, the chartered banks transferred their holdings of gold in Canada to this institution.

Table 1, compiled by the Master of the Royal Canadian Mint, shows the value of the gold bullion received for treatment at the Ottawa Mint since its foundation, together with the gold coin and bullion issued. A statement of the gold, silver, nickel and bronze coinages issued to the separate provinces and to the Dominion of Canada since 1858 is published as Table 2. Table 3, compiled by the Dominion Comptroller of Currency, gives the form in which the gold has been held by the Government in recent years.

# 1.—Value of Gold Bullion Received for Treatment and Value of Gold Coin and Bullion Issued from the Ottawa Mint, 1908-16 and, by years, 1917-34.

NOTE.—Gold valued at the standard price of \$20.671834 per fine oz.

**Token Currency.**—Canadian silver dollars weighing 360 grains, 37-40ths fine, provided for by the Currency Act of 1910, were placed in circulation for the first time in 1935 (see p. 949). Fifty-, 25-, 10-, and 5-cent pieces of weight proportionate to their respective fractions of the dollar, and of the same fineness, are in circulation, but, by c. 9 of the Statutes of 1920, the standard of fineness was reduced to 8-10ths. In 1921 the coinage of a nickel 5-cent piece weighing 70 grains was authorized. Silver coins are legal tender only up to ten dollars, nickel coins to five dollars, and bronze coins to twenty-five cents. Table 4 shows the *net* issue of silver and bronze coins (that is, the value issued less the value withdrawn), by years from 1901.

## 4.—Circulation in Canada of Silver and Bronze Coin, Dec. 31, 1901-34.

<sup>1</sup> These figures of *net* amounts of coin issued show the values issued less the values withdrawn and to this extent do not correspond with the figures shown in Table 2.

**Dominion Notes.**—Prior to the taking over of the note issue by the Bank of Canada when it opened on Mar. 11, 1935, Dominion notes were issued under any one of three statutory authorities: (1) the Dominion Notes Act (Statutes of 1934, c. 34), which required a gold reserve of 25 p.c. to be held against the first \$120,000,000 of notes issued and full gold coverage against any issue in excess of \$120,000,000; (2) the Finance Act (R.S.C. 1927, c. 70), Part II of which authorized the Minister of Finance to advance to any chartered bank or to the savings banks of Quebec, Dominion notes to any amount on the pledge of approved securities deposited with the Minister. These advances bore interest and no gold coverage was required to be held on Dominion notes so advanced; (3) Chap. 4 of the Statutes of 1915, authorizing the Government to issue Dominion notes to the amount of \$26,000,000 without gold coverage, but partly covered by the deposit of \$16,000,000 of railway securities guaranteed by the Dominion Government.\*

\* The following is an outline of Canadian legislation respecting the issue of notes. After Confederation, by an Act of 1868 (31 Vict., c. 46), authority was given for the issue of notes to the extent of eight million dollars. The reserve was fixed at 20 p.c. up to a circulation of five millions; beyond that, 25 p.c. to be held as reserve. The law of 1870 (33 Vict., c. 10) authorized a limit of nine million dollars. The reserve was fixed at 20 p.c., but the nine millions were only to be issued when the specie amounted to two millions. Dollar for dollar was to be held beyond nine millions. In 1872 (35 Vict., c. 7) the reserve for the excess over nine millions was fixed at 35 p.c. in specie. This was amended in 1875 (38 Vict., c. 5) by requiring dollar for dollar beyond twelve millions; for the reserve between nine and twelve millions 50 p.c. in specie was to be held. In 1876 the law respecting Dominion notes was extended to the provinces of Prince Edward Island, British Columbia and Manitoba. In 1880 (43 Vict., c. 13) the basis of the present standard was established. A reserve of 25 p.c. in gold and guaranteed debentures was required, of which 15 p.c. at least was to be in gold. The limit was raised to twenty million dollars. In 1894 (57-58 Vict., c. 21) the limit was raised to twenty-five millions, but this was found unworkable and was repealed in 1895 (58-59 Vict., c. 16), and authority was given to issue notes to any amount over twenty millions, on holding dollar for dollar beyond that sum. In 1903 (3 Edw. VII, c. 43) the Minister of Finance was required to hold gold and guaranteed debentures of not less than 25 p.c. on Dominion notes issued and outstanding up to thirty million dollars; beyond thirty millions he was required to hold gold equal to the excess. The Dominion Notes Act of 1914 (5 Geo. V, c. 4), passed in the short war session of August, 1914, provided that a gold reserve of not less than 25 p.c. should be held against issues of Dominion notes up to \$50,000,000 and dollar for dollar against the excess. In 1934, it was provided that a gold reserve of 25 p.c. be held against issues of Dominion notes up to \$120,000,000 and dollar for dollar against the excess. In the session of 1914, the Government was given power, by 5 Geo. V, c. 3, "in case of war, invasion, riot or insurrection, real or apprehended, and in case of any real or apprehended financial crisis", by proclamation to authorize the issue of Dominion notes to the chartered banks upon their pledge of approved securities deposited with the Minister of Finance. This was made a regular and permanent feature of the system by c. 48 of the Statutes of 1923, consolidated as c. 70, R.S.C., 1927, as stated above.

Dominion notes are of two types, those in general circulation and those used only in inter-bank transactions, the latter being described as "special" notes. Notes in general circulation are of the denominations 25 cents, \$1, \$2, \$4, \$5, \$50, \$500, \$1,000, but for a considerable time no notes of \$4 and \$50 denominations have been issued. "Special" notes are mainly of \$5,000 and \$50,000 denominations, \$1,000 "specials" being no longer issued. The amounts of each denomination of both types of notes in circulation are given, as at Mar. 31 of each recent year, in Table 7, while Tables 5 and 6 are concerned with gold reserves.

### 5.—Dominion Notes Outstanding and Reserves as at June 30, 1900-34.

NOTE.—Corresponding figures for 1890-99 inclusive are given at p. 886 of the 1933 Year Book.

<sup>1</sup> Includes Dominion notes in the Central Gold Reserves as security for bank note circulation.

<sup>2</sup> Includes provincial notes amounting to \$32,857 in 1890, reduced to \$27,589 on June 30, 1933, and to \$27,585 on June 30, 1934.

<sup>3</sup> Includes issue of \$50,000 notes, 1919-34.

<sup>4</sup> Per capita circulation in 1900 is taken as 100.

<sup>5</sup> The circulation uncovered by specie reserve was to a considerable extent covered, between 1890 and 1910, by the holdings of guaranteed debentures amounting to \$1,946,666. Since 1914 a part of the issue of Dominion notes outstanding has been covered by the holding of securities approved under the Finance Act, 1914, and the Finance Act (R.S.C., 1927, c. 70).

<sup>1</sup>Revised since the publication of the 1933 Year Book.

**Bank Notes.**—Bank notes form the chief circulating medium used in Canada. Under the Bank Act, the banks are authorized to issue notes of the denominations of \$5 and multiples thereof to the amount of their paid-up capital. These notes are not in normal times legal tender. See pp. 962-963 for 1934 revision of Bank Act, outlining gradual reduction in note issue of chartered banks.

In addition, during the period of the movement of the crops (Sept. 1 to Feb. 28-29), the banks were permitted to issue "excess" circulation to the amount of 15 p.c. of their combined capital and "rest" or reserve funds. In the event of war or panic the Government might permit the "excess" to run all the year. The banks paid interest on this excess at 5 p.c. If a bank desired to extend its circulation, it might also do so by depositing dollar for dollar in gold or Dominion notes in the Central Gold Reserves. These issues of bank notes are no longer allowed since the establishment of the Bank of Canada.

In case of insolvency the notes of a bank are a first lien upon its assets. Notes are further secured, in case of insolvency, by the Bank Note Circulation Redemption Fund, to which all banks contribute 5 p.c. of their average circulation not covered

by gold or Dominion notes deposited in the Central Gold Reserves established in 1913. The sum thus secured is available for the redemption of the notes of failed banks.

The figures of bank note circulation are given in Table 8. Table 9 brings together the statistics of the amount of circulating media in the hands of the general public, yearly averages being used where possible. "In the hands of the general public" here includes coin and small Dominion notes in the tills of the banks used for making change as well as that in the hands of the general public, but does not include Dominion notes of denominations larger than five dollars which were used until recently for inter-bank transactions and reserves.\* In both Tables 8 and 9 "bank notes in circulation" includes notes of other banks held by the banks, averaging about \$10,400,000 in 1934. As for the silver, nickel and bronze coinage in Table 9, the figures are the total amounts issued by the Mint since 1858 less amounts withdrawn from circulation and therefore include amounts held by the banks as well as coins lost by the public, which over such a period would probably amount to a considerable sum.

\* As a result of the organization of the Bank of Canada in March, 1935, All Dominion notes are being withdrawn from circulation and are being replaced by Bank of Canada notes, the denominations of which range over \$5. See p. 964.

#### 8.—Statistics of Bank Note Circulation, calendar years 1900-34.

NOTE.—The statistics in this table are averages computed from the twelve monthly returns in each year. Figures for 1892-99 will be found at p. 861 of the 1927-28 Year Book.

| 1934.....              | 28,702,640           | 2,256,268            | 2,745,296            | 135,537,793                 | 39,419,123                                                                                 | 208,661,120 | 19.26          | 157                                            |

<sup>1</sup>Figures supplied by the Mint as at Dec. 31 of each year, are the net issues of coinage since 1858 (see Table 4, pp. 951-952).<sup>2</sup>Yearly averages.<sup>3</sup>Dominion notes of larger denominations in hands of banks are not included, but provincial notes, amounting to \$27,589 in 1933 and \$27,586 in 1934, are included.<sup>4</sup>Per capita circulation in 1900=100.**Section 2.—Banking in Canada.**

**Historical.**—In the early days of banking, one of the chief functions of banks was to issue promissory notes payable to the bearer on demand; where the banks' credit was good these notes passed freely from hand to hand, and were the chief circulating medium in the Canadas. In some cases in the Maritime Provinces bank notes were preferred to those issued by the Provincial Governments.

The need of a uniform circulating medium in Canada was felt by the merchants of Montreal toward the end of the eighteenth century, and the prospectus of a proposed bank of issue to be known as the Canada Banking Company was issued in 1792. This scheme, however, depended chiefly on the co-operation of

British capital and was frustrated by the outbreak of war with France. A second project in 1808 for the incorporation of a Bank of Canada failed to secure the assent of the Legislature of Lower Canada.

At the close of the War of 1812 the army bill currency was withdrawn, and public attention once more turned to the expediency of securing a currency through the establishment of banks. The Bank of Montreal began business toward the end of 1817 as a private institution, under articles of association based on the first charter of the Bank of the United States. In the following year, under similar articles of association, the Quebec Bank was established, as well as the Bank of Canada at Montreal and the Bank of Upper Canada at Kingston. The three Lower Canadian institutions obtained their provincial charters in 1822, while the Bank of Upper Canada was superseded by a second Bank of Upper Canada established at York (Toronto) as a chartered bank in 1821. Meanwhile the Bank of New Brunswick had been incorporated in 1820, while in Nova Scotia the Halifax Banking Co. (private) commenced business in 1825, and the Bank of Nova Scotia received a regular charter in 1832. With all of these earlier banks note issue was an important part of their business.

The Bank of British North America, previously incorporated in the United Kingdom, commenced business in Canada in 1836, while Molson's Bank was established in 1853, the Bank of Toronto in 1855, the Banque Nationale in 1860 and the Banque Jacques-Cartier (later the Banque Provinciale du Canada) in 1862. The Union Bank was established in 1866, the Canadian Bank of Commerce in 1867. There were no fewer than 28 banks in existence at Confederation. These were as follows:—

*Ontario and Quebec.*

Bank of Montreal.  
Quebec Bank.  
Commercial Bank of Canada.  
City Bank.  
Gore Bank.  
Bank of British North America.  
Banque du Peuple.  
Niagara District Bank.  
Molson's Bank.  
Bank of Toronto.  
Ontario Bank.  
Eastern Townships Bank.  
Banque Nationale.  
Banque Jacques-Cartier.  
Merchants' Bank of Canada.  
Royal Canadian Bank.

Union Bank of Lower Canada.  
Mechanics' Bank.  
Canadian Bank of Commerce.

*Nova Scotia.*

Bank of Yarmouth.  
Merchants' Bank of Halifax.  
People's Bank of Halifax.  
Union Bank of Halifax.  
Bank of Nova Scotia.

*New Brunswick.*

Bank of New Brunswick.  
Commercial Bank of New Brunswick.  
St. Stephen's Bank.  
People's Bank of New Brunswick.

### Subsection 1.—The Canadian Banking System in General.\*

A brief résumé of the Canadian banking system must emphasize: (1) its growth, from the beginning closely related to the Montreal produce and export trade and to the commerce of Halifax and Saint John; (2) its development of the branch bank system in order to meet the demands of a rapidly moving frontier of settlement; (3) its adaptation to the requirements of the grain and cattle trade of the west; and (4) the consolidation during later years of the features which tended towards its early success. The development of a stable system has been accompanied by failures,† particularly marked about the middle of the 19th century, but progress has nevertheless been steady, based on sound principles, and adapted as closely as could be to the particular needs of the country.

\*For details regarding Canadian bank note issue, see pp. 954-955. †See Table 23, pp. 984-985.

The branch bank is perhaps the most distinctive feature of the Canadian system as it exists to-day, and for a country such as Canada, vast in area and with a small population, the plan has proved a good one. A result of the growth of branch banks has been the partially centralized system that now obtains—centralized as to banks, of which there are now 10, rather than as to districts as in the partially centralized system of the United States.

A second peculiarity of the system is the existence and operation of the Canadian Bankers' Association. Through this body, which was incorporated in 1900 and acts under the authority of the Dominion Treasury Board, co-operation of individual banks is facilitated and encouraged. The association supervises clearing-house transactions, and oversees the printing and issue of notes to its members. Adherence to similar principles and a linking together of the credit of the system result from the co-operation secured through the association.

The elimination of weaker banks or their amalgamation with more stable institutions has been a progressive move towards greater efficiency. Co-operation between the banks and the Dominion Government has been made permanent through the medium of periodic returns and the regulation of note issues and reserves.

Apart from the many detailed services rendered to its clients, the Canadian banking system may be said to perform three main functions as follows:—

1. To put into circulation the paper currency which forms the circulating medium for small exchanges.
2. To provide a mechanism of exchange by the issue of bills of exchange, etc.
3. To form a means by which the credit of the banks and their unused deposits may be put to immediate productive use.

**Legislation Regarding Chartered Banks.\***—The history of Canadian banking legislation began over a century ago with the granting, between 1817 and 1822, of the Royal Assent to charters incorporating the Bank of New Brunswick, the Bank of Upper Canada, the Bank of Montreal, the Quebec Bank and the then Bank of Canada. The right to issue bank notes was exercised by private banks without legislative sanction for a considerable period after the early charters were granted, and before banks became the subject of general legislation. In Lower Canada the practical monopoly of issue was conferred upon the chartered banks by an Act of 1830, whereby the total amount of notes of less than £1 (\$4)† in circulation might not at any time exceed one-fifth of the paid-up capital, and no notes under 5 shillings (\$1) might be issued, it being further provided that all issues of less than £1 might be limited or suppressed by the Legislature.

In 1841, in the first session of the Canadian Legislature after the Union, a tax of 1 p.c. was imposed upon bank note circulation, which was limited to the amount of paid-up capital, notes of less than £1 not to exceed one-fifth of such capital. Various charters granted or renewed after the Union included provisions prohibiting banks from holding shares of their own stock or granting advances there-against. They were also prohibited from lending on the security of lands, houses, ships or pledge of merchandise (though such could be taken as additional security for debts previously contracted) or holding lands or houses except for the transaction of their business, neither could they own ships nor be engaged in trade except as dealers in bullion or bills of exchange, the object being to confine trans-

\* Revised from information furnished by the Office of the Inspector-General of Banks, Department of Finance.

† In the "Old Currency" £1 was equivalent to \$4 and 1 shilling to 20c.

actions to legitimate banking business. Statements of assets and liabilities were to be submitted periodically—half-yearly or yearly—and such further information as the Government might call for was to be supplied confidentially. A further and important enactment was the imposition of the double liability upon shareholders, which had not previously existed with respect to the banks of Lower Canada, although it had been for several years a requirement of the younger banks of Upper Canada and first appeared in British North America in the Act incorporating the Bank of Nova Scotia, enacted in 1832. Suspension of specie payments on demand for a period of 60 days, either consecutively or at intervals during one year, was to cause forfeiture of charter. Total liabilities were not to exceed thrice “the aggregate amount of capital stock paid in, and the deposit made in the bank in specie and Government securities for money”, but this provision proved of doubtful utility.

In 1850 what was known as the “Free Banking Act” prohibited any but the chartered banks or other corporations or persons authorized under the new Act from issuing notes. A period of one year was allowed for banks or companies, whose right of issue was thus withdrawn, to retire their notes outstanding. It was provided that individuals or partners might establish banks, or joint stock companies with a minimum capital of £25,000 (\$100,000) might be formed to carry on the business, but in such cases operations were to be confined to an office in only one place and total liabilities were not to exceed thrice the amount of paid-up capital. In order to issue notes the banks thus formed were obliged to deposit with the Receiver-General provincial or provincially guaranteed securities for not less than £25,000 (\$100,000) par value, receiving therefor registered notes. The chartered banks already existing could surrender their right of circulation against assets and secure from the Receiver-General registered notes in return for the deposit of securities, which special issue was not subject to the 1 p.c. tax imposed by the Act of 1841. The legislation included provisions giving effect for the first time to the principle of making bank notes a preferred claim, it being stipulated with respect to any one-office banks established under the Act that, if securities against outstanding notes did not realize sufficient, the general assets of a bank, if wound up, were first to be applied towards the payment of its notes.

Legislation of 1851 increased the period allowed for the retirement of note issues not in conformity with previous legislation from one to five years, provided at least one-fourth of the average circulation during the year 1850—and not secured by the pledge of bonds—was retired annually. Provision was made for partial remission and entire exemption within a specified period from the tax on bank note circulation, subject to certain restriction of such circulation. At the same time permission was granted to issue in excess of the restricted formula against gold or silver coin or bullion, or debentures of any kind issued by the Receiver-General, without requiring the banks actually to deposit such debentures and secure registered notes. The debentures, however, were to be applicable exclusively to the redemption of notes in case of failure. Monthly rather than half-yearly returns now became necessary. In 1853, to encourage the issue of “secured” notes, the issue was permitted in excess of paid-up capital to the extent of specie holdings or debentures receivable, although actual deposit of securities with the Receiver-General was not required. The tax of 1 p.c. was to be calculated only on the average circulation outstanding in excess of such specie and security holdings. Until 1858 banks charging or receiving interest at a rate higher than 6 p.c. were liable to onerous penalties. In that year it was enacted generally that any rate of interest might be

exacted, but banks were prohibited from taking or stipulating for a higher rate than 7 p.c. In 1859, at the urgent request of the banks, a measure was passed authorizing them to make advances on the security of bills of lading and warehouse receipts covering certain commodities.

By 1861-62 free banking had practically run its course. In all, six banks had taken advantage of the legislation, one of which—the Bank of British North America—doubtless found it valuable. The others did not thrive. The Act was finally repealed by the Provincial Notes Act of 1866, which aimed at a gradual reduction in the volume of bank note circulation.

By Section 91 of the British North America Act, the right to legislate respecting banking, the incorporation of banks and the issue of paper money was assigned exclusively to the Dominion Parliament. A temporary measure was passed in 1867, largely by way of re-enactment until 1870 of previous legislation, but extending the powers of banks formerly incorporated by any of the provinces to the territory of the whole Dominion, and subjecting banks in New Brunswick and Nova Scotia to a tax of 1 p.c. upon the excess of their average notes in circulation above their average holdings of coin and bullion. (In these provinces there had been no general banking Act, special provisions being embodied in the respective charters which differed in only a few essential respects from those granted in Upper and Lower Canada.) It was re-enacted that banks were entitled to hold and dispose of mortgages on realty as additional security for debts already contracted and to acquire title to mortgaged property if necessary.

The Bank Act of 1870 provided that new banks must have a minimum paid-up capital of \$200,000 and that at least 20 p.c. of the subscribed capital must be paid up in each year after the commencement of business. A proposal to limit the liabilities of banks in relation to capital and specie and Government debenture holdings was not translated into legislation. Bank notes in circulation were not to exceed the amount of paid-up capital. The right to issue notes under \$4 was withdrawn, largely in consideration of the abolition of the tax of 1 p.c. on note circulation. If possible up to 50 p.c., but in no case less than one-third, of a bank's cash reserves were to be held in Dominion notes. Dividends were limited to 8 p.c. until or unless the bank's reserve fund was the equivalent of 20 p.c. of its paid-up capital. In case of the failure of a bank, double liability of shareholders became enforceable without waiting for the realization of the bank's general assets. Banks were required to transmit certified lists of shareholders annually, to be laid before Parliament. Any existing bank was permitted, on the authority of the shareholders, to apply for an extension of its charter, and the Governor in Council, upon the recommendation of the Minister of Justice and the Treasury Board, was empowered to extend such charter to 1881. Any suspension by a bank of payment of its liabilities for a period of 90 days would constitute insolvency, and operate as a forfeiture of its charter.

In 1871 the first comprehensive Banking Act of the Dominion was passed. A large part of the statute was devoted to the re-enactment and consolidation of legislation already in force, although the measure of 1870 contained the main features of the Government's policy. The procedure relative to extension of charters laid down in the preceding year was superseded by this Act, which became the charter of the banks until July 1, 1881, that date being set in contemplation of regular decennial revisions. No new bank was permitted to commence business

with less than \$500,000 capital *bona fide* subscribed and \$100,000 similarly paid up, with the further proviso that at least \$200,000 must be paid up within two years after commencement of business. The sections respecting loans against warehouse receipts, etc., were thoroughly revised and difficulties of procedure removed. Banks were permitted to take security on commodities in store pending marketing, and also while undergoing conversion from the raw to the finished state. Advances were allowed upon security of shares of other banks. It was provided that the rate of interest or discount charged by a bank should not exceed 7 p.c. and that no higher rate should be recoverable. Monthly returns of assets and liabilities were required. Certain technical amendments were made to the Bank Act in 1872, 1873 and 1875. In 1879 the power to lend upon the security of shares of other banks was repealed.

At the first general revision of the Bank Act in 1880 (effective 1881), a note holder was definitely recognized as a preferred creditor, claims of the Dominion and Provincial Governments, respectively, ranking next in order of preference. Banks were prohibited from issuing notes under \$5, higher denominations to be multiples of this sum. Dominion notes were now to constitute not less than 40 p.c. of the bank's cash reserves. Monthly returns of a more detailed character were to be made. The Act was amended in 1883 to enforce more effectively the prohibitions, restrictions and duties already imposed upon the banks. The use of certain titles by private bankers not operating under the provisions of the Act was prohibited.

At the revision of 1890 (effective 1891), it was stipulated that not less than \$250,000 capital must be paid up before a certificate permitting a bank to commence business could be issued by the Treasury Board. A period of one year from the date of the charter was allowed for the payment of the capital and the carrying out of other preliminaries. Dividends were not to exceed 8 p.c. until or unless the reserve fund was the equivalent of 30 p.c. of the paid-up capital. A fund known as the "Bank Note Circulation Redemption Fund" was established, consisting of deposits made by the banks with the Minister of Finance of amounts equal to 5 p.c. of their average note circulation, such deposits to be subject to adjustment annually, and to constitute a guarantee of the payment of all notes of a suspended bank with interest at 6 p.c. from the date of suspension until the date when their redemption was undertaken by the liquidator. Failing action by the liquidator within two months, the Minister of Finance was authorized to redeem the notes out of the fund, and such outlay, if not made good out of the assets of the failed bank, was to be reimbursed by the contributing banks *pro rata* to their contributions. Another major change gave the banks, in certain classes of loans, the same legal power to take security over the borrowers' goods as had previously been granted by warehouse receipts. This enactment served to make general and more clear principles already recognized by previous legislation and practice. Directors' qualifications were set out more clearly and it was now provided that a majority only of directors, instead of all, need be British subjects. Penalties for the excessive issue of circulation were made more severe.

The revision of 1900 (effective 1901) recognized the Canadian Bankers' Association as an agency in the supervision and control of certain activities of the banks. It was charged, under the Treasury Board, with the responsibility of supervising the printing and distribution of notes to the banks and their issue and destruction;

also with control over clearing houses and the appointment of curators to supervise the affairs of suspended banks. The amended Act also included provisions permitting one bank to sell its assets to another. More detailed monthly returns were required and the interest on notes of failed banks was reduced from 6 p.c. to 5 p.c. In 1908, after the financial crisis of 1907, provision was made for emergency circulation during the crop moving season from October to January, when banks were allowed to issue excess circulation up to 15 p.c. of their combined paid-up capital and rest or reserve funds, this emergency circulation to be taxed at a rate not exceeding 5 p.c. per annum. In 1912, the period was extended to the six months from September to February inclusive.

At the fourth revision of the Bank Act in 1913 provision was made for an audit of each bank's affairs by auditors appointed by the shareholders. There was also provision for the establishment of Central Gold Reserves in which banks might deposit gold or Dominion notes for the purpose of issuing additional notes of their own there-against. Annual reports to the Minister of the fair market value of real and immovable property held by the banks for their own use were required. Banks were empowered to lend to farmers upon security of their threshed grain. As a war measure the provision for emergency circulation was extended in 1914 to cover the whole year and banks were further authorized to make payments in their own notes instead of in gold or Dominion notes.

The fifth revision of 1923 (13-14 Geo. V, c. 32) resulted in numerous important changes. The qualifications of provisional directors were re-defined, while provision was made for keeping records of attendance at directors' meetings and bringing them to the notice of shareholders. Annual and monthly statements were given further attention and more complete returns required, including statements of controlled companies in the names of which any part of a bank's operations were carried on. Other or special returns were to be made if called for by the Minister. Two auditors were now to be appointed by the shareholders instead of one, and the qualifications, duties and responsibilities of auditors were more clearly defined. The personal liability of directors in case of distribution of profits in excess of legal limits was also more definitely expressed. Regulations regarding loans were amended and advances to any officer or clerk of a bank could not, in any circumstances, exceed \$10,000. Registration of security for loans under Sec. 88 was provided for. It became necessary for guarantee and pension funds to be invested in trustee securities. The punishment of directors and other bank officials for making false statements of a bank's position was provided for in Sec. 153. In 1924, as a result of the failure of the Home Bank of Canada, provision was made for periodical examination of the chartered banks by an Inspector-General of Banks, who was to be an officer of the Department of Finance.

The sixth revision of the Bank Act was postponed from 1933 to 1934 (c. 24), for adaptation to the establishment of the new Bank of Canada, and most of the alterations were to provide for the relations of the chartered banks with the Bank of Canada when the latter should be organized and authorized to commence business. The chartered banks were then to carry a reserve (consisting of a deposit with or notes of the Bank of Canada) amounting to at least 5 p.c. of their deposit liabilities in Canada, and in addition to maintain adequate reserves for external liabilities. The notes of the chartered banks were to be gradually replaced by those of the Bank of Canada as the circulating medium in Canada. To this end notes in circu-

lation of chartered banks were not to exceed their unimpaired paid-up capital from the time the Bank of Canada commenced business and were to be reduced by 5 p.c. per annum for five years from Jan. 1, 1936, and 10 p.c. per annum for five years from Jan. 1, 1941, so that at the end of ten years they should not exceed 25 p.c. of the paid-up capital. At the same time, the liability of shareholders under the double liability provision was limited to that proportion of the par value per share which the authorized note issue at the time bore to the paid-up capital of the bank. Other important changes in general provisions included: (1) the curator of a suspended bank was to be appointed or removed by the Minister of Finance, instead of by the Canadian Bankers' Association; and (2) the terms "bank", "banker" or "banking" could not be applied to any activities in Canada except those of chartered banks or approved savings banks; (3) a limitation of 5 p.c. of the paid-up capital (instead of 10 p.c. as formerly) was placed on loans to directors, or any firm, company or corporation in which the President, the General Manager or a director is a partner or shareholder, without the approval of two-thirds of the directors present at a regular or special meeting called for the purpose; (4) a director was prohibited from being present or voting at a meeting of the Board when loans to himself or any firm, company or corporation of which he is a partner or director, are under consideration, an infraction of this prohibition being attended by severe penalties as well as automatic disqualification of such director; (5) a bank was not permitted to allow its name to appear, except as banker for receiving applications, upon any prospectus or advertisement respecting the issue of securities apart from government or municipal issues and certain others of the specific type mentioned in the Act; (6) changes were made to permit of loans under Section 88 against seed grain, binder twine and fertilizer; (7) a definite prohibition was enacted against the charge of a higher rate of interest or discount than 7 p.c. in any part of Canada except the Territories, any violation of such prohibition being attended by penalties against both the bank and the officer responsible; (8) monthly returns were amplified for the purpose of securing a clearer appreciation of the position of the banks, and certain additional returns called for.

**The Bank of Canada.**—Chapter 43 of the Statutes of 1934, "An Act to incorporate the Bank of Canada", provided for the establishment of a central bank in Canada. The capital of the Bank is \$5,000,000, divided into shares of \$50 par value. These shares were offered for public subscription by the Minister of Finance on Sept. 17, 1934, and were largely oversubscribed. The maximum allotment to any one individual or corporation was 15 shares.

Shares of the Bank may be held only by British subjects ordinarily resident in Canada, or by corporations controlled by British subjects ordinarily resident in Canada. The maximum holding permitted one person is 50 shares. Directors, officers or employees of the chartered banks may not hold shares of the Bank.

The Bank is authorized to pay cumulative dividends of  $4\frac{1}{2}$  p.c. per annum from its profits after making such provision as the board thinks proper for bad and doubtful debts, depreciation in assets, pension funds and all such matters as are

properly provided for by banks. The remaining surplus will be paid into the Consolidated Revenue Fund of Canada, and to the rest fund of the Bank, in specified proportions.

The Bank may buy and sell securities of the Dominion, the provinces, the United Kingdom and the United States of America, without restriction if of a maturity not exceeding two years, and in limited amounts if of longer maturity. It may also buy and sell securities of British Dominions and France without restriction, if maturing within six months. Short-term securities of the Dominion or provinces may be rediscounted. The Bank may buy and sell certain classes of commercial paper of limited currency, and if endorsed by a chartered bank may rediscount such commercial paper. Advances for six-month periods may be made to chartered banks, Quebec savings banks, the Dominion or any province against certain classes of collateral, and advances of specified duration may be made to the Dominion or any province in amounts not exceeding a fixed proportion of such government's revenue. The Bank may buy and sell gold, silver, nickel and bronze coin and gold and silver bullion,<sup>\*</sup> and may deal in foreign exchange.

The Bank has assumed the liability for Dominion notes outstanding and is replacing them with its own notes in denominations of \$1, \$2, \$5, \$10, \$20, \$50, \$100, \$500, and \$1,000. The chartered banks are required (under the Bank Act of 1934) to reduce the issue of their own bank notes to 25 p.c. of their paid-up capital during the next 10 years.

The Bank of Canada must maintain a reserve of gold equal to not less than 25 p.c. of its total note and deposit liabilities in Canada. The reserve,\* in addition to gold, may include silver bullion, balances with the Bank of England, the Bank for International Settlements, the Federal Reserve Bank of New York and central banks in gold standard countries, Treasury bills of the United States of America or the United Kingdom having a maturity not exceeding 3 months, and bills of exchange having a maturity not exceeding 90 days, payable in London, New York, or in a gold standard country, less any liabilities of the Bank payable in the currency of the United Kingdom, the United States of America, or a gold standard country.

The bank has an obligation to sell gold in the form of bars on demand, but this may be, and is at present, suspended by Order in Council.

The chartered banks are required to maintain a reserve of not less than 5 p.c. of their deposit liabilities within Canada in the form of deposits with and notes of the Bank.

The Bank will act as the fiscal agent of the Dominion of Canada and may by agreement act as banker or fiscal agent of any province. The Bank must not accept deposits from individuals and thus cannot compete with the chartered banks in commercial banking fields.

<sup>\*</sup>In the weekly statement on pp. 965-966, the net reserve is described as Item 1 of Assets less Item 5 of Liabilities (i.e., sundry liabilities payable in sterling, U.S.A. other foreign gold currencies).

The head office of the Bank is at Ottawa, and it has an agency in each province, namely, at Montreal, Toronto, Winnipeg, Regina, Calgary, Vancouver, Saint John, Halifax and Charlottetown.

The Governor of the Bank is its chief executive officer, and he is assisted by a Deputy Governor and an Assistant Deputy Governor. The first Governors were appointed by the Government and are as follows: Governor, G. F. Towers; Deputy Governor, J. A. C. Osborne; and Assistant Deputy Governor, L. P. St-Amour. Subsequent appointments are to be made by the Board of Directors of the Bank subject to the approval of the Governor in Council.

At the first meeting of the shareholders on Jan. 23, 1935, seven directors were elected for terms to run as follows: one until the 3rd annual general meeting, two until the 4th, two until the 5th, and two until the 6th annual general meeting. In future the directors will be elected by the shareholders for terms of 5 years. Directors must hold at least 10 shares of capital stock of the Bank, must be British subjects ordinarily resident in Canada, must not receive remuneration out of public funds in any capacity, and must have no connection with a chartered bank.

There is also an Executive Committee of the Board of Directors consisting of the Governor, Deputy Governor, and one member of the board, which must meet once a week. This committee has the same powers as the board, but every decision is submitted to the Board of Directors at its next meeting. The board must meet at least four times a year. The Deputy Minister of Finance is an *ex officio* member of the Board of Directors and of the Executive Committee, but is without a vote.

The Bank commenced business on Mar. 11, 1935. A statement is required of the assets and liabilities of the Bank as at the close of business on each Wednesday. The statement of the Bank as at Wednesday, April 17, 1935, follows:—

## BANK OF CANADA.

Statement of Assets and Liabilities as at Wednesday, April 17th, 1935.

| LIABILITIES.                                                                       |                | ASSETS.                                                  |                |

Ratio of Net Reserve (Item 1 of Assets less Item 5 of Liabilities) to Notes and Deposits Liabilities: 45.61 per centum.

**Banking Statistics.**—In Table 10 is given an historical summary of Canadian banking business since Confederation. In order to afford a clear view of the nature of banking transactions in Canada, bank liabilities have been classified in two main groups, liabilities to shareholders and liabilities to the public, only the latter group being ordinarily considered when determining the financial position of any such institution. Assets are divided into four groups, other assets being included in the total. As of interest to students of banking practice, the relative rates of increase of capital and reserve funds may be noted on the accompanying graphs, also the great increase in the proportion of liabilities to the public to total liabilities, and the gradually increasing percentage of liabilities to the public to total assets. The declining proportion of notes in circulation to total liabilities to the public is also characteristic of the evolution of banking in recent times. Holdings of Dominion and Provincial Government and municipal securities were relatively insignificant prior to the Great War.

<sup>1</sup> Includes other assets. <sup>2</sup> Six-month average.

**Bank Assets and Liabilities.**—Tables 11 and 12 show in detail the assets and liabilities of Canadian chartered banks for the four years 1931 to 1934, the figures being yearly averages of the totals shown in the monthly statements made to the Minister of Finance.

**11.—Assets of Chartered Banks in the calendar years 1931-34.**

NOTE.—The statistics in this table are averages computed from the twelve monthly returns in each year.

**Deposits, Loans and Discounts.**—As an index of the course of banking business, of the nature of many transactions undertaken and of the general security of bank assets, loans and discounts are of great value. They illustrate clearly the channels into which a large proportion of the potential earning power of the banks is directed, and, by providing a comparison between investments made in lending operations inside and outside of Canada, afford essential information regarding the conduct by a bank of one of its most important activities.

Bank deposits (the demand deposits being to a large extent the product of lending operations, by which credit is advanced on security followed by the deposit of the proceeds of a loan) are also of considerable importance, and, on account of their derivation, are one of the most valuable records of the volume of business done at any time.

Tables 13 and 14, following, give the deposits and loans of Canadian chartered banks for the years 1930 to 1934.

### 13.—Deposits in Chartered Banks in Canada and Elsewhere, for the calendar years 1930-34.

NOTE.—The statistics in this table are averages computed from the twelve monthly returns in each year.

| Item.                                                    | 1930.                | 1931.                | 1932.                | 1933.                | 1934.                |

| <b>Totals, Deposits.....</b>                             | <b>2,516,611,587</b> | <b>2,422,834,828</b> | <b>2,256,639,530</b> | <b>2,236,841,539</b> | <b>2,274,607,936</b> |

As a result of an amendment to the Bank Act in 1934 deposits and loans are required to be classified according to size of the deposit, or purpose of the loan, each year. The following is the classification of deposits payable on demand in Canada and payable after notice in Canada as at Oct. 31, 1934:—

#### CLASSIFICATION OF DEPOSITS.

|                                                                                                                          | Number.          | Amount.              |
|--------------------------------------------------------------------------------------------------------------------------|------------------|----------------------|
| Deposits Payable on Demand—                                                                                              |                  | \$                   |
| (1) Deposits of \$1,000 or less.....                                                                                     | 580,929          | 71,760,883           |
| (2) Deposits over \$1,000 to \$5,000.....                                                                                | 35,259           | 72,266,442           |
| (3) Deposits over \$5,000 to \$25,000.....                                                                               | 8,633            | 88,673,885           |
| (4) Deposits over \$25,000 to \$100,000.....                                                                             | 1,877            | 87,501,586           |
| (5) Deposits in excess of \$100,000.....                                                                                 | 599              | 218,350,690          |
| (6) Adjustment representing drafts issued, certified cheques, items in transit, etc.....                                 | —                | 3,890,269            |
| <b>Totals.....</b>                                                                                                       | <b>627,297</b>   | <b>542,443,755</b>   |
| Deposits Payable After Notice—                                                                                           |                  |                      |
| (1) Deposits of \$1,000 or less.....                                                                                     | 3,765,971        | 416,528,692          |
| (2) Deposits over \$1,000 to \$5,000.....                                                                                | 246,057          | 485,695,559          |
| (3) Deposits over \$5,000 to \$25,000.....                                                                               | 28,896           | 249,589,678          |
| (4) Deposits over \$25,000 to \$100,000.....                                                                             | 1,853            | 82,550,359           |
| (5) Deposits in excess of \$100,000.....                                                                                 | 390              | 131,626,199          |
| (6) Adjustment representing certified cheques, interest accrued on interest-bearing accounts, items in transit, etc..... | —                | 4,188,088            |
| <b>Totals.....</b>                                                                                                       | <b>4,043,167</b> | <b>1,370,178,575</b> |

### 14.—Loans of Chartered Banks in Canada and Elsewhere, for the calendar years 1930-34.

NOTE.—The statistics in this table are averages computed from the twelve monthly returns in each year.

| Item.                                                   | 1930.                | 1931.                | 1932.                | 1933.                | 1934.                |

<sup>1</sup>Includes loans to cities, towns, municipalities and school districts.

The following classification of bank loans in Canada as at Oct. 31, 1934, has been made as a result of an amendment to the Bank Act in 1934:—

| CLASSIFICATION OF LOANS.                                                                                    |             | \$ | \$                            |
|-------------------------------------------------------------------------------------------------------------|-------------|----|-------------------------------|
| 1. Provincial Governments.....                                                                              |             |    | 26,822,179                    |
| 2. Municipal governments and school districts.....                                                          |             |    | 107,414,483                   |
| 3. Agriculture—                                                                                             |             |    |                               |
| (a) Farmers' loans, cattle loans, fruit growers.....                                                        | 64,229,744  |    |                               |
| (b) Loans to grain dealers, grain exporters and seed merchants.....                                         | 150,515,305 |    |                               |
|                                                                                                             |             |    | <u>214,745,049</u>            |
| 4. Financial—                                                                                               |             |    |                               |
| (a) Call loans and other accommodation to brokers and bond dealers.....                                     | 90,748,241  |    |                               |
| (b) Loans to trust, loan, mortgage, investment and insurance companies and other financial institutions.... | 69,956,745  |    |                               |
| (c) Loans to individuals against approved stocks and bonds not otherwise classified.....                    | 115,192,444 |    |                               |
|                                                                                                             |             |    | <u>275,897,431</u>            |
| 5. Merchandising, wholesale and retail.....                                                                 |             |    | 117,468,420                   |
| 6. Manufacturers of and dealers in lumber, pulpwood, and products thereof..                                 |             |    | 74,283,150                    |
| 7. Other manufacturing of all descriptions.....                                                             |             |    | 140,125,188                   |
| 8. Mining.....                                                                                              |             |    | 6,621,121                     |
| 9. Fishing, including loans to packers and curers of fish.....                                              |             |    | 6,965,205                     |
| 10. Public utilities, including transportation companies.....                                               |             |    | 71,358,370                    |
| 11. Loans to building contractors and others for building purposes.....                                     |             |    | 21,792,645                    |
| 12. Loans to churches, parishes, hospitals, charitable and religious institutions.....                      |             |    | 19,683,072                    |
| 13. Other loans.....                                                                                        |             |    | 66,532,517                    |
| Total.....                                                                                                  |             |    | <u><u>\$1,149,708,830</u></u> |

**Bank Reserves.**—An important change has been made in the regulations governing bank reserves since the Bank of Canada commenced operations. The chartered banks are now required to carry deposits with or notes of the Bank of Canada together constituting a reserve amounting to 5 p.c. of their deposit liabilities in Canada in addition to maintaining adequate reserves against their external liabilities. Formerly, however, it was required that 40 p.c. of whatever cash reserves a bank found it expedient to carry should be in Dominion notes. A second provision instructed the Minister of Finance to arrange for the delivery of Dominion notes to any bank in exchange for specie. Thus the gold reserve against Dominion notes, to the extent that the notes were held by the banks, was reserve against banking operations, the Dominion Government being the custodian of the gold for the banks. The other cash element in bank reserves is specie in hand. In addition to this cash on hand, Canadian banks carry three other kinds of assets which are regarded as reserves, being funds more or less immediately available for the liquidation of liabilities. These are: (1) cash balances in banks outside of Canada; (2) call and short loans in New York (the favorite call loan market); and (3) readily marketable securities. These are shown, together with net liabilities, in Table 15. In Table 16, the ratio to net liabilities of each element of the reserves is shown.

## 15.—Bank Reserves in Detail and Total

NOTE.—The statistics in this table are averages computed from the twelve monthly

| Calendar Year. | Specie,<br>Dominion<br>Notes and<br>Foreign<br>Currencies. <sup>1</sup> | Cash Due from—                        |                                                                       |                       | Call and<br>Short Loans<br>elsewhere<br>than in<br>Canada. |

<sup>1</sup>Does not include "Deposits with the Minister of Finance for security of the note circulation" of insolvent banks, nor "Deposits in the Central Gold Reserves", instituted in 1913 as a reserve against additional bank-note circulation. The average amounts of these deposits during each of the latest four years are shown in Table 11.

## Net Liabilities, calendar years 1901-34.

returns in each year. Figures for 1892-1900 were given on pp. 872-873 of the 1927-28 Year Book.

<sup>2</sup>Net liabilities are obtained by deducting from total liabilities to the public, as shown in Table 10, the items "Notes of other banks", "Cheques on other banks", and "Loans to other banks in Canada, secured, including bills rediscounted", which represent indebtedness within the system and are counter-balanced by credits within the system.

16.—Ratios of Bank Reserves to Net Liabilities,<sup>1</sup> calendar years 1901-34.

NOTE.—The statistics in this table are based upon the averages given in the preceding table of the twelve monthly returns in each year. Figures for 1892-1900 will be found at p. 874 of the 1927-28 Year Book.

| Calendar Year. | Cash on hand. | Cash due from Banks outside of Canada. | Call and Short Loans elsewhere than in Canada. | Securities. | Percentage of Total Reserves to Net Liabilities. |

See Table 15 for actual amounts of reserves and net liabilities.

## Subsection 2.—The Individual Chartered Banks of Canada.\*

During the period from 1881 to 1901, the number of chartered banks doing business in Canada under the Bank Act remained almost the same, 36 in 1881 and 1891, and 34 in 1901, but during the present century there has been in banking, as in industry, an era of amalgamations, the number of banks having dropped to 25 in 1913 and to 10 in 1931. That this has been far from involving a curtailment of banking facilities is seen in Table 10, which shows the development of the banking business since 1867, and in Table 17, which compares the number of branch banks existing in Canada at different periods, and shows a growth from 123 at Confederation to 4,083 inclusive of sub-agencies at Dec. 31, 1930. Since then, owing to the shrinkage in commercial activities as a result of the depression, some unprofitable branches have been closed and the total has declined to 3,527, exclusive of 150 branches and agencies in other countries, as at Dec. 31, 1934.

\* Revised by A. W. Rogers, Secretary, The Canadian Bankers' Association.

Tables 18 and 18A give the numbers of branches of the various banks, by provinces, as at Dec. 31, 1933 and 1934, while Table 19 contains the statistics of branches of Canadian banks doing business outside of Canada, an extension of Canadian banking (more especially to Newfoundland and the West Indies) which proceeded very rapidly in the war and early post-war period, rising to a total of 206 in 1921. Since then this number has gradually declined to 150 branches and sub-agencies in 1934.

<sup>1</sup>Exclusive of one sub-agency. <sup>2</sup>Exclusive of two sub-agencies.

**Earnings of Canadian Banks.**—The chartered banks of Canada are for the most part Dominion-wide institutions, doing business in all parts of the country. Their earnings, therefore, reflect with very considerable faithfulness the fluctuations of general business. So far as individual banks are concerned, the changes resulting from amalgamations are apt to render the figures incomparable over a period of years. During the six years covered by Table 20, however, only one bank, the Imperial Bank of Canada, has absorbed another bank, *viz*, The Weyburn Security Bank.

**20.—Net Profits of Canadian Banks and Rates of Dividend Paid, for their business years ended 1929-34.**

NOTE.—The profits of the Bank of Nova Scotia and the Bank of Toronto are stated exclusive of amounts paid for Dominion and provincial taxes; these amounts, however, are included for the other banks.

<sup>1</sup>Includes other liabilities.

**Bank Amalgamations and Insolvencies.**—Two tables follow which may be of interest to students of Canadian banking history. The first, showing bank insolvencies since 1867, gives the capital paid up, reserves, assets and liabilities of insolvent banks, and shows also the payments to noteholders and depositors. In the majority of cases, both these classes of creditors have received payment in full. The table of bank absorptions gives the dates of absorption of the 36 banks which have been incorporated with other institutions since 1867.

## 23.—Bank Insolvencies

NOTE.—No bank that has failed since 1895 has paid anything to shareholders in respect of their capital investment. There is no reliable information as to earlier dates. Information is not available from which to compute losses with respect to liabilities other than deposits and circulation. In some instances these liabilities would include liabilities to Governments (having preference) and to banks and others. Noteholders have experienced no losses whatever since the inauguration of the Bank Circulation Redemption Fund in 1890 or, in fact, since the failure of the Bank of Prince Edward Island in 1881. The amount of double liability actually collected from shareholders of the banks which latterly became insolvent was as follows:—

| Name of Bank and Place of Chief Office.                                        | Number of Branches when Operations Ceased. | Date of Charter.          | Date of Suspension or Cessation of Normal Operations. | Capital Stock at Date of Suspension. |             |           |
|--------------------------------------------------------------------------------|--------------------------------------------|---------------------------|-------------------------------------------------------|--------------------------------------|-------------|-----------|
|                                                                                |                                            |                           |                                                       | Authorized.                          | Subscribed. | Paid-up.  |
|                                                                                |                                            |                           |                                                       | \$                                   | \$          | \$        |

<sup>1</sup>The purchasing banks named in the latter part of the table are no longer in business.

<sup>2</sup>Dates given since 1900 are those of the Orders in Council authorizing the absorptions.

<sup>3</sup>The Banque d'Hochelega after absorbing the Banque Nationale adopted the name Banque Canadienne Nationale.

(Footnotes to Table 23 concluded.)—

\*This bank did not suspend payment, but when difficulties were encountered an arrangement was made whereby all liabilities were taken over by the Bank of Montreal which, with certain other banks, assumed responsibility for any loss which might result after realization of assets and double liability of shareholders. Depositors and other creditors accordingly experienced neither loss nor delay. By winding-up order of Sept. 29, 1908, the bank was placed in liquidation and shareholders proceeded against for double liability, in respect of which \$1,202,510 was collected but \$601,534 of that amount subsequently returned. Winding-up proceedings terminated in January, 1918.

\*This bank did not suspend payment. By agreement, certain other banks took over its various branches and assumed all of its liabilities; accordingly depositors and other creditors experienced neither loss nor delay. In 1911, when the assisting banks threatened to place the bank in liquidation for the purpose of enforcing payment of double liability of shareholders, a corporation named International Assets Limited was formed, which assumed all liabilities to the assisting banks and took over the assets of the Sovereign Bank, upon which bonds were issued to the assisting banks for the amount owing them. Numerous shareholders of the Sovereign Bank subscribed to preference shares in the corporation and to the extent that they did so were released from their double liability on shares of the Sovereign Bank; as a result, in excess of \$2,000,000 was collected and paid over to the assisting banks. On Jan. 27, 1914, after it became apparent that a number of shareholders would not subscribe, or pay their double liability voluntarily, the Sovereign Bank (at a time when International Assets Limited was its sole creditor) was placed in liquidation.

\*In addition to realization of general assets, the President of this bank advanced sufficient to permit of all liabilities being paid in full without resort to the double liability of the shareholders.

\*A Royal Commission inquired into the failure of this bank in 1912 and its report, together with the evidence adduced at the inquiry, are matters of public record.

\*Liquidation not yet completed. A preferred claim of the province of British Columbia for approximately \$100,000 has been settled for \$65,000 subject to the proviso that the province may rank with ordinary creditors for the balance, if or when the ordinary creditors have received a dividend of 25 p.c. The remaining assets, however, may realize only sufficient to pay a very small dividend, if any.

\*Interim dividend of 25 p.c. paid by the liquidator in December, 1923, and he anticipates being able to make a further distribution eventually when the remaining assets are realized. The amount will depend entirely upon future developments but, in any event, is unlikely to exceed 10 p.c. The Government of Canada, pursuant to investigation by a Royal Commission into the responsibility for and causes of the failure, granted relief to the extent of 35 p.c. of the claims of certain classes of creditors, namely, all those individuals with claims of less than \$500 as well as those with larger claims who were found upon due inquiry to be in special need or straitened circumstances as a result of the failure. This involved a total outlay of approximately \$3,460,000.

### Subsection 3.—The Volume of Business Transacted through the Banks.

In advanced industrial societies money is only "the small change of commerce". The great bulk of monetary transfers, particularly in the case of the larger transactions, is made through the banks. Thus it has been estimated that in the United States in 1917 about 6 p.c. of the business transactions of the country were financed by the use of money and the remaining 94 p.c. by the use of cheques. Accordingly, if we knew the aggregate amount of the cheques paid through the banks and charged to accounts, we should have an almost complete record of the volume of business transacted, and thus of the business activity of the country.

Statistics of this character were at first secured through the operation of the clearing houses—places where the representatives of all the banks met daily in the leading cities and presented for payment the notes of other banks and the cheques drawn upon other banks that had been paid into their institutions in the regular course of business. In Canada, the first clearing houses to be established were those of Halifax (1887), Montreal (1889), Toronto (1891), Hamilton (1891) and Winnipeg (1893), and the number has subsequently increased to 32. In recent years, owing to the reduction in the number of the banks through amalgamations, the proportion of the inter-bank transactions recorded by the clearing houses to the grand total of banking transactions has declined, and the place of total bank clearings as a measure of business has been taken by total bank debits—*i.e.*, the totals of cheques charged to accounts at all banks. The total bank debits at all branch banks situated in the clearing-house cities of Canada have been compiled for 1924 and subsequent years by the Canadian Bankers' Association for the Dominion Bureau of Statistics, which has published the figures monthly and annually with interpretative analyses. Further, in order that an estimate might be made of the proportion of banking transactions outside the clearing-house cities to the total, the Canadian Bankers' Association secured for the month of January, 1929, the grand total of all cheques charged to accounts at all branch banks throughout the Dominion. The results were published in the Bureau's Monthly Review of Bank Debits for February, 1929, and showed that the aggregate of transactions outside the clearing-house cities was in January, 1929,  $14\frac{1}{2}$  p.c. of the grand total in the clearing-house cities. The corresponding figures in the five economic areas were as follows: Maritime Provinces 90.6 p.c., Quebec 6.1 p.c., Ontario 17.2 p.c., Prairie Provinces 18.6 p.c., British Columbia 14.3 p.c. Only in the Maritime Provinces does the total of bank debits in clearing-house cities appear to represent inadequately the grand total of business transactions throughout the whole area.

**Clearing-House Transactions.**—The following table shows for the years 1930-34 the total volume of clearings in the clearing houses of Canada. These figures, it may be added, represent not only actual city clearings but exchanges between numerous rural branches of the banks in each district.

The following is a description of the operation of the Central Clearing Settlement: From the beginning of 1927 until Mar. 9, 1935, balances due to or by each member of the Montreal, Toronto, Winnipeg and Vancouver clearing houses, after having been settled and declared by the clearing-house manager, were communicated daily (in the case of the three latter clearing houses by telegraph) to a trustee—The Royal Trust Company—in Montreal. Each bank lodged with the trustee a substantial sum in Dominion notes. The trustee on receipt of the daily advice, made the appropriate credit or debit entry in each account kept for each bank. In the usual course the trustee made the entries and balanced the accounts

for the day by twelve o'clock noon, and each bank was immediately notified of the state of its account; if the debits of the day on balance exceeded the amount of Dominion notes held for any bank by the trustee, the bank concerned delivered, within an hour of notification thereof, an amount in Dominion notes sufficient to give it a credit balance.

On Mar. 11, 1935, the Bank of Canada and its Agents took over the functions of The Royal Trust Company in this connection. It was arranged that the clearing house at Ottawa should participate directly in the Central Clearing Settlement. Each bank maintains in its account with the Bank of Canada, Ottawa, a balance (in excess of whatever deposit is maintained as part of the 5 p.c. reserve against deposit liabilities in Canada required by statute) deemed sufficient to settle its clearing obligations. The debit or credit balances of the banks at the specified points are daily communicated by the clearing-house manager, and confirmed by the respective bank, to the local Agent of the Bank of Canada (to the Bank of Canada in the case of Ottawa) for transmission to the Bank of Canada at Ottawa by telephone or telegraph, which bank on the same day debits or credits, as the case may be, the account of the respective bank maintained with the Bank of Canada.

Inasmuch as Montreal, Ottawa, Toronto, Winnipeg and Vancouver are the settlement points for the clearing houses in their respective zones, practically all the banking transactions of the country are adjusted daily in Ottawa in the accounts maintained by the banks with the Bank of Canada.

**25.—Amounts of Exchanges of the Clearing Houses of Chartered Banks in Canada for the calendar years 1930-34.**

| Clearing House.      | 1930.                 | 1931.                 | 1932.                 | 1933.                 | 1934.                 |

Bank clearings, though generally regarded as a leading barometer of business conditions, are defective in that they record only inter-bank transactions—transactions through which one bank becomes either the debtor or the creditor of another. They do not record the numerous transactions in which the transfer of value is made within a single bank, as, for example, where the purchaser and the seller of values that are paid for by cheque carry their accounts in the same bank. As the number of separate banks has in recent years been steadily diminishing through amalgamations, there being only 10 in December, 1934, as compared with 18 in 1923, inter-bank transactions are bearing a steadily decreasing proportion to the total of business transacted, a fact which goes far to explain the relative smallness of the increase in bank clearings from 1926 to 1929 and makes the extent of the subsequent decrease, as shown in Table 25, open to question.

**Bank Debits.**—Since bank clearings have ceased to be a satisfactory measure of general business, the Bureau of Statistics in 1923 took up with the Canadian Bankers' Association the question of securing a record of bank debits, *i.e.*, of all cheques charged against accounts at all banks. The Bankers' Association agreed to secure from January, 1924, the monthly aggregate figures of the amount of cheques charged to accounts at all banking offices situated in the clearing-house centres of Canada, and the figures of cheques charged to accounts (bank debits) are given for the years 1930-34 in Table 26.

It will be noted, as establishing the need of the newer record, that bank debits for 1932 decreased 40.6 p.c. as compared with those of 1928, while bank clearings in the later year show a decrease of 47.4 p.c. The bank debits are a comparable record for the five years; the bank clearings, owing to the reduction in the number of banks, are not a comparable record.

Three months only, the Weyburn Security Bank having been absorbed by the Imperial Bank of Canada.

**Subsection 4.—Government and other Savings Banks.**

In a comparatively new country where capital is relatively scarce, it is a natural thing that the banks which finance the business institutions should also absorb the bulk of the people's savings for use in promoting the business of the country. Thus in Canada the great bulk of the current savings of the people is found in the savings or notice deposits of the Canadian chartered banks, the annual average figures of which are given for recent years in Table 10 of this chapter, the 1934 average being \$1,372,817,869. Further, the current savings of the Canadian people are going very largely into the purchase of life insurance, the total premiums paid in the single year 1933 aggregating \$214,852,668. In comparison with the enormous figures of notice deposits in chartered banks and with total insurance in force, the deposits in the special savings banks are comparatively small, but are none the less significant.

There are three distinct types of savings banks in Canada at the present time, in addition to the savings departments of the chartered banks and of trust and loan companies. First, there is the Post Office Savings Bank, the deposits in which are a direct obligation of the Dominion Government. Secondly, there are Provincial Government savings banking institutions in Ontario and in Alberta, where the depositor becomes a direct creditor of the province. Thirdly, there are in the province of Quebec two important savings banks, the Montreal City and District Savings Bank and the Caisse d'Economie de Notre-Dame de Québec, established under Dominion legislation and making monthly reports to the Department of Finance.

**Dominion Government Savings Banks.**—Prior to 1929 there were two classes of Dominion Government savings banks in Canada, the Post Office Savings Bank, under the Post Office Department, and the Dominion Government Savings Bank, attached to the Department of Finance. The former was established under the Post Office Act of 1867 (31 Vict., c. 10) in order "to enlarge the facilities now

available for the deposit of small savings, to make the Post Office available for that purpose, and to give the direct security of the Dominion to every depositor for repayment of all money deposited by him together with the interest due thereon". Branches of the Government Savings Bank proper, under the authority of the Finance Department, were established in the leading cities of Canada under the management of the Assistant Receivers-General and in other places, in the provinces of Nova Scotia and New Brunswick, under managers appointed by the Governor in Council. The Dominion Government Savings Bank was amalgamated with the Post Office Savings Bank in 1929. Historical statistics for both systems will be found in Table 27 and more detailed figures covering the last six years in Table 28.

**27.—Deposits with Dominion Government Savings Banks,<sup>1</sup> June 30, 1868-1906, and Mar. 31, 1907-34.**

NOTE.—Figures for all intermediate years will be found on p. 833 of the 1926 Year Book.

**Provincial Government Savings Banks.**—Institutions for the deposit of savings are operated by the Provincial Governments of Ontario and Alberta, while a similar institution was in operation in Manitoba from 1924 to 1932 when the depositors' accounts were taken over by the chartered banks.

**Ontario.**—In the session of 1921, the Legislature of Ontario authorized the establishment of the Province of Ontario Savings Office, and in March, 1922, the first branches were opened. The funds received from this source are used almost exclusively to finance farm loans under the Agricultural Development Act. Interest at the rate of 2 p.c. per annum compounded half-yearly is paid on all accounts. The deposits are all repayable on demand. Total deposits on Mar. 31, 1935, were \$22,326,489 and the number of depositors at that date was over 98,000. Eighteen branches are in operation throughout the province.

**Alberta.**—In Alberta the Provincial Treasury receives savings deposits and issues demand savings certificates bearing interest at 3 p.c., or term certificates for one, two or three years, in denominations of \$25 and upwards, bearing interest at 3½ p.c. for one year and 4½ p.c. for two or three years. The total amount in savings certificates on Dec. 31, 1934, was \$10,586,023, made up of \$5,560,108 in demand certificates and \$5,025,915 in term certificates.

**Other Savings Banks.**—The Montreal City and District Savings Bank, founded in 1846 and now operating under a charter of 1871, had on Dec. 31, 1934, a paid-up capital and reserve of \$4,500,000, savings deposits of \$52,696,140 and total liabilities of \$54,541,338. Total assets amounted to \$59,305,992, including over \$43,500,000 of Dominion, provincial and municipal securities. The Caisse d'Economie de Notre-Dame de Québec, founded in 1848 under the auspices of the St. Vincent de Paul Society, incorporated by Act of the Canadian Legislature in 1855 and given a Dominion charter by 34 Victoria, c. 7, had on Dec. 31, 1934, savings deposits of \$12,697,544, a paid-up capital and reserve of \$2,500,000 and total assets of \$16,088,806.

The co-operative people's banks of Quebec (162 reported to the Provincial Government in 1933) are also an important element in promoting thrift and assisting business in that province. Thus on Dec. 31, 1933, savings deposits in these banks amounted to \$5,586,812, while the amount on loan was \$7,667,919. Loans granted in 1933 numbered 11,407 amounting to \$1,682,551. Profits realized amounted to \$452,220.

**29.—Deposits in the Montreal City and District Bank and the Caisse d'Economie de Notre-Dame de Québec, as at June 30, 1868-1906, and Mar. 31, 1907-31.**

NOTE.—Figures for all intermediate years will be found on p. 833 of the 1926 Year Book.

### Section 3.—Loan and Trust Companies.

Business such as that now transacted by loan and trust companies was first carried on by an incorporated Canadian company in 1844, when the Lambton Loan and Investment Co. was established, while the Montreal Building Society was incorporated by c. 94 of the Statutes of 1845. In order to legalize and encourage such operations in Upper Canada, an Act was passed by the Canadian Legislature in 1846, followed in 1847 and 1849 by Acts in New Brunswick and Nova Scotia respectively. These early companies were termed building societies; their activities comprised mainly the lending of money on the security of real estate and also the lending of money to members without their being liable to the contingency of losses or profits in the business of the society. In addition to these operations, such companies were authorized by an Act of 1859 to "borrow money to a limited extent". Later, by the Building Societies Act of 1874, authority was given to receive money on deposit and to issue debentures, subject to certain restrictions as to amounts of deposits.

The number of loan and savings societies in operation and making returns to the Government at Confederation was 19, with an aggregate paid-up capital of \$2,110,403 and deposits of \$577,299. Rapid increases in the number of companies and total volume of business resulted from subsequent legislation until in 1899 102 companies (including trust companies) made returns, showing capital stock paid up of \$47,337,544, reserve funds of \$9,923,728 and deposits of \$19,466,676; total liabilities had increased from \$3,233,985 to \$148,143,496 between 1867 and 1899. By 1913 the number of companies had declined, through amalgamations and absorptions, to 74 (including 16 trust companies) with a combined paid-up capital of \$68,091,042, reserves of \$35,959,342, deposits of \$32,681,806 and total liabilities of \$478,658,228.

The laws relating to trust and loan companies were revised by the Loan and Trust Companies Acts of 1914 (4-5 Geo. V., cc. 40 and 55), with the result that the statistics of provincially incorporated loan and trust companies ceased to be collected. The statistics of Tables 31 and 32 refer only to those companies operating under Dominion charter, except that, beginning in 1925, the statistics of loan companies and trust companies incorporated by the province of Nova Scotia, and brought by the laws of that province under the examination of the Dominion Department of Insurance, have been included. Also, since 1922 provincially incorporated loan and trust companies have made voluntary returns of their statistics to the Dominion Department of Insurance, so that all-Canadian totals are again available for recent years. As indicating the progress of the aggregate of loan company business in Canada, it may be stated that the book value of the assets of all loan companies rose from \$188,637,298 in 1922 to \$213,649,794 in 1931, although declining slightly to \$205,791,934 in 1933. The total assets in the hands of the trust companies increased from \$805,689,070 in 1922 to \$2,553,694,019 in 1933. The latter figure included \$2,328,615,120 of "estates, trusts and agency funds". (Table 30A.)

**Functions of Loan Companies.**—The principal function of loan companies is the lending of funds on first mortgage security, the money thus made available for development purposes being secured mainly by the sale of debentures to the investing public and by savings department deposits. Of the loan companies operating under provincial charters, the majority conduct loan, savings and mortgage business, generally in the more prosperous farming communities.

**Functions of Trust Companies.**—Trust companies act as executors, trustees and administrators under wills or by appointment, as trustees under marriage or other settlements, as agents or attorneys in the management of the estates of the living, as guardians of minor or incapable persons, as financial agents for municipalities and companies and, where so appointed, as authorized trustees in bankruptcy. Some companies receive deposits, but the lending of actual trust funds is restricted by law. The figures of Tables 30 and 30A are of particular interest in the case of trust companies, which, on account of the nature of their functions, are mainly provincial institutions, since their chief duties are intimately connected with the matter of probate, which lies within the sole jurisdiction of the provinces.

**30.—Summary Statistics of the Operations of Dominion and Provincial Loan and Trust Companies in Canada, as at Dec. 31, 1932.**

<sup>1</sup> Includes statistics of trust companies chartered by the Government of Nova Scotia but inspected by the Dominion Department of Insurance.

<sup>2</sup> Includes money in trust for investment amounting to \$2,562,455 in 1914, \$3,113,170 in 1915, \$3,799,149 in 1916, \$3,443,682 in 1917, and \$5,170,463 in 1918; corresponding amounts are included under the heading "Estate, trust and agency funds" for the years 1920 to 1933. The figures for 1919 are not available.

<sup>3</sup> Revised since the publication of the 1933 Year Book.

### Section 4.—Sales of Canadian Bonds.

Interesting aspects of public financing and of the investment of capital in Canadian development during the twentieth century are illustrated by the sales of Canadian bonds since 1911 shown in Table 33. (The figures are reproduced from the *Monetary Times Annual*, 1935.) In the first part of this table, the bonds sold in each year are divided according to whether the financing was for Dominion or Provincial Governments, or for municipalities, railways or other corporations, while in the second part of the table the sales in each year are distributed according to sales in Canada, the United States and the United Kingdom.

The total sales of Canadian bonds naturally reached a very high mark toward the close of the War owing to the Dominion Government financing required to cover the war expenditures. However, the total sales were greater in 1931 than in any other year, owing largely to the Dominion Government's conversion loans.

Dominion Government financing through bond sales since 1907 may be divided into three periods: the first from 1908 to 1914, when the money was required largely for internal development of the country, public works and Government railways; the second from 1915 to 1919, when war expenditures required very large borrowings; and the third since the War, when the issues have been largely required for refunding former loans at lower interest rates and for expenditures in connection with public works and railways.

Provincial bond issues have been on a much larger scale since the War than formerly, probably due to the development of provincially-owned public utilities and of improved highways. Sales of the bonds of Canadian municipalities, on the other hand, were greater in 1913, toward the end of the "land boom", than they have been in any other year, although sales in 1930 almost reached the record. However, allowing for the increased population in cities and towns, there has not been the same marked increase in the average annual sales of municipal bonds in the period since the War, as compared with the period before the War, that is noticeable in the case of provincial bonds.

Sales of corporation bonds, which from 1926 to 1930 had averaged over \$257,000,000 per year, dropped to \$10,550,000 in 1932, and to \$4,385,000 in 1933, this being largely due to the uncertainty of the industrial outlook. Railway bonds showed a somewhat similar decline to \$12,500,000 in 1932, and to only \$1,000,000 in 1933. In 1934 substantial recoveries were shown in both classes.

A very striking change has taken place during the present century in the market in which Canadian bond issues are principally sold. Prior to the War, a great part of the capital required for Canadian development came from the United Kingdom, and the major portion of Canadian bond issues was sold there. The outbreak of war temporarily eliminated that market, and Canadians turned largely to the United States for outside capital. However, the great increase in wealth during and since the War has enabled a much greater proportion of public and industrial financing to be done at home, and beginning with the Victory Loan campaigns, Canadians not only learned how to invest their money in bonds, but had the necessary funds to invest on a large scale in bond issues. These facts are reflected by the figures in Table 33 showing that since 1915 a greatly increased proportion of the total issues of Canadian bonds has been sold within Canada. Thus, in 1934, 83 p.c. of all bonds issued were sold in Canada, 8 p.c. in the United States and 9 p.c. in the United Kingdom.

### 33.—Sales of Canadian Bonds, by Class of Bond and Country of Sale, calendar years 1911-34.

(From the *Monetary Times Annual*. Figures for 1904-10 inclusive will be found at p. 921 of the 1933 Year Book.)

#### CLASSES OF BONDS.

| Calendar Year. | Dominion.   | Provincial. | Municipal.  | Railway.    | Corporation. | Total.        |
|----------------|-------------|-------------|-------------|-------------|--------------|---------------|
|                | \$          | \$          | \$          | \$          | \$           | \$            |

## Section 5.—Corporation Dividends.

(From the *Financial Post Business Year Book*.)

The 1934 improvement in Canadian business, as indicated by higher corporate earnings, was reflected in the total annual dividend payments of \$185,759,716, compared with \$134,679,359 in 1933, or a gain of 37.9 p.c. Every month of the year except September showed an increase; the then decrease was due to the change of dividend policies of Imperial Oil and International Petroleum, whereby these two organizations went on a semi-annual basis as contrasted to their former quarterly payments. Bonus payments from a few large industrial companies and a number of mining companies, plus initial dividends by some of the new mines, helped to swell the December total far above the 1933 figure. In Table 34 below there is given a six-year record of aggregate monthly dollar payments and yearly totals for all companies paying dividends in Canada:—

34.—Dividend Payments by Canadian Companies, 1929-34.

| Month.             | 1929.              | 1930.              | 1931.              | 1932.              | 1933.              | 1934.              |

## Section 6.—Foreign Exchange.

The Canadian dollar, adopted as our currency in 1857, was equivalent to 15/73 of the pound sterling; in other words, the pound was equal to \$4.866 in Canadian currency at par, and remained so, with minor variations between the import and export gold points representing the cost of shipping gold in either direction, until the outbreak of the Great War. Further, during the first eleven years after Confederation, the Canadian dollar was at a premium in the United States, as the United States dollar was not, after the Civil War, redeemable in gold until 1878. From the latter date, the dollar in the two countries was equivalent at par, and the variation was only between the import and export gold points or under \$2 per \$1,000.

At the outbreak of the Great War, both the pound sterling and the Canadian dollar were made inconvertible into gold and fell to a discount in New York, though this discount was "pegged" or kept at a moderate percentage by sales of United States securities previously held in the United Kingdom, borrowing in the United States, and, after the United States entered the War, by arrangements with the United States Government. After the War, the exchanges were "unpegged" about November, 1920, and the British pound went as low as \$3.18 and the Canadian dollar as low as 82 cents in New York. In the course of the next year or two, exchange was

brought practically back to par, and the United Kingdom resumed gold payments in 1925 and Canada on July 1, 1926. From then until 1928 the exchanges were within the gold points, but in 1929 the Canadian dollar again fell to a moderate discount in New York.

**Recent Movements in Canadian Exchange.\***—Because Canada has no foreign exchange mechanism of her own, Canadian transactions in exchange and monetary gold have been governed by New York and London. The United Kingdom buys much more from Canada than Canada buys from her, but the reserve is the case as regards the trade between Canada and the United States. The result is that there is a supply of bills on London in excess of the amount needed to meet current obligations in the United Kingdom. By offering these for sale for United States funds in London or New York, a triangular balance is approximated by book transactions and without the cross transfers of the larger quantities of gold which would otherwise be necessary. The volume of sterling exchange on Canadian account thus passed to the New York market does not greatly influence New York rates of sterling exchange under normal conditions; on the contrary, the volume of the New York-London transactions is sufficient to carry the Canadian rates along with them. Canadian exchange transactions with other countries are handled through London or New York and are unimportant of themselves, depending on the relationships with Canadian-New York and Canadian-London transactions.

In September, 1931, the equilibrium of international exchange was seriously disturbed. This unfortunate turn of events followed a period of over six years during which the nations of the world had worked steadily towards the stabilization of their currency systems upon a gold basis. Within two months of the time when the United Kingdom found it necessary to suspend free gold shipments, however, only a very small number of countries, including the United States and France, were left with currencies unshaken by preceding abnormal gold movements. The decision of the United Kingdom to go off the gold standard (Sept. 21, 1931) resulted in a sharp depreciation of sterling in New York, and partly owing to the triangular nature of the situation, but in some measure due to the immediate withdrawals of funds from Canadian banks by United States interests, short selling of Canadian exchange and other influences, Canadian rates depreciated also and fluctuated broadly with sterling until the United States dollar dropped from the ranks of gold standard currencies on April 19, 1933.†

During the balance of that year, the premium on United States dollars at Montreal gradually diminished from approximately 20 p.c. until in November it was replaced by a small discount of about 1 p.c. The pound sterling meanwhile advanced from \$4.234 in April to \$5.082 in November. The course of foreign exchanges throughout 1934 was more stable than it had been since 1931. Sterling reacted gradually until it reached its former parity of \$4.866 in September, and subsequent fluctuations centered around that level. This movement was accompanied by minor irregular changes in the United States dollar, which regained a fractional premium early in 1935. The Montreal premium on gold currencies has risen until it stood in the early part of 1935 at approximately 65 p.c.

\*Revised by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics.

†The U.S. dollar was subsequently replaced on a gold basis on Jan. 31, 1934, but the gold content of that dollar was reduced from 23.22 grains to ~~15.1~~ grains, or  $\frac{1}{32}$  of an ounce. The new U.S. gold dollar, therefore, has a gold content equal to 59.06 p.c. of that of the former gold dollar.

13  $\frac{5}{7}$

### 35.—Monthly Averages of Exchange Quotations at Montreal, 1933 and 1934.

NOTE.—The nominal closing quotations in Canadian funds upon which these averages are based, have been supplied by the Bank of Montreal.

<sup>2</sup>Shanghai dollar from November 1933 onwards.

## CHAPTER XXIII.—INSURANCE.\*

Insurance business is transacted in Canada by companies of the following classes, *viz.*, (1) companies incorporated under the laws of the Dominion of Canada or of the former "Province of Canada", (2) companies incorporated under the laws of the provinces of Canada, and (3) companies incorporated or formed under the laws of British and foreign countries. The word "companies" as here used, includes fraternal benefit societies, associations and exchanges which transact the business of insurance. The Dominion Insurance Acts provide that companies of classes (1) and (3) above may not transact business anywhere in Canada unless registered† by the Dominion, but these Acts also provide that fire insurance on property in Canada may be effected in companies of class (3) even though not registered, if the insurance is effected without solicitation, advertising or the use of the mails, and if an office is not maintained in Canada, though property to be insured may be inspected and losses may be adjusted. Insurance so effected is generally known as "unlicensed insurance". Companies of class (2) above may transact business in the province of incorporation, subject to compliance with the laws thereof, or in any other province subject to compliance with the laws thereof, or, on compliance with the Dominion laws, may be granted Dominion registration. Most of these companies limit their business to the province of incorporation or to one or more other provinces; a few only have been granted Dominion registration.

What has been said above implies that jurisdiction concerning insurance companies and insurance business is divided between the Dominion and the provinces. There have been many references to the courts and appeals to the Privy Council with a view to determining the respective legislative domains, both in respect of insurance legislation specifically and in respect of legislation affecting companies generally, including insurance companies. The last Privy Council decision was handed down in 1931. It may now be taken as established that the Parliament of Canada may require companies formed or incorporated outside of Canada to obtain Dominion registration and continue to be so registered as a condition of transacting business in Canada, and these companies may be required to make returns from time to time of their business and doings in Canada and to furnish evidence of their solvency. The powers of the Dominion go much farther in reference to companies incorporated by the Parliament of Canada, but include all of the powers which may be exercised over companies formed or incorporated outside of Canada and registered by the Dominion. The Acts passed in 1932‡ implement the powers of the Dominion as determined by the Privy Council decisions.

The Dominion Acts under which companies are registered are administered by the Department of Insurance under the Minister of Finance. The chief officer of the Department of Insurance is the Superintendent of Insurance. The first Superintendent was appointed in 1875 as head of a newly created Insurance Branch of the Department of Finance. In 1910 the Insurance Branch was constituted into a separate Department, the Department of Insurance, under the Minister of Finance.

\*The statistics of Fire, Life and Miscellaneous Insurance have been revised by G. D. Finlayson, Superintendent of Insurance, and those pertaining to Government Annuities (Section 4) by W. M. Dickson, Deputy Minister of Labour.

†Prior to 1932, the Dominion Insurance Acts provided for the "licensing" of companies; the Acts passed in 1932 provide for "registration". The change in terminology does not indicate any change in substance.

‡The Canadian and British Insurance Companies Act, 1932 (22-3 Geo. V, c. 46). The Foreign Insurance Companies Act, 1932 (22-3 Geo. V, c. 47).

Precedent to obtaining first registration, in addition to filing certain documents, including a full and complete financial statement, a company must satisfy the Minister that it is sound and solvent and must make the required initial deposit of securities, varying from \$10,000 to \$100,000, depending on the class of business to be undertaken. Annual returns are required of all registered companies and the Acts require an examination to be made, by the Superintendent or on his behalf, of the books and records of companies with a view to substantiating the accuracy of the statements filed and the soundness of the companies. Should any company show an unsatisfactory financial condition, the Acts require immediate remedial measures to be taken. British and foreign companies are required to maintain in Canada assets sufficient to cover all of their liabilities in Canada, while Canadian companies are required to maintain in Canada all of their assets, except such as it may be necessary to deposit outside of Canada as security for "outside of Canada" business.

The statistics herein given in respect of companies registered by the Dominion are divided into three classes relating to: (1) insurance against fire, (2) life insurance, and (3) miscellaneous insurance, *viz.*, accident, automobile, aviation, burglary, credit, earthquake, explosion, forgery, guarantee, hail, leakage, live-stock, sickness, steam boiler, title, tornado and weather insurance. These statistics are compiled from the reports of the Department of Insurance; throughout they apply to calendar years.

Since 1915, the Department of Insurance has collected statistics, included herein, of business transacted by provincial companies licensed by the provinces, classified as to: (1) business transacted within the province of incorporation, and (2) business transacted in other provinces.

Returns in respect of "unlicensed insurance", above referred to, were required under Section 16 of the Special War Revenue Act for taxation purposes, and statistics compiled from these returns were published in the Canada Year Book, prior to the 1933 edition, as Table 8. This section of the Act having been held unconstitutional by Privy Council decision, Oct. 22, 1931, on an appeal from the Court of the King's Bench of the province of Quebec, the returns for 1930 were incomplete and were not published in the 1933 Year Book. By an amendment to the Act at the 1932 session of Parliament, a section analogous to Section 16 was enacted, applicable to unlicensed insurance and Table 8 is therefore revived in the present edition (see p. 1016).

Statistics of Dominion Government annuities are given at the end of this chapter. The Department of Labour administers the Acts under which these annuities are sold.

### Section 1.—Fire Insurance.

Fire insurance in Canada began with the establishment by British fire insurance companies of agencies, usually situated in the sea ports and operated by local merchants. The oldest existing agency of a British company is that of the Phoenix Fire Office of London, now the Phoenix Assurance Co., Ltd., which commenced business in Montreal in 1804. On account of the growth of the insurance business of these early British companies, branch offices were established and local managers were appointed, charged with directing the companies' affairs in Canada.

The Halifax Fire Insurance Co. is the first purely Canadian company of which any record is available. Founded in 1809 as the Nova Scotia Fire Association, it was chartered in 1819 and operated in the province of Nova Scotia until 1919,

when it was granted a Dominion licence. Among the other pioneer fire insurance companies still in operation, mention may be made of the following: the Quebec Fire Assurance Co., which commenced business in 1818 and was largely confined in ownership and operations to Quebec province; the British America Assurance Co., incorporated in 1833, the oldest company in Ontario; the Western Assurance Co., organized in 1851, and, after a rapid and steady growth, one of the largest companies of its kind on the continent; two United States companies, the Aetna Insurance Co., Hartford, Conn., and the Hartford Fire Insurance Co., which commenced business in Canada in 1821 and 1836 respectively.

The report of the Superintendent of Insurance for the year ended Dec. 31, 1933, shows that at that date there were 240 fire insurance companies doing business in Canada under Dominion licences; of these 49 were Canadian, 67 were British and 124 were foreign companies, whereas in 1875, the first year for which authentic records were collected by the Department of Insurance, 27 companies operated in Canada—11 Canadian, 13 British and 3 American. The proportionate increase in the number of British and foreign companies from 58 p.c. to almost 80 p.c. of the total number is a very marked point of difference between the fire and life insurance businesses in Canada, the latter being carried on very largely by Canadian companies.

Although in its early days the Dominion did not prove a very lucrative field for fire insurance companies, the great advance in building construction and the wide use of improved fire appliances and safety devices have materially reduced the danger of serious conflagrations and have placed the risks assumed by companies in Canada on an equality with those of other countries.

A feature of the fire insurance business, besides the large percentage of British and foreign companies, is the continued increase in the number of companies which are operating on the mutual or reciprocal plan. These companies, in which all profits or losses are directly received or paid by the policyholders, are making themselves felt as competitive factors in the fire insurance business.

**Statistics of Fire Insurance.**—Statistical tables of fire insurance in Canada follow, illustrative of the progress of total business since 1869 and of the operations of individual companies for the year 1933. The net amount of fire insurance in force on Dec. 31, 1933, with companies holding Dominion licences, was \$9,008,262,736, while the net amount in force with provincial companies on the same date was \$1,190,180,426. In addition, policies amounting to \$442,826,911 were in force during the year 1933 with companies, associations or underwriters not authorized to transact business in Canada. Thus the grand total fire insurance in force on Dec. 31, 1933, probably approximated \$10,600,000,000.\*

Table 1 shows figures of the growth since 1869 of companies registered by the Dominion, the relationship between losses paid and net premiums written, and the variation in the cost per \$100 of insurance. It will be observed that the cost of insurance reached a maximum in 1904 and 1905; there has since been a steady decrease with the exception of the years 1921, 1922 and 1924, when temporary reversals of the downward swing were in evidence. It is noteworthy that the cost of fire insurance has decreased by 53.75 p.c. since 1905. Table 2 shows the business done in Canada by individual companies during the year 1933, while in Tables 3, 4 and 5 are given figures of the assets, liabilities, incomes and expenditures during the years 1929 to 1933, classified by nationality of companies. A further summary of

\*According to preliminary figures fire insurance in force in companies registered by the Dominion decreased by \$171,660,559 in 1934.

business is given by provinces in Table 6 for the years 1932 and 1933, showing premiums and losses classified by provinces and by nationality of companies. Further, a summary of the business transacted by both Dominion and provincial licensees is given in Table 7, and a general summary of the business of companies not registered under Section 148 of the Canadian and British Insurance Companies Act, 1932, or Section 65 of the Foreign Insurance Companies Act, 1932, is given in Table 8.

**1.—Summary Statistics of Fire Insurance in Companies Operating under Dominion Licences, calendar years 1869-1934.**

| Year.     | Amount<br>in Force at<br>End of Year. | Net<br>Premiums<br>Received<br>during<br>Year. | Losses<br>Paid<br>during<br>Year. | Percent-<br>age of<br>Losses<br>to Pre-<br>miums. | Gross Amount<br>of Risks<br>Taken<br>during Year. | Premiums<br>Charged<br>thereon. | Average<br>Cost per<br>\$100 of<br>Insurance. |

**Summary of Fire Insurance in Canada, 1933.**—Of the total amount of fire insurance effected in Canada during each year, a part is sold by companies holding provincial licences and permits. Such companies generally confine their operations to the province of incorporation, but may be allowed to sell insurance in other provinces. The bulk of fire insurance business, however, is transacted by companies registered by the Dominion. Operations in 1933 are summarized in Table 7.

<sup>1</sup>Includes \$19,990,300 unapportioned by provinces.

## Section 2.—Life Insurance.

An article descriptive of the growth and development of life insurance in Canada, contributed by A. D. Watson, of the Department of Insurance, Ottawa, appeared on pp. 937-944 of the Canada Year Book, 1933.

**Life Insurance Statistics.**—Life insurance business was transacted in Canada in 1933 by 42 companies licensed by the Dominion, including 27 Canadian, 6 British and 9 foreign companies. There were also 6 British and 5 foreign companies registered to write insurance but which had practically ceased to write new insurance, while 4 other British and 4 other foreign companies were authorized under the Act to transact business in connection with policies written prior to Mar. 31, 1878. One British company which retired as a writer of new insurance in 1878 has ceased all operations and has withdrawn from Canada. One foreign company, which also retired in 1878, was placed in the hands of a receiver in 1933 and has since reinsured all its Canadian policies with a Canadian company. One other foreign company was licensed to transact business in 1931, but has not yet written any life insurance business in Canada.

As shown by the historical statistics of Table 9, life insurance business in Canada has expanded from very small beginnings, the total net life insurance in force in all companies licensed by the Dominion in 1869 being only \$35,680,082, while in 1933 it was \$6,247,625,974,\* the amount per head of the estimated population of Canada having more than doubled since 1919 - an evidence of the general

\*This total does not include \$170,713,510 of fraternal insurance. Preliminary figures for 1934 indicate \$6,220,102,835 of life insurance in force in Dominion companies not including \$167,559,340 of fraternal insurance.

recognition of the value of life insurance for the adequate protection of dependants against misfortune. Notable also from these historical statistics is the fact that in this field British companies, which were the leaders in 1869, have fallen far behind the Canadian and the foreign companies. The total net amount of new insurance effected during the year 1933 was \$578,585,659\*, as compared with \$653,249,366 in 1932, \$782,716,064 in 1931, \$884,749,748 in 1930 and \$978,141,485 in 1929, while the premiums paid were \$206,954,224, as compared with \$216,132,957 in 1932, \$225,100,571 in 1931, \$220,523,727 in 1930 and \$210,728,479 in 1929.

The following diagram shows the rapid increase of life insurance in force in companies licensed by the Dominion between 1870 and 1931, and the slight decline between the latter year and 1933.

### LIFE INSURANCE IN FORCE IN CANADA 1870-1933

DOMINION COMPANIES

In Table 10 detailed statistics are given of the business of Canadian, British and foreign companies, respectively, by companies, in 1933, while Table 11 is a summary showing the business of Canadian, British and foreign companies for the past 5 years. Table 12 shows the ordinary and industrial policies in force and effected during the year ended Dec. 31, 1933. Table 13 gives the insurance death-rate by classes of companies, and Tables 14, 15 and 16 show, respectively, the assets, liabilities, cash income and expenditure of Canadian and other life insurance companies for the years 1929-33. Statistics of Dominion fraternal insurance are given in Table 17 and of Dominion and provincial insurance combined in Table 18, which shows that on Dec. 31, 1933, the total life insurance in force in Canada was \$6,589,133,575.

\*The net amount of new insurance effected in 1934 was \$596,062,050 according to preliminary figures. This is the first time an increase has been indicated since 1929.

<sup>1</sup>Figures do not include insurance in force and effectuated by Fraternal Societies operating under Dominion charters. The amount of insurance in force in such societies amounted to \$167,559,340 in 1934, according to preliminary figures. Corresponding figures for the years 1929-33 are given in Table 17, pp. 1025-1026.

<sup>2</sup>Subject to revision.

**10.—Life Insurance In Force and Effectd in Canada, by Companies, 1933.**

NOTE.—The statistics of this table do not include the business of Canadian companies outside of Canada.

# 14.—Assets of Canadian Life Companies and Assets in Canada of Life Companies other than Canadian Companies, 1929-33.

NOTE.—Certain British companies transacting fire insurance in Canada transact also life insurance in Canada, and inasmuch as a separation of assets has not been made between these two classes, their assets in Canada are not included here, but are included in the assets of British companies shown in Table 3 on pp. 1012-1013.

| Item.                                          | 1929.                | 1930.                | 1931.                | 1932.                | 1933.                |

<sup>1</sup>Includes expenditure on business outside of Canada. <sup>2</sup>Expenditure in Canada.

**Life Insurance Effected through Fraternal Benefit Societies.**—In addition to life insurance, some fraternal benefit societies grant other insurance benefits to members, notably sickness benefits, but these are relatively unimportant. Table 17 gives statistics of life insurance effected with fraternal benefit societies by Canadian members, together with statistics of assets, liabilities, income and expenditure relating to the whole business of Canadian societies and to the business in Canada of foreign societies. The rates charged by these societies are computed to be sufficient to provide the benefits granted, having regard for actuarial principles. Each benefit fund of every society must be valued annually by a qualified actuary (Fellow, by examination, of the Institute of Actuaries, London; of the Faculty of Actuaries in Scotland; of the Actuarial Society of America; or of the American Institute of Actuaries), and unless the actuary certifies to the solvency of each fund a readjustment of rates or benefits must be made. The statistics in the first part of this table relate to the Canadian societies reporting to the Insurance Department of the Dominion Government. These numbered 9 in 1933, *viz.*, Alliance Nationale, Ancient Order of Foresters, Artisans Canadiens-Français, Canadian Woodmen of the World, Catholic Mutual Benefit Association, Commercial Travellers' Association of Canada, Independent Order of Foresters, Grand Orange Lodge of British America and the Ukrainian Mutual Benefit Association of St. Nicholas of Canada.

Under an amendment to the Insurance Act, effective Jan. 1, 1920, all foreign fraternal benefit societies were requested to obtain Dominion authority precedent to transacting business in Canada, but any such societies which at that date were transacting business under provincial licences, while forbidden to accept new members, were permitted to continue all necessary transactions in respect of the insurance of their then members. Most of these societies have since obtained Dominion

authority to transact business, also some foreign societies which had not previously been licensed by the provinces. Of both classes of societies, 25 transacted business in Canada in 1933, *viz.*, Aid Association for Lutherans, Association Canado-Américaine, Catholic Order of Foresters, Commercial Travelers' Mutual Accident Association of America (accident business only), Expressmen's Mutual Benefit Association, First Catholic Slovak Union, First Catholic Slovak Ladies' Union, Jewish National Workers' Alliance, Knights of Columbus, Ladies' Catholic Benevolent Association, Lutheran Brotherhood, Lutheran Mutual Aid Society, Maccabees, Modern Woodmen of America, National Fraternal Society of the Deaf, National Slovak Society of U.S.A., Royal Arcanum, Royal Clan (Order of Scottish Clans), Slovene National Benefit Society, Sons of Norway, United Commercial Travelers of America (accident business only), Women's Benefit Association, Women's Catholic Order of Foresters, Workmen's Circle and Yeomen Mutual Life Insurance Company which is continuing the business issued by the Brotherhood of American Yeomen.

### 17.—Statistics of Fraternal Benefit Societies' Insurance, 1929-33.

**Summary of Life Insurance in Canada, 1933.** —In addition to the business transacted by life insurance companies registered by the Dominion, a considerable volume of business is also transacted by companies licensed by the provinces. Statistics of these provincial companies have been collected since 1915 by the Department of Insurance. Table 18, showing policies effected and in force, premiums received and losses paid, in Canada in 1933, summarizes the volume of business done by both life companies and fraternal societies, whether registered by the Dominion or licensed by the provinces.

18.—Dominion and Provincial Life Insurance in Canada, 1933.

Section 3.—Miscellaneous Insurance.

Since 1875 the growth of insurance business other than fire and life has been steady. The report of the Superintendent of Insurance for the calendar year 1880 shows that the number of companies licensed for the transaction of accident, guarantee, plate glass and steam boiler insurance—the only four classes of miscellaneous insurance then transacted—was 5, 3, 1 and 1 respectively. The report for the year 1933 shows that miscellaneous insurance in Canada now includes: accident, automobile, aviation, burglary, credit, earthquake, explosion, forgery, guarantee, hail, leakage, live-stock, steam boiler, title, tornado, weather insurance, etc. In 1880, 10 companies transacted business of the miscellaneous kind but in 1933 such insurance was issued by 243 companies, of which 50 were Canadian, 61 British and 132 foreign; 182 of these 243 companies also transacted fire insurance. In addition, 17 fraternal orders or societies carried on sickness insurance as well as life insurance business.

**Accident Insurance.**—The first licence of this kind was issued to the Travelers' Co., of Hartford, Conn., in 1868. The first licence to a Canadian company was issued to the Accident Insurance Co. of Canada, which was organized in 1872 and commenced business in 1874. Much accident insurance has also been sold by companies doing primarily a life insurance business. Seventy-seven companies transacted accident insurance in 1933.

**Automobile Insurance.**—This is now one of the most important branches of the miscellaneous class of insurance. Premiums increased from \$80,446 in 1910 to \$573,604 in 1915 and to \$18,260,176 in 1930; for 1933 they were \$11,933,574, showing decreases of 17.5 p.c. compared with 1932 and 34.6 p.c. compared with 1930. There has been an increase in the number of companies from 7 to 170 during the 23-year period.

**Plate Glass Insurance.**—Policies were first sold in Canada by the Metropolitan Plate Glass Insurance Co., a United States concern, which withdrew from Canada during 1882 to avoid business restrictions. The 79 companies operating in Canada in 1933 received premiums of \$468,120 and incurred claims of \$243,627, compared with premiums of \$510,543 and claims of \$244,152 for 1932.

**Burglary Insurance.**—In 1893 only one company issued burglary policies. A second followed in 1905 and in 1910 five companies were operating, while 75 companies sold this type of insurance during 1933. The premium income of these companies amounted in 1933 to \$1,126,613, and the losses incurred amounted to \$519,045.

**Hail Insurance.**—Insurance against hailstorms is a class of business of comparatively recent development in Canada. During the year 1933, 40 companies undertook this class of risk, the premiums written amounting to \$494,402, and the losses incurred to \$236,632. The total premiums for the 24 years during which this business had been carried on in Canada amounted to \$66,438,192 and the total losses paid to \$45,695,801.

<sup>1</sup> This business was transacted by companies not holding certificates of registry to transact fire insurance.

<sup>2</sup> Excluding \$1,466,989, premiums of fraternal benefit societies for accident, sickness and funeral business.

<sup>3</sup> Excluding \$939,465, losses of fraternal benefit societies for accident, sickness and funeral business.

### Section 4.—Government Annuities.

In the early years of the 20th century, there arose throughout the civilized world a distinct movement in favour of ameliorating the living conditions of the less well-off members of society. One form which this movement took in the United Kingdom was that of old age pensions, granted by the State as a gift to its poorer citizens, whose earnings were very generally insufficient to permit of a margin of saving. In Canada, where wages were higher and a margin of saving was possible, the movement at first took the form of providing, by establishing Government annuities, an absolutely safe investment for such savings, which had only too often been lost through the inexperience of their owners, leaving the latter a burden upon the charity of relatives or of the public.\* The cost of administering these annuities is borne by the Dominion Government.

Under the Government Annuities Act (c. 7, R.S.C., 1927, amended by c. 33, R.S.C., 1931), His Majesty the King, represented by the Minister (at present the Minister of Labour), may sell to persons over the age of 5 years, domiciled or resident in Canada, immediate or deferred annuities of not less than \$10 nor more than \$1,200 (1) for the life of the annuitant, (2) for a term of years certain, not exceeding 20 years, or for the life of the annuitant, whichever period shall be the longer, or (3) to any two persons domiciled in Canada during their joint lives, and with or without continuation to the survivor. The property and interest of any annuitant in any contract for an annuity is neither transferable nor attachable. The purchaser may contract that, in the event of the death of the annuitant before the date fixed for the annuity to begin, all money paid shall be refunded to the purchaser or his legal representatives with interest at the rate of 4 p.c., compounded yearly.

From Sept. 1, 1908, the date of the inception of the Annuities Branch, up to and inclusive of Mar. 31, 1934, the total number of annuity contracts issued was 18,806. Of these contracts, 2,241 have been cancelled, leaving in force on Mar. 31, 1934, 16,565 contracts. The total amount of purchase money received during the same period was \$43,285,490. Table 23 gives the details of annuities contracted for and purchase money received from 1909 to 1934, by years.

\*A Dominion-Provincial non-contributory scheme of old age pensions, providing for the payment, to persons 70 years and over, of pensions not exceeding \$20 per month, contributed by the Dominion and the provinces which become parties to the scheme, was enacted by Chapter 35 of the Dominion Statutes of 1927. The system is now in effect in British Columbia, Alberta, Saskatchewan, Manitoba, Ontario, Nova Scotia, Prince Edward Island, and the Northwest Territories. For further particulars, see pp. 837-838.

<sup>1</sup>Seven months.

Statistics of the Annuities Fund and value of all contracts issued are given in Tables 24 and 25. From Sept. 1, 1908 to Mar. 31, 1934, 18,806 annuities had been issued. On Mar. 31, 1934, 6,858 immediate annuities and 9,707 deferred annuities were in force. The total value of these annuities on that date was \$35,169,533 and the amount of immediate annuities in force on that date was \$2,844,154.

<sup>1</sup>Amount of immediate annuities.

It will be seen from the statements above that Government Annuities have grown steadily in favour, especially since 1921, the fund reaching a total of \$35,023,476 on Mar. 31, 1934.

## CHAPTER XXIV.—COMMERCIAL FAILURES.

According to Section 91 of the British North America Act, "the exclusive legislative authority of the Parliament of Canada" extends to bankruptcy and insolvency legislation, and an Insolvency Act (32-33 Vict., c. 16) was actually passed by the Dominion Parliament in 1869, applying to the four original provinces. This Act was in force for four years and was renewed by c. 46 of the Statutes of 1874, while in 1875 a new Insolvency Act (38 Vict., c. 16) applicable to the whole Dominion was passed, but was repealed in 1880. After this there was no Dominion legislation on the subject of bankruptcy until 1919. During the interval of nearly 40 years commercial failures were handled under provincial legislation, and the statistics relating to such failures during this period were compiled and published by Dun's and Bradstreet's commercial agencies. In 1919 a general Dominion Bankruptcy Act was passed (9-10 Geo. V, c. 36). Statistics of commercial failures dealt with under this Act since it came into force in 1920 have been compiled and published by the Dominion Bureau of Statistics. (See pp. 1036-1038.)

The history of commercial failures in Canada is traced by years from 1915 in Table 3.

**Failures, by Divisions of Industry.**—In every year the great majority of the commercial failures of the country are found among the trading establishments which are so much more numerous than the manufacturing. Thus, according to Dun and Bradstreet's records, out of a total of 1,627 commercial failures in Canada in 1934, 1,027 were among the retail trading establishments, including 413 in food, 195 in textiles and clothes and 104 general stores.

Out of the 389 manufacturers who failed, 93 were in foods, 63 in the textiles and clothes business and 46 among manufacturers of forest products. The larger scale on which manufacturers operate is evident from the fact that the defaulted liabilities of the 389 manufacturers were nearly as great as those of the 1,027 retail traders. The figures of commercial failures are analysed in detail for the years 1933 and 1934 in Table 1, while the totals are given by provinces for the same years in Table 2.

### 1.—Commercial Failures in Canada, by Industries, calendar years 1933 and 1934.

**Assignments under the Bankruptcy and Winding Up Acts.**—Under the Bankruptcy and Winding Up Acts (R.S.C., 1927, cc. 11 and 213) certain documents relating to assignments have, since 1920, been forwarded to the Dominion Statistician for statistical analysis. Table 4 gives the resulting figures of failures, by provinces, in 1922 and subsequent years, while Table 5 classifies them by branches of business. Table 6 gives the assets and liabilities of the assignors. A detailed analysis of the 1933 and 1934 failures, by provinces and branches of business, is made in Tables 7 and 7A.

<sup>2</sup> Included with "personal service" in 1933.

**Administration of Bankrupt Estates.**—The administration of bankrupt estates is now carried on by the Superintendent of Bankruptcy, appointed in 1932, with the object of conserving as far as possible the assets of bankrupt estates for the benefit of the creditors. His first report, covering the period from Dec. 1, 1932, to Dec. 31, 1933, indicates that, during the calendar year 1933, 850 bankrupt estates were closed up under the supervision of his office. The following figures for these estates show how wide is the gulf between the optimistic value of assets by debtors at the time of assignment as compared with the actual realization: total liabilities estimated at \$8,629,392; total assets valued (by debtors) at \$9,207,503; total actually realized \$1,880,015. The amount realized was distributed as follows: payments to creditors \$1,449,392; payments to debtors in lieu of exemptions \$6,790; administrative costs \$423,833. In 1934 the estimated assets of the 1,620 estates closed were \$14,887,298, the total receipts \$3,800,996 and the cost of administration \$880,803.

**8.—Totals of Assets, Liabilities, Assets Realized and Cost of Administration in Bankrupt Estates Closed in the calendar years, 1933 and 1934.**

## CHAPTER XXV.—EDUCATION.

### Section 1.—Schools, Colleges and Universities.\*

Throughout the Dominion of Canada public education, except for instruction of the native Indian population, is a matter of provincial concern. Before Confederation, the maritime colonies were separated from Ontario by French-speaking Quebec, and in each colony an educational system specially adapted to the local conditions had come into existence. When Confederation was under consideration, the protection of existing vested rights was the predominant consideration. As a result, Section 93 of the British North America Act, which embodies the Canadian constitution in so far as that constitution is a written one, provides that in and for each province the Legislature may exclusively make laws in respect of education, except that "nothing in any such law shall prejudicially affect any right or privilege with respect to denominational schools which any class of persons have by law in the province at the union".

Inasmuch as the administration of public education is one of the chief functions of Provincial Governments, in each of the provinces except Quebec there is a Department of Education administered either by a member of the Provincial Executive Council or Cabinet or by the Executive Council or Cabinet as a whole. In practice, however, the routine administration is in the hands of the permanent officials of the Department of Education, who are members of the permanent civil service. In Quebec the Superintendent of Education, appointed by the Government, is *ex officio* President of the Council of Public Instruction. The link between the Department of Public Instruction and the Government is the Provincial Secretary; there are also two deputy heads, called the French and English Secretaries of the Department.

Since the Departments of Education are permanent authorities, controlled as to details of administration by permanent officials, educational policy is relatively permanent; further, the control of the Governments over education throughout the provinces is relatively stronger than in the United States. A capable Deputy Minister or Superintendent of Education impresses his personality and his views upon the whole system of his province, especially as in practice he controls the payment of government grants, which constitute, on the average, about 14 p.c. of the total expenditure applied to educational purposes.

The Department of Education in each province naturally has its headquarters at the capital of the province. Its local representatives are the school inspectors, who are appointed and paid by the Provincial Governments, except for the "public" and "separate" schools in Ontario, where they are appointed (in all but unorganized districts) by the county or city municipality from a list approved by the province.

**Education in Quebec.**—In Quebec there are two distinct systems of education—the Roman Catholic and the Protestant systems—in each of which the teaching of religion takes a prominent position. In the latter, which is under the control

\*Revised by M. C. MacLean, M.A., F.S.S., Chief, Education Statistics Branch, Dominion Bureau of Statistics. This Branch is concerned with compiling and publishing comparable data relating to educational institutions throughout Canada, and to this end co-operates with the Provincial Departments of Education. A list of the publications of this Branch will be found in Chapter XXIX, Section 1, under "Education".

of the Protestant Committee of the Council of Public Instruction, with an English Secretary, the curriculum and the general system of education are similar to those in the other provinces, except that the highest grade is Grade XI, from which students are matriculated to McGill University and Bishop's University, the two Protestant English-speaking universities of the province.

In the Roman Catholic schools, which are mainly French-speaking, as the Protestant schools are English-speaking, the administration is in the hands of the Catholic Committee of the Council of Public Instruction, with a French Secretary. General elementary and continuation or "complementary" training is given by means of a curriculum, extending over one preparatory "year", six "years" of an elementary course, and two "years" of a complementary course. Some of these "years" require more than a year to complete, the completion of the "sixth year" corresponding in a general way to the end of the elementary grades, or high school entrance, in other provinces. Beginning in the school year 1929-30, a new superior course of three "years" beyond the complementary course was provided for. These are called the ninth, tenth and eleventh "years". Over 4,400 students were enrolled in the second year of introduction of the change.

**Summary Statistics of Education.**—Expenditure for schools, colleges and universities dropped from the peak of \$178,700,000 in 1931 to \$163,945,000 in 1932. The corresponding figures for the school year ended in 1933 shows a still greater drop, to \$146,922,000. The decline continued in 1934. Though its exact extent is not yet known, available data indicate that the total for 1934 was probably not above \$130,000,000. Up to 1933 the percentage drop was much greater in Ontario and the western provinces than in Quebec and the Maritimes. Capital expenditures have generally been brought to a very low level, and teachers' salaries, in the provinces for which 1934 records have been received, show a three-year decrease of about one-third. Reductions have been much more severe in rural schools than in towns and cities. A shortage of funds has led some communities to shorten the teaching year by a few weeks, but very few schools have been continuously closed for any considerable time. A concise numerical summary of institutions, pupils, teachers and costs for the school year ended in 1933 follows:—

GENERAL SUMMARY STATEMENT OF EDUCATIONAL INSTITUTIONS, STAFFS  
AND EXPENDITURES, 1933.

| Type of Institution.                        | Institutions.       | Pupils.   | Teachers.        | Expenditure.             |

<sup>1</sup> Figures for 1 (a) and 1 (b) in Quebec are for 1931-32; for 1 (a) in Ont., except secondary schools, are for calendar year 1932; all others are for 1932-33.

<sup>2</sup> Includes 176 in Yukon in 1 (a) and, for Yukon and N.W.T., 411 in Item 3, 14,000 in population and \$45,466 in expenditures.

<sup>3</sup> Schools for the blind, deaf, or mentally defective. These are boarding schools and many of the pupils are from a province other than the one in which they are at school. This is true, too, of industrial or reform schools in some provinces, with enrolments exceeding 3,000, which should properly be included under this heading.

Canada, by Provinces, 1933, or Latest Year Reported.<sup>1</sup>

<sup>4</sup> Includes also 453 in the Departmental summer schools for teachers in N.S., 2,918 in Ont., and 245 in B.C., not held at universities or colleges.<sup>5</sup> Includes also 2 (a) for Quebec.<sup>6</sup> Estimated.

### Subsection 1.—The Provincially-Controlled Schools.

It is considered that the best general test of the efficiency of public general education in Canada is furnished by the statistics of Table 2, showing the 1932-33 age-grade distribution of 1,457,026 pupils in the provincially-controlled schools of seven provinces. Many other tables of this form, analysing age-grade distribution by provinces, by sex, and by rural and urban areas and graded or ungraded schools, may be consulted in the Dominion Bureau of Statistics' "Annual Survey of Education in Canada, 1933", pp. 24-39.

### 2.—Provincially-Controlled Schools in Canada; Distribution of 1,457,026 Pupils in Seven Provinces, by Age and Grade, 1932-33.

<sup>1</sup> Kindergarten and Kindergarten-primary.

General elementary and secondary education throughout the Dominion, in so far as it is provincially-controlled, is carried on, except in Quebec, in free schools supported by general taxation. These schools may be divided into 12 grades, 8 of which are normally considered to be elementary and 4 secondary. The twelfth grade is in most provinces a postgraduate year, corresponding to the first year of a university course. The average pupil takes one school year to complete each grade, so that entering school at 6 years of age, he would matriculate to the university at 17 or 18.

A historical summary of the enrolment and average attendance in provincially-controlled schools from 1911 to 1933 is given by provinces in Table 3. The enrolment and average attendance, in cities of 10,000 population and over, are given in Table 4.

### 3.—Historical Summary of Enrolment and Average Attendance in Schools in Canada, by Provinces, 1911-33.

#### TOTAL NUMBERS ENROLLED, 1911-33.

NOTE.—Figures of enrolment and average attendance in various years prior to 1911 are given on pp. 839 and 840 of the 1932 Year Book.

<sup>1</sup>Figures revised since publication of the 1933 Year Book. <sup>2</sup>Half-year only. <sup>3</sup>Figures for Quebec and Ontario for 1933 not available at time of going to press.

### 4.—Numbers of Pupils Enrolled and in Average Attendance in All General Schools, and in High School Grades, in Cities of 10,000 or over, by Sex, 1933, or Latest Year Reported.

NOTE.—The high school enrolment in Quebec cities is not given because it would not be complete without including the high school pupils of the classical colleges and independent classical schools and of the normal schools. The figures for secondary grades for Ontario cities represent high schools, vocational schools, and collegiate institutes only; they do not include pupils in fifth classes.

**Secondary Education.**—In the past quarter of a century the number of pupils of both sexes doing work of secondary grade has shown a very great absolute increase as well as a large increase relative to the number in elementary grades. The available statistics are given by years in Table 5, and show that in each of the provinces and in every year the number of girls in the secondary grades has exceeded the number of boys. The drop in the Ontario figures between 1915 and 1917 is due in part to the change in the statistical year from the calendar year to the natural school year—September to June.

### 5.—Provincially-Controlled Schools in Canada: Comparative Numbers of Boys and Girls Doing Work of Secondary Grade in each of Seven Provinces, 1911-33.<sup>1</sup>

NOTE.—For corresponding figures for 1901-10, see p. 974 of the 1933 Year Book. B=boys; G=girls.

<sup>2</sup>Figures revised since the publication of the 1933 Year Book.

**Subjects of Instruction in Secondary Grades.**—The subjects taken in the elementary grades of the provincially-controlled schools are settled by the curricula, but in the secondary grades there are usually options appealing to different types of pupils, wishing to follow different callings. Statistics of the subjects taken by pupils in secondary grades in 1930, available for six provinces, were presented in the Canada Year Book, 1932, p. 843, showing, among other things, the small number of pupils taking Greek and German and the high proportion studying French and Latin. The "Annual Survey of Education in Canada, 1933" shows in detail the changes in the subjects chosen in recent years by secondary grade pupils in the different provinces.

**Vocational and Technical Education.**—The introduction of technical and vocational courses into the high school curricula has been stimulated in recent years by the Technical Education Acts of 1919, 1929 and 1931, under the terms of which the Dominion Government undertook to provide subsidies to the provinces to encourage the growth of technical instruction. From the outset evening classes during the winter months have been an important part of the work of the technical schools. The numbers of students in institutions for technical education coming within the scope of the Technical Education Act of 1919 (9-10 Geo. V, c. 73) in the academic years ended June 30, were as follows: 1921, 56,774; 1922, 61,961; 1923, 70,300; 1924, 79,829; 1925, 88,024; 1926, 88,961; 1927, 96,682; 1928, 109,008; 1929, 121,252. In the years since 1929 not all provinces have been receiving grants, but Table 6 provides a record of pupils receiving instruction of a technical character in the provincially-controlled schools in 1933.

<sup>1</sup>This table does not include students in commercial courses in Quebec who, it will be noted, constitute a numerous group in other provinces. In Quebec statistics they are included with the high schools, classical colleges, etc. Moreover, this table comes far short of demonstrating the full importance of technical or vocational training in Quebec for another reason. All the work in the Catholic schools in advance of the elementary years (i.e., in the five complementary and superior years, including about 25,000 pupils) has a highly vocational character. <sup>2</sup>Apart from certain compulsory general subjects in these years optional subjects are grouped in four vocational sections, in one of which each pupil studies. <sup>3</sup>Enrolment in Ontario schools is not for the full year but for a certain day—the last school day in May.

**Teaching Staffs.**—As shown in Table 1, the teaching staffs of Canadian schools consisted in 1933 of 73,241 teachers, 16,147 males and 57,094 females. The "Annual Survey of Education in Canada, 1933" deals in detail with the classification of these teachers, the rates of salary paid and the teaching experience. Table 7 summarizes statistics regarding rates of salary, as far as these are available.

**7.—Average Annual Salaries of School Teachers, by Provinces, 1932-33, or Latest Year Reported.**

**Teachers in Training.**—Detailed information regarding male and female teachers in training in 1932-33 is given in the Bureau of Statistics' "Annual Survey of Education in Canada, 1933". A summary of the number of teachers in training in each year from 1902 to 1933 is furnished by provinces in Table 8.

### 8.—Provincially-Controlled Schools in Canada: Number of Teachers in Training in Normal Schools and Colleges, by Provinces, 1911-33.

NOTE.—In recent years several universities have added teacher-training departments, in most cases for university graduates who are trained for teaching positions in the secondary schools. These are included in the figures since 1930. The large increase in Quebec in 1932 is due to the recognition of teaching brothers' scholasticates as normal schools for the first time; that in Ontario in 1933 is due to a second year of training being inaugurated. For corresponding figures for 1902-10, see p. 976 of the 1933 Year Book.

| Year.     | P.E.I. | N.S. | N.B. | Que.  | Ont.  | Man. | Sask. | Alta. | B.C. | Total. |

**Receipts and Expenditures.**—The total receipts and expenditures of the provincially-controlled schools of the different provinces are published for recent years in Table 9. Figures for the receipts in British Columbia and for expenditures in Prince Edward Island, Nova Scotia, New Brunswick and Quebec are not available.

### 9.—Canadian Provincially-Controlled Schools: Receipts and Expenditures, by Provinces, 1920-33.

NOTE.—For other years back to 1901, see the 1921 Year Book, pp. 148-153 and the 1932 Year Book, pp. 845-848.

<sup>1</sup>The latest figures are for 1932.

<sup>2</sup>Figures do not include receipts.

<sup>3</sup>Including grants to provincial university as follows: 1925, \$466,000; 1930, \$606,825; 1931, \$547,450; 1932, \$408,175; 1933, \$250,000.

### Subsection 2.—Higher Education.

The tables of this subsection are intended to include all institutions in the Dominion offering instruction in courses that are the equivalent of at least two years in advance of matriculation. The affiliated colleges of each university are shown along with it, except where they are situated in another province. In the tables following, the name of each institution is given in the language (French or English) used therein as the main language of instruction. Table 10 gives a summary of the degrees and diplomas granted by the different universities and colleges of Canada, and Table 11 shows the students attending the faculties and courses of instruction offered in each institution.

**Students of University Grade.**—The aggregate number of students in attendance was reported as 85,133. Of these 41,175 were of university grade (*i.e.*, following courses for which matriculation was prerequisite) and 34,033 were in attendance at the regular sessions. They were enrolled in 153 different colleges or universities. Of those attending the full sessions 32,217 were undergraduates, while 1,779 were graduate students, *i.e.*, working toward a higher degree in a subject in which they already held a bachelor degree. Many of the large numbers classed as undergraduates actually held degrees, but not in the subject or faculty in which they were studying during the session under consideration.

More than half of all undergraduate students, or 17,179, are in arts and pure science or what are termed "academic" courses as distinguished from "professional" courses. One or two years of arts is prerequisite to many of the professional courses—in French-language Quebec the full four years. Next to arts and science come engineering and applied science with 3,703 students; medicine, 3,009; theology, 1,832; agriculture, 1,406; education, 975; law, 902; commerce and accounting, 680; household science, 647; pharmacy, 475; dentistry, 367; public health and nursing, 280; veterinary science, 177; music, 120; forestry, 112; architecture, 157; etc.

As shown in Table 10, there were 3,954 bachelor degrees granted to men and 1,435 to women, 602 diplomas to men and 647 to women. Some of the latter represent completion of courses similar to those for bachelor degrees; after making due allowance for these and for duplication in cases where the same person may be receiving a second bachelor degree in a different branch of study, it may be concluded that there are, each year, about 3,700 new male and 1,400 new female university graduates with a bachelor degree or higher. The graduate degrees granted included 480 master degrees or licences to men and 116 to women, the term "licentiate" being used by the universities of Laval and Montreal in place of the term "master". Those completing the doctorate were 85 men and 8 women; while honorary doctor degrees were conferred on 85 men.

<sup>1</sup> All degrees except those in theology granted by Dalhousie.

<sup>2</sup> All degrees except those in theology entered opposite Toronto.

<sup>3</sup> Medical, dental and veterinary doctors included in "bachelor" column.

<sup>4</sup> The licence in the French-speaking universities is the next degree in advance of bachelor, as the master degree is in the English-speaking.

<sup>5</sup> Eighty-five of the doctor degrees were honorary.

**Students not of University Grade.**—The 41,175 students of post-matriculation standard represent little more than half of the total enrolment in universities and colleges. Many of the arts colleges, especially the classical colleges of Quebec, offer preparatory courses in which instruction is given in the high school grades, or even elementary grades. These accounted for 21,701 students, practically all of whom were in regular attendance at the full session.

The remaining 22,263 of the enrolment, 12,884 men and 9,379 women, were not following high school courses, but could not be classed as university-grade students as they had not necessarily matriculated. A minority of them attended the full session, generally studying music, household science or agriculture. The remainder were the students of summer courses in teaching methods, series of evening extension lectures, correspondence and other extra-mural courses, agricultural and other short courses.

Apart from the reported enrolment many thousands of people were reached by extension lectures that were not grouped in series and reported as courses, and still larger numbers reached by university radio broadcasts, travelling libraries, agricultural assistance and various other forms of extension service. These activities were reviewed in the "Annual Survey of Education in Canada, 1929".

**Teaching Staff.**—At pp. 858 to 861 of the 1932 Year Book there was published an analysis of the teaching staffs of universities and colleges as in 1929-30, by sex and by full time or part time. A corresponding table for 1932-33 will be found at p. 106 of the "Annual Survey of Education in Canada, 1933".

<sup>1</sup> Includes the arts students of Victoria, Trinity, St. Michael's, and students of the College of Pharmacy.

<sup>2</sup> The complete full-time enrolment in agriculture, including diploma and degree courses, is 793, household science, 381.

<sup>3</sup> Includes students of Manitoba Law School, and 710 in arts also registered in affiliated arts colleges.

<sup>4</sup> Included in Arts.

<sup>5</sup> To this figure should be added 50 students in the architecture section of the Ecoles des beaux Arts in Montreal and Quebec.

**Financial Statistics.**—Current expenditures were reported at \$17,722,000 in 1933, while they were \$18,743,000 in 1932, and \$20,079,000 in 1931. Capital expenditure, which had averaged nearly \$4,000,000 per year in the preceding three years, was reported at \$830,000 in 1933.

From the standpoint of financial support, there are at least three classes of institutions. First, there are those that rely on grants from provincial treasuries for their upkeep; six of the provinces have such universities and the remaining three have colleges in this class. Secondly, there are the institutions such as Dalhousie, McGill and McMaster Universities, to cite a few, that rely for their support on

of the Regular Session, by Faculties, 1932-33—concluded.

<sup>6</sup> Excluding 3,698 duplicates in undergraduate arts.<sup>7</sup> Included with Engineering.<sup>8</sup> These students were reported by Dalhousie with which university the Maritime College of Pharmacy is affiliated.<sup>9</sup> No reports received, although the main statistics will be included with the university to which the college is affiliated.

endowments, and do not receive provincial grants. Thirdly, there are colleges either operated or controlled by religious denominations and not receiving provincial assistance; these may not have a financial endowment sufficient to carry them. These may have another type of endowment—in men, so to speak, like the University of Ottawa and other Roman Catholic colleges conducted by religious orders. Since salaries are commonly only nominal in these schools, expenses are comparatively low per pupil accommodated. The other section of the third group—mainly Protestant theological and arts colleges—commonly rely on church contributions where their financial endowments are inadequate.

## 12.—Universities and Colleges of Canada:

NOTE.—When using the bold face provincial and grand totals, the foot-

## Section 2.—Scientific and Industrial Research in Canada.

This section has, in past years, dealt with the history of scientific and industrial research in Canada and has included subsections outlining the organization and work of the National Research Council and of those provincial councils and private institutions which are primarily interested in research work. During the past year, the operations of these organizations continued to be conducted along the lines described in previous issues of the Year Book, and to conserve space the section is not reprinted in this edition. The reader is referred in this connection to pp. 866 to 872 of the 1932 Year Book.

An important event in the history of scientific research in Canada was the opening of the new building of the National Research Council on Aug. 10, 1932.

## Section 3.—The Libraries of Canada.\*

It is more than three and a quarter centuries since the first known library came to what is now the Dominion of Canada—the library brought by Marc Lescarbot to Port Royal in 1606. A library was connected with Laval College at its establishment in 1663, although it was many years later before this institution became important. During the next century record is found of several libraries in Quebec city; one of these, a Jesuit library mentioned by Peter Kalm, the Swedish traveller (its existence is recorded again in 1789), was afterwards sold to the *Quebec Gazette* and again sold in 1851 to the Library of Parliament. The volumes, which have survived the ravages of time and two fires, may still be found on Parliament Hill at Ottawa. Two other libraries founded in Quebec in the 18th century were a subscription library established in 1779 and the Quebec Legislative Library established in 1792. Four years later a public library was opened in Montreal. The Legislative Library of Upper Canada was established in 1791. The Legislative Library of Prince Edward Island is somewhat older, as it was founded in 1773. The King's College Library, located until recently at Windsor, Nova Scotia, and now at Halifax, dates from 1800, the year of the founding of the oldest existing public library in the Dominion, the library at Niagara. During the first quarter of the 19th century there were several libraries founded in Nova Scotia, several in Montreal, and at least one in Western Canada.

In the first quarter of the 20th century there was much activity in the establishment of libraries for public use. Of the 1,110 existing Canadian libraries for which statistics have been secured, 256 are known to have been established during that period, without regard to the fact that the dates of founding have not been secured for all libraries and the certainty that for one reason or another some libraries have not survived.

**Public Libraries.**—Public libraries, to the number of 637 in 1933, report a circulation of 22,126,000 books, exclusive of the loans for reading-room or reference-room use. These figures do not include "travelling libraries", "open-shelf libraries", the Carnegie district demonstrations in the Fraser Valley of British Columbia and in Prince Edward Island, or the county libraries of the Nova Scotia Department of Education. The public libraries as at present conducted are primarily urban institutions; the total urban population of Canada in 1931 was 5,572,058, while the population in centres served by the 637 libraries was about 4,424,000. Only in

\*The latest biennial Survey of Libraries in Canada is for 1933 and may be obtained on application to the Dominion Statistician.

Ontario and British Columbia do the numbers served approximate the total urban populations. The number of borrowers registered at the end of 1933 was 1,101,000, about 25 p.c. of the population in communities served, just over 10 p.c. of the total Canadian population in 1931, or 13.5 p.c. of those over ten years of age.

**13.—Summary Statistics of Public Libraries, by Provinces, 1933, with totals for 1931.**

**University, College and Professional School Libraries.**—In 1933 this group included 232 libraries in advanced educational institutions having a full-time enrolment of 64,500 students and a teaching staff of about 7,000. The total contents of these libraries were 3,856,713 volumes and 398,000 pamphlets. The two largest of these libraries were those of McGill University with 455,000 volumes and the University of Toronto with 290,000 volumes.

**Business, Technical Society and Government Libraries.**—These included 149 libraries with about 2,210,000 volumes and 497,000 pamphlets. Nine of the ten largest (over 50,000 volumes) were Dominion or Provincial Government libraries. The largest was the Library of Parliament in Ottawa, reporting 365,000 volumes and 65,000 pamphlets. British Columbia reported the largest legislative library among the provinces, with 200,000 volumes and 100,000 pamphlets.

**Library Schools.**—Schools for the training of librarians exist at McGill University and at the University of Toronto. The former gives a short six weeks course of training as well as a degree course giving the degree of Bachelor of Library Science after a one-year course to those who have already a bachelor degree. The latter offers a one-year course in library training, the minimum requirement for admission to the course being honour matriculation. Acadia University and the University of Western Ontario give two courses in library science which may be taken for the degree of Bachelor of Arts. In the latter, one of the courses is prescribed for all first-year students.

#### Section 4.—Art in Canada.

An article entitled "The Development of the Fine Arts in Canada", contributed by Newton MacTavish, M.A., D. Litt., appeared at pp. 995-1009 of the 1931 Year Book and a shorter article, dealing more particularly with the National Art Gallery at pp. 886-888 of the 1924 Year Book.

## CHAPTER XXVI.—PUBLIC HEALTH AND BENEVOLENCE.

The rapid increase in the numbers committed to our various institutions, such as mental hospitals for the insane, feeble-minded and epileptic; the alleged increase in juvenile crime and the extension of social work in this field; the increasing number of institutions caring for the aged and incurable, as well as for dependent, neglected and handicapped children, have been marked features of the twentieth century. In this new and important field statistical data are collected and results analysed and published in leading countries. Although the difficulties encountered in building up statistics with a uniform application have been many, these statistics are now being collected on a Dominion-wide basis either at the decennial census or by annual returns.

In any comprehensive study of the situation it is essential that, besides health and hospitalization records, social statistics should also receive attention. Statistics regarding the number of children placed in foster homes, free family homes, number of children adopted, number of children cared for in day nurseries, institutional care of juvenile delinquents, numbers of dependent, neglected and handicapped children receiving institutional care, as well as fuller and more accurate data concerning inmates in our mental institutions, institutions for the feeble-minded, county asylums, county almshouses, poorhouses, etc., are becoming absolutely necessary to the proper drafting of social legislation and in order to deal with the problems of civilization, growing more complex day by day.

As public and private charity work together for the amelioration of conditions among the dependent and neglected, the proper treatment of defectives and the reclamation of the delinquent, the problem is made more difficult of statistical measurement, although the tendency to-day in most parts of Canada is to remove the responsibility of social work from the shoulders of individuals and private agencies and to regard it as more in the nature of a public responsibility. The growth in recent years of cordial relationships between governmental bodies and social welfare workers in the fields of school care and child welfare movements is manifested in the number of child welfare Acts in force in the various provinces of Canada.

### Section 1.—Administration.

In Canada, speaking generally, the administration of public health activities and the establishment and maintenance of institutions is in the hands of the Provincial Governments, under the powers given them in Sec. 92 of the B.N.A. Act, 1867. Under their control, municipalities, societies and individuals generally initiate charitable and humane efforts, depending on the Government to some extent for financial aid and for competent uniform inspection of methods and standards. Apart, however, from the actual organization of provincial health departments and of the administrative bodies charged with the management of hospitals and other such institutions, particular attention is given to the same branches of public health work in all the provinces. Important, and reflecting most clearly the benefits accruing from such work, are the provisions for medical inspection of school children. These are carried out in some cases by the district or sub-district medical health officers, and in others by public health nurses whose activities are confined to this

work alone. In addition to the continual supervision exercised over the health of the children, expert advice and assistance are supplied freely to children, teachers and parents. In many cases dental inspection is provided for. While this work has been carried on upon a considerable scale for only a few years, great benefits have already resulted from it, notably general improvement in health and sanitary conditions and in the control and prevention of epidemics.

Exercising particular jurisdiction over some phases of the general health of the people of the Dominion is the Department of Health of the Dominion Government, while the Dominion Council of Health acts as a clearing house on many important questions related to the health of the people. This Council consists of the Deputy Minister of the Dominion Department of Pensions and National Health as chairman, the chief executive officer of the provincial department or board of health of each province, together with such other persons, not exceeding five, as may be appointed by the Governor in Council to hold office for three years. Of these appointed members, four have in the past represented agriculture, labour, rural women's work and social service, and child welfare, while the fifth member is a scientific adviser on public health matters. (A fuller description of this Council will be found at pp. 908-909 of the 1926 Year Book.)

The public health activities of the Dominion Government were described at pp. 876-879 of the 1932 Year Book, and those of the various Provincial Governments at pp. 879-883 of the same volume. For a brief description of the organization and activities of the Red Cross Society and of the Victorian Order of Nurses, readers may refer to p. 923 of the Year Book for 1922-23. Finally, a statement regarding Mothers' Allowances showing the scales of payments and the methods of administration was published at pp. 935-936 of the 1925 Year Book.

## Section 2.—Institutional Statistics.\*

The most familiar of all the public institutions established to administer and foster the general health of the community is the general hospital common to all cities and towns of any considerable population, and found also in the more prosperous rural districts. Such hospitals are generally erected and supported by the municipality, their actual administration being in the hands of a board of trustees; their revenue, in addition to that provided by the municipality, is derived in the main from grants from the Provincial Governments, from donations of individuals and societies, and from patients fees. Admission and treatment are free to all deserving persons who apply for them and whose resources are so limited as to prevent their otherwise receiving proper medical attention, while it is more or less generally expected of others that payments for services shall be made in proportion to costs and the ability of patients to defray them. Second in importance are the houses of refuge and orphanages—homes where destitute adults and homeless children are taken in, fed and clothed until they can support themselves or until homes are found for them elsewhere. Orphans' homes are found in practically every urban and rural community of any size, while refuges or homes for the aged are supported by the larger centres and by county municipalities. Asylums for the insane, also found in all the provinces, differ from the foregoing types in that they are in general owned, supported and administered entirely by the provinces. In Nova Scotia, however, the insane of each county, together with the inmates of the refuges and orphanages, are in most instances cared for in one institution.

\*This section has been revised by J. C. Brady, Official in Charge of Census of Institutions, Dominion Bureau of Statistics.

Other institutions supported by the public include: isolation hospitals, maternity hospitals, homes for the deaf, dumb and blind, homes for incurables, infirmaries, homes for epileptics, lazarettos for lepers and tuberculosis sanatoria.

Throughout the Dominion many other more or less similar institutions exist whose nature is more independent than that of the types mentioned above. These institutions do not receive Provincial Government grants and are not in all cases subject to inspection.

Under authority granted by the Dominion Government in 1930, the Dominion Bureau of Statistics, through its newly created branch of Census of Institutions, now collects annual statistics for all hospitals in Canada, including mental institutions and homes for incurables.

### Subsection 1.—Hospitals, other than Mental.

The great majority of hospitals are public hospitals which are either under municipal control or under private boards of management. These hospitals are assisted in their care of indigent patients by municipal and provincial grants. In addition there are: private hospitals which do not receive public grants; hospitals conducted by various religious orders; convalescent hospitals; hospitals for incurables; tuberculosis sanatoria; Red Cross hospitals and out-posts; special hospitals; lazarettos for the segregation and treatment of persons afflicted with leprosy; and hospitals for the treatment of mental and nervous diseases which are, generally speaking, maintained by the provinces. The care of persons suffering from communicable diseases is the responsibility of the various municipalities.

There are also a limited number of hospitals under Dominion Government administration, *e.g.*, those in connection with ex-service men, military forces, marine, quarantine and immigration.

The modern hospital is at once a battlefield between life and death, an institution for the practice of medicine and surgery and, viewed broadly, a financial enterprise which exceeds in magnitude many nation-wide industries. There has been a remarkable growth of public interest in the work of our hospitals in recent years, and hospital statistics have become a necessity to the study of certain branches of present-day social economics.

The total number of various hospitals, other than mental hospitals, in operation in Canada during 1932 was 860, divided into three main groups, namely: public, private and those operated by the Dominion Government. The public hospitals numbered 611, made up of 460 general, 21 women's, 10 pædiatric, 3 orthopædic, 14 isolation, 6 convalescent, 34 Red Cross, 40 tuberculosis, 22 incurable\* and 1 special. Private hospitals numbered 214. The 35 hospitals operated by the Dominion Government were made up of: 8 for war veterans, 7 quarantine and immigration, 2 marine and 2 leper hospitals under the direction of the Department of Pensions and National Health; 9 military hospitals under the Department of National Defence; and 7 hospitals for Indians under the Department of Indian Affairs.†

During the year 1933, the total number of operating hospitals was 874, an increase of 14, classified as follows: public hospitals 605, a decrease of 6, (457 were general, 20 women's, 10 pædiatric, 3 orthopædic, 14 isolation, 6 convalescent, 34 tuberculosis, 36 Red Cross, 23 incurable,\* and 2 special); private hospitals numbered 238, an increase of 24; Dominion hospitals, 31 in number, (8 for war veterans, 4 quarantine and immigration, 1 marine and 2 leper under the Department of Pensions

\*Figures for hospitals for incurables for 1932, are shown separately in Table 7, but are included among other public hospitals for the year 1933 in Tables 1, 2 and 3.

†A complete list of all hospitals in Canada giving name, location, type, bed accommodation, etc., will be found in the new Hospital Directory for Canada, 1932, issued by the Dominion Bureau of Statistics.

and National Health; 9 military under the Department of National Defence and 7 under the Department of Indian Affairs). There were 3 quarantine and immigration and 1 marine hospitals closed during the year.\*

Summary statistics of the hospitals of the Dominion, other than mental hospitals, are presented for the years 1932 and 1933 in Table 1, while bed capacities of the hospitals in each province are given in Table 2, and detailed statistics of staff and patients, receipts and expenditures are shown by provinces in Table 3.

<sup>1</sup> 1933 figures subject to revision. <sup>2</sup> Exclusive of hospitals for incurables. <sup>3</sup> Including hospitals for incurables. \*In days.

The total hospital receipts for 1932, of the hospitals included in the above table were \$39,534,801, of which \$35,063,238 was classified as maintenance receipts, including government and municipal grants amounting to \$16,659,550, patients fees amounting to \$14,994,930 and receipts from other sources, \$3,408,758.

Expenditures for these hospitals, including those for maintenance and improvement, amounted to \$45,297,312 in 1932, of which \$37,228,757 was classified as expenditures for maintenance. These figures included salaries and wages \$15,650,912, provisions \$6,959,098, fuel, power, light and water \$3,556,535, and other expenditures for maintenance \$11,062,212.†

\*See footnote†, page 1068.

†Financial statistics for hospitals were not collected for 1933 pending the report of the financial committee on hospital accounting.
